Members of the Board of Directors Public Utilities Board of the City of Brownsville, Texas

We are pleased to present the Comprehensive Annual Financial Report (CAFR) of the Public Utilities Board of the City of Brownsville, Texas (Public Utilities Board) for the fiscal year ended September 30, 2017. As required by state law, the CAFR includes financial statements which have been audited by a firm of licensed certified public accountants. The financial statements are presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by the licensed certified public accounting firm of Carr, Riggs & Ingram, L.L.C.

The report consists of management's representation concerning the finances of the Public Utilities Board. As a result, management assumes full responsibility for the completeness and reliability of all the information presented in this report. To provide a reasonable basis for making these representations, management of the Public Utilities Board has established a comprehensive internal control framework that is designed both to protect the Public Utilities Board's assets from loss, theft, or misuse and to compile sufficient reliable information for the presentation of the Public Utilities Board's financial statements in conformity with GAAP. Because the cost of internal controls should not outweigh their benefits, the Public Utilities Board's comprehensive framework of internal controls is designed to provide reasonable, rather than absolute, assurance that the financial statements will be free from material misstatement. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects.

The goal of the independent audit, conducted by Carr, Riggs & Ingram, L.L.C., is to provide reasonable assurance that the financial statements of the Public Utilities Board for the fiscal year ended September 30, 2017, are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. Carr, Riggs & Ingram, L.L.C. concluded, based upon the audit, that there is a reasonable basis for rendering an unmodified opinion. The Public Utilities Board's financial statements

for the fiscal year ended September 30, 2017, are fairly presented in conformity with GAAP. The independent auditor's report is presented as the first component of the financial section of this report. GAAP requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The Public Utilities Board's MD&A can be found immediately following the report of the independent auditors.

In accordance with standards established by the Governmental Accounting Standards Board's (GASB) Statement No. 61, the Financial Reporting Entity: Omnibus, an amendment of GASB Statement No. 14, the Public Utilities Board meets the definition of a component unit of the City of Brownsville, Texas (City).

#### **PROFILE**

The Public Utilities Board was formed in 1960 to provide electric, water, and wastewater services to its customers in the Brownsville area. Pursuant to the City's Charter, management, operation, and control of the City's combined water, wastewater, and electric utilities system is delegated to the Public Utilities Board. The Public Utilities Board is comprised of seven members, six of whom are appointed by the City Commission for four-year terms, and the seventh member being the City's Mayor serving Ex-officio.

The **Electric System** provides retail electric service through its electric facilities to consumers inside and outside the city limits. The existing customer service area of the electric facilities encompasses approximately 133 square miles of Cameron County, including substantially the entire City (estimated by the Public Utilities Board at over 96%). The electric system serves a growing base of about 48,726 customers and serves a peak load of 284 MW. Current resources, mainly owned by the Public Utilities Board, are sufficient to cover peak demand.

The Public Utilities Board meets its power supply obligations through a combination of resources: (i) the operation of Oklaunion Unit No. 1, a coal-fired steam electric generating unit jointly owned and operated by Public Service Company of Oklahoma, AEP Texas Central Company, Oklahoma Municipal Power Authority, and the Public Utilities Board entitling the Public Utilities Board to 124 MW of capacity, (ii) the operation of the Silas Ray Power Production Facilities owned and operated by the Public Utilities Board (composed of one conventional steam turbine unit and a re-powered steam turbine in Combined Cycle with a combustion turbine and a GE LM6000 gas turbine generator for an estimated gas fired capability of 115 MW), (iii) the operation of the Calpine/Hidalgo combined cycle Power Plant in which the Public Utilities Board has an ownership interest entitling it to 105 MW of capacity, (iv) a Power Purchase Agreement with Excelon Corporation entitling the Public Utilities Board to purchase 78 MW of renewable energy and (v) economy energy purchases through an economy power interchange arrangement.

The Public Utilities Board currently has a gas transportation agreement with Texas Gas Services Company ("TGS"), a division of ONE Gas, Inc. and a gas supply agreement with Tenaska Marketing Ventures

("TMV") for service to its Silas Ray Generation units, and a gas supply agreement with Calpine Energy Services, LP for service to its Calpine/Hidalgo Plant.

Fuel and transportation contracts are in place, limiting the Public Utilities Board's exposure to the volatile fuel commodity markets.

The **Water System** draws raw water from the Rio Grande River and consists of a river rock weir, a river pump station, two reservoirs providing 187 million gallons total capacity, and a raw water transport system. Surface water treatment is achieved by two water treatment plants providing 40 million gallons per day (MGD) of total capacity (20 MGD treatment capacity each). Two clear wells provide 6.84 million gallons storage capacity, and three elevated storage tanks provide 5 million gallons of elevated storage capacity. Water is pumped by three high-service pumping stations into the distribution system which consists of 676 miles of transmission and distribution mains. The Public Utilities Board mainly sells to residential and commercial customers, but also sells treated water on a wholesale basis to two other water distribution companies that amount to approximately 5.03% of sales. The Public Utilities Board partnered with the Southmost Regional Water Authority (the Authority) and built a 7.5 million gallon per day reverse osmosis water treatment plant of which the Public Utilities Board has 92.91% ownership. The Authority's plant completed an expansion in November 2015 to provide microfiltration pretreatment and a total production capacity up to 10 MGD. The Authority's plant includes a 7.5 million gallon storage tank and one high service pumping station.

The Public Utilities Board has an annual allocation of municipal priority water rights from the Texas Commission on Environmental Quality (TCEQ) in the amount of 31,442.381 acre-feet of water, which is dependent upon inflow to the Falcon and Amistad Reservoirs. In addition, the Public Utilities Board holds Permit No. 1838 entitling it the right to 40,000 acre-feet of surplus water.

The Public Utilities Board is subject to regulation of water quality by the TCEQ. The Public Utilities Board presently has a "Superior" water system as determined in accordance with current TCEQ regulations.

The Public Utilities Board's water utility service area is subject to the certification jurisdiction of the TCEQ. The Public Utilities Board has been certified singly to provide water service within the boundaries of the City. A large portion of the area, three and one-half miles surrounding the boundaries (the "extraterritorial jurisdiction") of the City, is dually certified. There is a small water utility system (El Jardin Water Supply Corporation) whose customers are situated adjacent to or within the System. All of its treated water is supplied by the Public Utilities Board's water system.

The **Wastewater System**, consisting of collection and treatment facilities, includes gravity wastewater collection lines, 173 pumping/lift stations and two treatment plants. Wastewater is transported by pumping stations and associated force mains to one of two wastewater treatment plants – the Robindale Plant or the South Plant. The Robindale Plant was designed to treat 5 MGD in 1980 and expanded to a capacity of 10 MGD in 1995. The Robindale renovation and expansion project completed in July 2014 increased the treatment capacity to 14.5 MGD. The Robindale Plant provides secondary waste treatment utilizing a Modified Ludzack-Ettinger (MLE) process (anoxic and aerobic with an internal nitrate cycle)

of activated sludge, turbo blowers (with magnetic bearings) with auto dissolved oxygen control, secondary settling, ultra-violet light system (as alternate source of disinfection), effluent cascade aeration system, sludge thickening, aerobic digestion, mechanical sludge dewatering (via 2-meter belt filter press), a SCADA (Supervisory Control and Data Acquisition) system, and sludge disposal at a Dedicated Land Disposal (DLD) site of 137 Acres. The South Plant was originally constructed in 1952, with a trickling filter process and anaerobic digestion plant design with a treatment capacity of 5 MGD. South Plant was modified in 1974 with major modifications in 1978 when it was expanded to a capacity of 7.8 MGD and the treatment process design was changed to a variation of activated sludge identified as complete-mix process and anaerobic digesters were converted to aerobic digesters. In 2000, the plant was expanded to 12.8 MGD. The treatment process was changed to reflect the complete mix activated sludge treatment process we have today. It consists of a dual channel mechanical bar screening system, two grit classifiers, compactor washer, a four aerated grit chamber system, three complete mix aeration basins, RAS and WAS pumping stations, four final clarifiers, chlorine contact chamber, chemical feed station with scrubber system, two effluent river pump stations for offsite force main for pumping treated effluent to the Rio Grande River, two gravity thickeners, four aerobic digesters with mechanical sludge dewatering process (via 2-meter belt filter press unit that was added in July of 2010) and sludge disposal at a Dedicated Land Disposal (DLD) site of 137 Acres.

The wastewater system is subject to regulation by the EPA and the TCEQ with regards to operations of the facilities and the water quality of the wastewater plants' effluent.

The Public Utilities Board has the authority to provide wastewater service both inside and outside the city limits. The Brownsville Navigation District owns and operates its own wastewater treatment facilities. There is no competition between the Public Utilities Board's wastewater system and the Brownsville Navigation District since the Brownsville Navigation District operates in defined areas in which the System has no wastewater lines.

#### **Mission Statement**

By 2018, the Public Utilities Board will be the foundation for our community's future by providing reliable infrastructure, competitive rates, and exceptional customer service.

#### Strategic Plan

In 2008, the Public Utilities Board launched the 2008-2013 Strategic Plan, which identified issues and strategies required to reach defined goals and to move the organization toward its Mission/Strategic Destination. For those five years, the Strategic Plan inspired stronger interdepartmental communication and cooperation, and increased employee involvement in the Public Utilities Board's planning culture.

During 2012-2013, the Public Utilities Board updated its Strategic Plan to identify the key issues that continue to influence the utility's efforts over a five year period of 2013-2018. The updated Strategic Plan was adopted by the Public Utilities Board on December 9, 2013.

The Public Utilities Board's Strategic Plan continues to promote strategies about the workforce, internal and external communications, and business processes that continue to be important areas in which to focus the utility's efforts. Issues identified in the updated strategic plan revolve around the Public Utilities Board's infrastructure and corporate culture. The issues identified in the 2013-2018 Strategic Plan support the Public Utilities Board's Mission Statement of being the foundation for our community's future by providing reliable infrastructure, competitive rates, and exceptional customer service.

The following table summarizes each of the Public Utilities Board's five priority issues, goals, and strategies as identified in the Strategic Plan for implementation.

	ISSUE	GOAL		STRATEGIES
1	We must address our growing infrastructure and business demands.	BPUB will have the necessary infrastructure to effectively provide reliable and exceptional service at competitive rates.	3.	Optimizing and integrating the use of technology increases efficiency.  Environmental stewardship enables the community to conserve resources.  Preventative maintenance programs improve quality and reliability.  A business plan builds the foundation for a successful natural gas utility system.  Adequate infrastructure provides reliable service, supports a growing community, and is in alignment with the Greater Brownsville Infrastructure Development Plan.
2	A skilled and knowledgeable workforce must be attracted, developed, and retained.	BPUB will become the employer of choice by offering competitive salaries, benefits, and career development plans for employees.	2. 3. 4.	Identifying and addressing employee needs retains a talented and skilled workforce.  A competitive compensation package supports employee recruitment and retention.  A competitive benefits package supports employee recruitment and retention.  A leading recruitment program attracts the most qualified workforce.  Effective HR systems increase the HR  Department's productivity in attracting, retaining, and developing the workforce.
3	We must challenge how we work to improve our processes.	Key processes meet and exceed process performance measures.	1. 2. 3. 4.	Creating an inventory of key processes builds the foundation for improved organizational performance.  Streamlining existing key processes improves efficiency and effectiveness.  Defining and documenting processes enhances organizational performance.  Implementing revised key processes enables consistency and increases work quality.
4	We must improve our communications.	BPUB will expand and enhance customer and stakeholder understanding of BPUB's value to the community.	1. 2.	Identifying our external audiences, methods, and messages will establish effective communications. Effective and open internal communications improves employee relations and morale.

		BPUB will communicate	3.	Making the most of every customer contact

	and maintained.	in their daily work routines.	2.	Engaging leadership leads to sustainable cultural
				change.
			3.	Integrating our core values within our business
				practices drives cultural change.

In 2014, Brownsville was named an All-America City by the National Civic League (NCL). The All-America City award recognizes "cities where citizen action has succeeded in making the community a better place to live." The city commission, city staff and collaborative partners, including the Public Utilities Board, successfully illustrated the premise of the U.S. Healthy Communities movement, with projects or initiatives aimed at addressing the underlying conditions that affect the health of communities. The Public Utilities Board's role included highlighting the annual Connect to Wellness fitness event and the future development of outdoor activity spaces as envisioned by community partners of the Public Utilities Board's Resaca Restoration Project.

In 2017, the Public Utilities Board was one of 43 of the nation's more than 2,000 public power utilities to earn the American Public Power Association's (APPA) highest designation, Diamond Reliable Public Power Provider (RP3®), for providing consumers with reliable and safe electric service. The RP3 designation recognizes public power utilities that demonstrate proficiency in four key disciplines: reliability, safety, workforce development and system improvement. Criteria within each category are based on sound business practices and represent a utility-wide commitment to safe and reliable delivery of electricity.

#### ECONOMIC CONDITIONS AND OUTLOOK

The City is the county seat of Cameron County. It is the southernmost city in Texas and the largest city in the Lower Rio Grande Valley. In Texas, Brownsville is second only to San Antonio in historical significance. Its location is attractive, since it is the closest to the major tourism and business travel attractions of the area: South Padre Island, Mexico, and the Gladys Porter Zoo, rated as one of the ten best zoos in the United States. Brownsville is also one of the top five cities in Texas as a destination location.

The City is located about 25 miles inland from the Gulf of Mexico on the north bank of the Rio Grande River directly across from Matamoros, Mexico, which it joins by three international bridges. The City serves as a trade center for much of the Lower Rio Grande Valley.

According to the U.S. Census Bureau, Brownsville's estimated population for 2017 was 185,349. The demographics of Brownsville's population can be summed up as young and fast growing. The median age is 30.7 years versus a national average of 37.7 years. About 32% of all persons in the City are younger than 18 years of age.

#### **Reporting Entity**

A basis for preparing the CAFR for the Public Utilities Board was the identification of the reporting entity. A component unit was considered to be part of the Public Utilities Board's reporting entity when it was concluded that the Public Utilities Board was financially accountable for the entity or the nature and significance of the relationship between the Public Utilities Board and the entity was such that exclusion would cause the Public Utilities Board's financial statements to be misleading or incomplete.

The reporting entity of the Public Utilities Board consists of the primary government and a blended component unit, Southmost Regional Water Authority. The Authority is a conservation and reclamation district created pursuant to Article XVI, Section 59, of the Texas Constitution and the Act of June 12, 1981, 67<sup>th</sup> Leg., Ch. 511, 1981 Tex. Gen. Laws 2196. The Authority provides treated water to various areas of Cameron County.

#### **Major Initiatives**

#### Farm to Market (FM) 511-802 Colonias Project

The Public Utilities Board and the Texas Water Development Board (TWDB) completed the design on the FM 511 and 802 Wastewater Improvement Project in December 2011. The project cost for the design portion was \$1.3 million and included TWDB funding of \$1.08 million and Public Utilities Board funding of \$291,000. The Public Utilities Board successfully submitted a grant application for the construction phase and was awarded on April 19, 2012 a grant of \$24,505,000 and a loan of \$840,000 from the Economically Distressed Areas Program (EDAP). TWDB performed an Environmental Review of the FM 511 and 802 Wastewater Improvement Project proposed by the Public Utilities Board, pursuant to environmental assessment requirements of Sections 363.14 and 363.13 of the TWDB Rules. The construction phase consists of: seven lift stations; upgrade three existing lift stations; 120,000 linear feet of 8, 10, 12 and 15-inch gravity sewer lines; 43,500 linear feet of 4, 6 and 8-inch force mains and 874 service connections. The project was substantially complete in December 2016. Through September 30, 2017 TWDB has funded \$23,525,433 of project costs while the Public Utilities Board has paid \$1,763,432 in project costs. The Public Utilities Board has secured \$3.7 million from the Border Environment Cooperative Commission/North American Development Bank (NADBank) for 465 service connections to the sewer lines of which 64 have been completed as of September 30, 2017. Estimated completion date of the remaining connections is July 2018.

#### Resaca Restoration Project

Resacas are former distributaries of the Rio Grande River. They now serve as urban waterways throughout the City of Brownsville. The central focus of the Resaca Restoration Project involves the removal of accumulated bottom sediments through dredging, which will increase both the depths and storage capacity of the resacas. It is anticipated that the depths of most resacas will be restored from less than two (2) feet in some areas up to eight (8) feet in others. Plans for dredging the resacas have been designed to improve water quality, promote erosion control and bank stabilization, while also improving habitat conditions for fish and other aquatic wildlife. During rainy seasons or hurricanes, the dredged resacas will provide better flood control by storing flood waters that otherwise could inundate adjacent developments.

The project scope was implemented in phases. Phase I included dredging several segments of the Town Resaca system. These segments included the City Cemetery resaca, Dean Porter Park resaca, the Gladys Porter Zoo resaca, and the Resaca Boulevard resaca. The Public Utilities Board began by undertaking planning studies and submitting proposed plans to the U.S. Army Corps of Engineers and the TCEQ. Phase I work began on March 2013. The dredged sediment handling process consists of a series of treatment components designed specifically to remove the solid material from the dredged slurry extracted from the resacas, leaving essentially clean water for discharge back into the resacas. Multiple separators remove and stockpile coarse debris and sand particles which are then hauled from the processing site to appropriate disposal areas. Dredging of the Phase I resacas was completed in September 2017.

The Public Utilities Board contributed \$11.38 million in equipment and other costs and O&M funding for staff, engineering and other services for the dredging of the Phase I resacas.

#### Odor Control Improvements for Various Lift Stations Phase I & II

As part of the improvements recommended in the Odor Control Master Plan for the Wastewater Treatment and Collection Systems, the Public Utilities Board is conducting odor control improvements to mitigate foul odors at various wastewater facilities. The improvements will help minimize detectable odors and improve air quality within the wastewater facilities. Improvements at the South Wastewater Treatment plant and eight lift stations have already been completed at a construction cost of \$4.72 million. Improvements at seven additional lift stations will be completed during calendar year 2018 at an estimated construction cost of \$2.55 million.

#### Proposed New Electric Generation Station

On January 28, 2013, the Public Utilities Board and Tenaska Power Services Co. ("Tenaska"), an independent energy company based in Omaha, Nebraska, announced that they had entered into a development and purchase agreement which entitles the Public Utilities Board to purchase an ownership interest in an 800 MW natural gas-fueled combined-cycle electric generating plant that Tenaska plans to build on 270 acres in the north Brownsville area. The agreement permits the Public Utilities Board to receive 200 MW of electricity from the plant, which is an amount sufficient to meet the needs of approximately 100,000 homes in Brownsville. The plant (which is generally referred to by parties as the Tenaska Brownsville Generating Station) will use water from the Public Utilities Board's Robindale Wastewater Treatment Plant. Under the agreement, the Public Utilities Board will be required to construct a water pipeline from the treatment plant to the electric plant (approximately five miles) and a gas

transmission pipeline to transport natural gas from the Edinburg area (approximately 50 miles). Construction of the plant, which is estimated to take 22 to 26 months to complete, is subject to Tenaska's receipt of all required permits and securing contracts with customers to purchase the remaining power from the plant. The Public Utilities Board expects that the City will need to issue approximately \$225,000,000 in principal amount of additional debt to finance its portion of costs related to the construction of the plant. No decisions have been made as to whether Tenaska will proceed with constructing the proposed Tenaska Brownsville Generating Station, but issuing approximately \$225,000,000 of additional obligations to finance the City's portion of the new facility would result in a significant increase in the Public Utilities Board's total outstanding indebtedness (i.e., approximately 77% over current outstanding debt).

#### New Public Utilities Board Service Yard

The Public Utilities Board is currently in the preconstruction phase of a new service yard to be located on FM 511 adjacent to the Southmost Regional Water Authority Water Treatment Plant. The new service yard will replace, consolidate and relocate thirteen existing facilities and the operations service center. It will provide a state of the art facility which will enhance employee performance and improve systems efficiency. This project is aligned with the Public Utilities Board Strategic Plan Issue 1 to address growing infrastructure and business demands.

#### Underground Electrical Line Upgrades

The Public Utilities Board completed the replacement of underground electrical lines in the Land O' Lakes area with service to over 800 customers. There were approximately 300 pit excavations and over 47,000 feet of cable installed. The project was completed in September 2016.

Upon completion of the Land O' Lakes project, work began on replacing approximately 180,000 feet of underground electrical lines in the Brownsville Country Club area which serves over 2,000 customers. The expected completion date of this project is December 2019.

#### Downtown Market Square Utility Improvements

As part of the City of Brownsville's Market Square Revitalization Project, the Public Utilities Board assisted with electric and wastewater utility improvements. The electric improvements included the conversion of overhead facilities to underground, the replacement of meters and the installation of new padmount transformers. The wastewater improvements included the replacement of clay gravity sewer lines and manholes. The total cost of these utility improvements was \$1.58 million. The project was completed in August 2017.

#### Brownsville Airport Electric Utility Improvements

As part of the City of Brownsville's New Airport Passenger Terminal Project, the Public Utilities Board has agreed to provide \$1.1 million dollars of in-kind funding for electric utility system improvements. The project will require the conversion of overhead utilities to underground. State law requires utility facilities located on public right-of-way and grounds to be relocated at the expense of the utility if necessary for authorized public improvements.

#### New Two Million Gallon Elevated Storage Tank to Replace the Southmost Elevated Storage Tank

The existing one-million gallon elevated storage tank on Southmost Road, constructed in 1969 is in poor structural condition and beyond its useful life. This tank is scheduled to be demolished during the first quarter of 2018. Additionally, the existing one-million gallon elevated water storage tank at UTRGV is approaching the end of its useful life and will need to be demolished soon. The Public Utilities Board will construct a new two-million gallon composite elevated storage tank to replace the two tanks and maintain adequate water system capacity, as well as pressure in the water distribution system for an estimated cost of \$3.6 million.

#### Light-Emitting Diode (LED) Streetlight Conversions

The Public Utilities Board, as part of a Street Lighting Consortium with the City of Brownsville, is analyzing and evaluating data for future conversions of street lights from high pressure sodium, metal halide and mercury vapor to an LED lamp type. This will be a multi-year project to strategically prioritize areas of the city to include in this improvement plan.

#### LONG-TERM FINANCIAL PLANNING

The Public Utilities Board's current electric, water, and wastewater capital improvement plan identifies projects for a five-year period ending September 30, 2022. The electric capital improvement plan identifies approximately \$102.2 million in generation, transmission, and distribution projects of which \$39.4 million are projected to be bond financed. The water capital improvement plan identifies approximately \$51.0 million in projects, of which approximately 72.20% are projected to be bond financed while the wastewater capital improvement plan identifies approximately \$60.1 million in projects, of which approximately 78.41% are projected to be bond financed.

#### CASH MANAGEMENT POLICIES AND PRACTICES

As required by the provisions of Chapter 2256 of the Texas Government Code, the Public Utilities Board updates its Investment Policy annually. A primary objective of the Public Utilities Board's Cash and Investment Program is the safety and preservation of the principal. The Investment Policy authorizes the Public Utilities Board to invest in treasury notes, agencies and instrumentalities, and other investments guaranteed by the U.S. Treasury or the State of Texas, or investments rated by a national rating company at "A" or better. The Investment Policy also authorizes investments in local government investment pools and in certificates of deposit issued by banks across the United States that are FDIC insured. Investments are made only with certified brokers/dealers as required by the Investment Policy.

During FY 2017, the Public Utilities Board's cash portfolio earned an average yield of 0.87%. The Public Utilities Board's cash deposits at September 30, 2017, were entirely covered by the Federal Deposit Insurance Corporation or were secured by collateral held by the Bank of New York Mellon in the Public Utilities Board's name, pursuant to the Public Utilities Board's Investment Policy and its Depository Agreement.

#### **AWARDS**

The Government Finance Officers Association (GFOA) of the United States and Canada awarded a Certificate of Achievement for Excellence in Financial Reporting to the Public Utilities Board for its comprehensive annual financial report for the fiscal year ended September 30, 2016. This was the eleventh consecutive year that the Public Utilities Board has achieved this prestigious award.

In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current Comprehensive Annual Financial Report continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

#### **ACKNOWLEDGEMENTS**

The preparation of the comprehensive annual financial report on a timely basis was made possible by the dedicated services of the entire staff of the Public Utilities Board's Finance Division. Each member of this division has our sincere appreciation for the contributions made in the preparation of this report.

We would also like to acknowledge the support of the Board for its continuing interest in the development of a strong financial system to serve the customers of the Public Utilities Board.

Respectfully submitted,

Leandro G. García, CPA Chief Financial Officer

Government Finance Officers Association

Certificate of Achievement for Excellence in Financial Reporting

#### INDEPENDENT AUDITORS' REPORT

To the Board of Directors
Public Utilities Board of the City of Brownsville, Texas

#### **Report on the Financial Statements**

We have audited the accompanying financial statements of the business-type activities of the Public Utilities Board of the City of Brownsville, Texas ("Public Utilities Board"), a component unit of the City of Brownsville, Texas, as of and for the year ended September 30, 2017 and 2016, and the related notes to the financial statements, which collectively comprise the Public Utilities Board's basic financial statements as listed in the table of contents.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### **Auditors' Responsibility**

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used

and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the business-type activities of the Public Utilities Board as of September 30, 2017 and 2016, and the respective changes in financial position, and cash flows thereof for the years then ended in accordance with accounting principles generally accepted in the United States of America.

#### **Other Matters**

#### Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages 7-15 and the schedule of changes in net pension liability and related ratios, schedule of contributions, and schedule of funding progress on pages 66-69 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of the financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the Public Utilities Board's basic financial statements. The introductory section and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

#### Other Reporting Required by Government Auditing Standards

In accordance with Government Auditing Standards, we have also issued our report dated March 12, 2018, on our consideration of the Public Utilities Board's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering Public Utilities Board's internal control over financial reporting and compliance.

#### MANAGEMENT'S DISCUSSION AND ANALYSIS

This section of the Public Utilities Board of the City of Brownsville, Texas' (Public Utilities Board) annual financial report presents management's analysis of its financial performance during the fiscal years that ended on September 30, 2017 and 2016. Please read it in conjunction with the financial statements that follow this section.

#### **Overview of Annual Financial Report**

The financial statements report information about the Public Utilities Board using full accrual accounting methods as utilized by similar business activities in the private sector. The financial statements include the statements of net position, the statements of revenues, expenses, and changes in net position, the statements of cash flows, and the notes to the financial statements.

The Statements of Net Position present the financial position of the Public Utilities Board on a full accrual, historical cost basis. The Statements of Net Position present information on all of the Public Utilities Board's assets and liabilities, with the difference reported as net position. Over time, increases and decreases in net position are one indicator of whether the financial position of the Public Utilities Board is improving or deteriorating.

While the Statements of Net Position provide information about the nature and amount of resources and obligations at year-end, the Statements of Revenues, Expenses, and Changes in Net Position present the results of the business activities over the course of the fiscal year and information as to how the net position changed during the year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of the related cash flows. This statement also provides certain information about the Public Utilities Board's recovery of its costs.

The Statements of Cash Flows present changes in cash and cash equivalents, resulting from operating, financing, and investing activities. These statements present cash receipts and cash disbursement information, without consideration of the earnings event, when an obligation arises, or depreciation of capital assets.

The notes to the financial statements provide required disclosures and other information that are essential to a full understanding of material data provided in the statements. The notes present information about the Public Utilities Board's accounting policies, significant account balances and activities, material risks, obligations, commitments, contingencies and subsequent events.

#### **Financial Analysis**

The following condensed financial information and other selected information serve as the key financial data and indicators for management monitoring and planning.

#### **Financial Condition**

One of the most important questions asked about the Public Utilities Board's finances is, "Is the Public Utilities Board, as a whole, better off or worse off as a result of the year's activities?" The Statement of Net Position and the Statement of Revenues, Expenses, and Changes in Net Position report information about the Public Utilities Board's activities in a way that will help answer this question. These two statements report the net position of the Public Utilities Board and changes in them. Increases or decreases in net position over time is a useful indicator of whether the Public Utilities Board's financial health is improving or deteriorating.

The Public Utilities Board's assets plus deferred outflows of resources exceeded liabilities and deferred inflows of resources by \$488.5 million at the close of fiscal year 2017. Total net position increased by \$5.3 million or 1.1% compared to the previous fiscal year. The steady increase in total net position of the Public Utilities Board is a good indicator of its overall financial health.

Net position in investment in capital assets totaled \$311.7 million and \$310.7 million for fiscal years 2017 and 2016, respectively. The restricted net position of \$149.4 million and \$143.7 million for fiscal years 2017 and 2016, respectively, is subject to external restrictions on how it may be used. The remaining balances of unrestricted net position, totaling \$27.4 million and \$28.8 million for fiscal years 2017 and 2016, respectively, may be used to meet the Public Utilities Board's ongoing obligations. The Public Utilities Board's changes in net position are further analyzed in Table A-1 and Table A-2.

The City Commission adopted a five-year rate proposal on December 17, 2012, that included increases sufficient to meet projected costs and debt coverage requirements. Rates were increased effective April 1, 2013, for the electric utility and subsequent rate increases have effective dates of October 1, 2013, October 1, 2014, October 1, 2015, and October 1, 2016.

While affordability is always a concern, the rate increases implemented will allow the Public Utilities Board to continue investing in core service areas including energy reliability, water quality, and wastewater treatment services.

#### **Net Position**

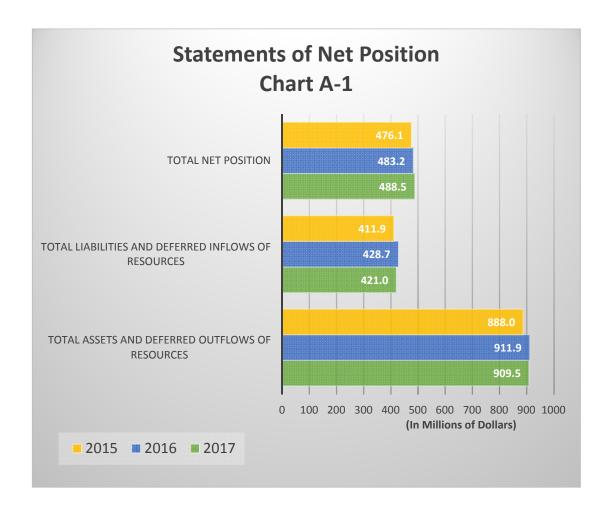

A summary of the Public Utilities Board's Statements of Net Position is presented in Table A-1.

TABLE A-1 STATEMENTS OF NET POSITION

September 30, 2017, 2016 and 2015 (in millions of dollars)

A graphic summary of the Public Utilities Board's Statements of Net Position is presented in Chart A-1 below.

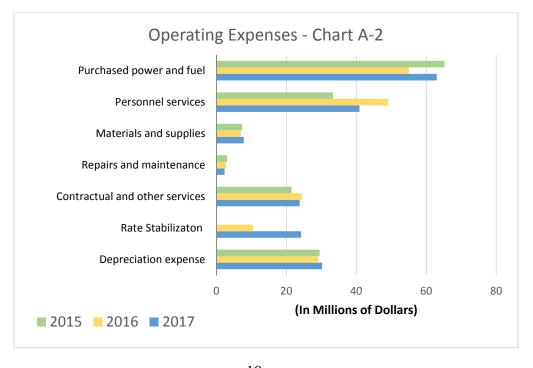

The Public Utilities Board's net position as of September 30, 2017, increased by \$5.3 million or 1.1% from FY 2016, and increased 1.5% to \$483.2 million as of September 30, 2016 from the previous year. The increases in 2017 and 2016 are attributed to income earned on operations of the utility system and to receipt of grant funds reported as capital contributions.

The following is a tabular summarization of the Statement of Revenues, Expenses, and Changes in Net Position followed by a graphic summary of operating expenses.

TABLE A-2 STATEMENTS OF REVENUES, EXPENSES AND CHANGES IN NET POSITION

For Fiscal Years Ended September 30, 2017, 2016 and 2015 (in millions of dollars)

		2017	2016		2015

Ending net position	\$	488.5 \$	483.2	\$	476.1

10

While the Statements of Net Position show the yearly change in financial position, the Statements of Revenues, Expenses, and Changes in Net Position provides answers as to the nature and source of these changes. For fiscal year 2017, the Public Utilities Board experienced an increase in operating revenues from prior year of \$13.5 million due in part to the final rate increase in utility system base revenue that was implemented on October 5, 2016. Investment earnings increased \$0.5 million from fiscal year 2016. Capital contributions increased slightly by \$.2 million from the prior year.

Some notable changes in expenses for 2017 were increases in purchased power and fuel expenses of \$7.2 million, and an increase in rate stabilization of \$13.7 million. Purchased power and fuel expenses can be attributed to increased consumer demand in kWh services from the previous year. For more detail on the rate stabilization, see Note 13 on page 62. Personnel services decreased by \$8.2 million. An increase in the Public Utilities Board's retirement plan matching ratio occurred in fiscal year 2016 with a required catch-up contribution. Personnel services decreased from the \$49.1 million observed in fiscal year 2016, which included the retirement plan change, to \$40.9 million in fiscal year 2017. Loss on disposition of capital assets increased from prior year by \$2.3 million. Overall, the Public Utilities Boards net position increased \$5.3 million in 2017.

In 2016, the Public Utilities Board had a decrease in operating revenues of \$0.2 million due to a combination of utility system revenue increases and decreases. Investment earnings increased \$0.4 million from fiscal year 2015. Non-operating revenue decreased \$1.1 million from prior year. Capital contributions decreased by \$6.5 million. Capital contributions may vary greatly from year to year based on grant awards and the cyclical nature of housing, commercial and industrial development in the City.

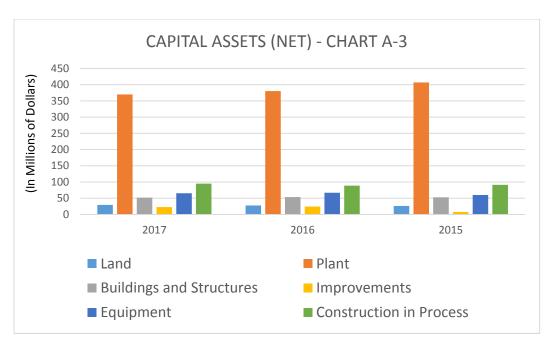

Some notable changes in expenses for 2016 were increases in personnel services of \$15.8 million, and a decrease in the loss on disposition of capital assets of \$2.6 million. The increase in personnel services can be attributed to an increase in pension expense and benefits. BPUB Board of Directors approved an increase in municipal matching ratio from 1.5-1 to 2-1 for employee retirement benefits. Overall, the Public Utilities Boards net position increased \$7.1 million in 2016.

#### **Capital Assets**

At the end of 2017 and 2016, the Public Utilities Board's net capital assets in Table A-3 of \$634.3 million and \$641.1 million, respectively. This represents a 1.1% or a \$6.8 million decrease, and a 0.6% or a \$3.8 million decrease, respectively, for fiscal year 2017 and 2016.

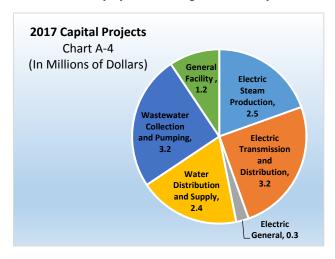

TABLE A-3
CAPITAL ASSETS
September 30, 2017, 2016 and 2015
(in millions of dollars)

	_	2017	_	2016	2015
Land	\$	29.5	\$	27.6 \$	26.1
Plant		751.4		746.3	737.8
Buildings and structures		92.2		92.4	89.9
Improvements other than buildings		48.5		48.6	45.9
Equipment		130.1		133.0	125.1
Construction in progress	_	95.0	_	88.7	91.3
Subtotal		1,146.7		1,136.6	1,116.1
Less accumulated depreciation	_	(512.4)	_	(495.5)	(471.2)
Net capital assets	\$_	634.3	\$	641.1 \$	644.9

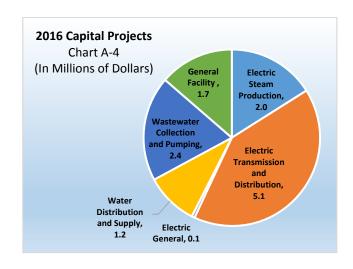

The following is a summary of some of the major improvements to the utility system during each fiscal year:

Project Category:	2017
Electric Steam Production	\$ 2.5
Electric Transmission and Distribution	3.2
Electric General	0.3
Water Distribution and Supply	2.4
Wastewater Collection and Pumping	3.2
General Facility	1.2
(Reported in millions of dollars)	

Project Category:	_	2016
Electric Steam Production	\$	2.0
Electric Transmission and Distribution		5.1
Electric General		0.1
Water Distribution and Supply		1.2
Wastewater Collection and Pumping		2.4
General Facility		1.7
(Reported in millions of dollars)		

At September 30, 2017 and 2016, the Public Utilities Board had contractual obligations totaling approximately \$14,466,083 and \$13,236,008, respectively, for utility plant expansion and improvements. Funding of these amounts will come from available revenues of the Public Utilities Board and restricted funds.

Additional information on the Public Utilities Board's capital assets can be found in Note 3 to the financial statements on pages 36-37 of this report.

#### **Debt Administration**

The Public Utilities Board's outstanding debt is summarized as follows:

#### TABLE A-4 OUTSTANDING DEBT

September 30, 2017, 2016 and 2015 (in millions of dollars)

	2017		2016		2015	
Revenue bonds, net	\$ 329.4	\$	345.6	\$	356.2	
Commercial Paper	 14.0		7.0			
Total	\$ 343.4	\$	352.6	\$	356.2	

Additional information on the Public Utilities Board's debt can be found in Notes 5 and 6 on pages 38-46 of this report.

The Public Utilities Board continues to have insured bond ratings from the national rating agencies. Standard & Poor's Ratings Services, a division of The McGraw-Hill Companies, Inc., has assigned short term insured ratings of A-1+, and Fitch Ratings has assigned short term insured ratings of F1+. The Public Utilities Board underlying ratings on its senior lien debt are "A2", "A+" and "A+" by Moody's, Standard & Poor's, and Fitch Ratings, respectively.

Revenue bonds outstanding at September 30, 2017 and 2016 were \$294,105,000 and \$308,804,000, respectively. Interest on bonds is due semi-annually on March 1 and September 1, and the principal is due annually on September 1. Revenue bond debt service coverage for the Public Utilities Board's priority and second lien obligations was calculated at 3.00 and 2.40 times at September 30, 2017 and 2016, respectively.

On January 15, 2003, the Public Utilities Board sold \$76,400,000 variable rate demand bonds as series 2002A and 2002B Utility System Subordinate Lien Revenue and Refunding Bonds. The bonds' variable rate was synthetically fixed at 2.576% until 2008 utilizing a swap financing strategy. The City Commission of the City of Brownsville, Texas, authorized the execution of a Rate Cap Agreement effective September 1, 2006, through September 1, 2011, to give an insurance against increasing short term rates. The Public Utilities Board executed an agreement with an eligible provider for a notional amount of \$41,880,000 with an interest rate cap of 4.50%. The notional amount of the original swap decreased to \$10,830,000 effective September 1, 2006, provided a synthetic fixed rate of 2.576%. Proceeds from the sale of the bonds were used to retire currently outstanding revenue bonds, to build, improve, extend, enlarge, and repair the system, and to pay costs of issuance of the bonds. On August 24, 2005, the Public Utilities Board sold \$163,725,000 in tax exempt bonds and \$56,855,000 in taxable bonds as part of a major debt restructuring. The tax exempt bonds, Series 2005A, provided proceeds to refund \$50,890,000 in Series 1995 outstanding obligations, \$50,000,000 in Series 2001A and \$50,000,000 in Series 2001B variable rate outstanding

obligations, and \$7,250,000 in outstanding commercial paper notes, and provided \$20,000,000 in new money bonds. The taxable bonds, Series 2005B, provided proceeds to defease \$27,420,000 in Series 1992 outstanding obligations and \$22,120,000 in Series 1995 outstanding obligations.

On December 1, 2006, the Public Utilities Board issued \$601,000 City of Brownsville, Texas Utilities System Junior Lien Revenue Bonds, Series 2007 for the purpose of building, improving, extending, enlarging, and repairing the City's utilities system and to pay costs of issuance of the bonds.

The Public Utilities Board issued \$77,805,000 in aggregate principal amount of Utilities System Revenue Refunding Bonds, Series 2008. The refunding bonds provided proceeds to defease \$40,000,000 of Commercial Paper Notes, Series 2004, \$32,285,000 of the Series 2002A Utility System Subordinate Lien Revenue and Refunding Bonds, and \$13,415,000 of the Series 2002B Utility System Subordinate Lien Revenue and Refunding Bonds.

On February 28, 2011, the Public Utilities Board issued \$12,305,000 in Utilities System Revenue Refunding Bonds, Series 2011. The refunding bonds provided proceeds to refund \$6,270,000 of Junior Lien Exchange Revenue Refunding Bonds, Series 2005A and \$5,980,000 of Junior Lien Exchange Revenue Refunding Bonds, Series 2005B.

On September 25, 2012, the Public Utilities Board issued \$20,690,000 in Utility System Revenue Refunding Bonds, Series 2012. The refunding bonds had a closing date of October 18, 2012, and the proceeds plus \$5,275,000 in issuer contributions were used to defease \$24,450,000 of Commercial Paper notes.

On October 1, 2012, the Public Utilities Board issued \$840,000 in Utility System Junior Lien Revenue Bonds, Series 2012. Proceeds from sale of the Obligations will be used for the purpose of funding construction improvements to the wastewater system on the FM 511 – 802 Colonia Project.

On May 1, 2013, the Public Utilities Board issued \$118,185,000 in Utilities System Revenue Refunding Bonds, Series 2013. The refunding bonds provided proceeds to refund \$109,985,000 of Utility System Improvement and Refunding Bonds, Series 2005A. In addition, the proceeds provided funds of \$11,818,500 to make a cash deposit into the Debt Service Reserve Fund.

On July 15, 2015, the Public Utilities Board issued \$94,770,000 in Utilities System Revenue Refunding Bonds, Series 2015. The bonds provided proceeds to refund \$49,060,000 of Series 2005A Revenue Improvement & Refunding Bonds, \$27,815,000 of Series 2005B Revenue Refunding Bonds and \$5,480,000 of Series 2011 Revenue Refunding Bonds. In addition, the proceeds provided funds to defease \$20,000,000 in outstanding Commercial Paper Notes.

On May 15, 2016, the Public Utilities Board issued \$39,410,000 in Utilities System Revenue Refunding Bonds, Series 2016. The bonds, plus a premium of \$7,705,681, provided proceeds to refund \$42,505,000 of the Series 2008 Revenue Refunding Bonds.

The Public Utilities Board's participation in the Southmost Regional Water Authority's (the Authority) desalination plant project was complete and operational during 2005. The Authority successfully issued \$30,975,000 in Water Supply Contract Revenue Bonds during fiscal year 2003 and has expended approximately 100.0% of bond proceeds in the construction of the desalination plant. The Series 2002 bonds were issued with insured ratings of "Aaa" and "AAA" by Moody's Investor Services and Fitch Ratings, respectively. The underlying ratings on the bonds are "A2" and "A" by Moody's and Fitch, respectively. The Public Utilities Board total interest in the project is 92.91%. The Authority is considered a blended component unit of the Public Utilities Board. As a participating owner, the Public Utilities Board is obligated to contribute its percentage allocation of the Authority's debt service obligations and annual system budget. The Public Utilities Board's total 2017 and 2016 contributions to the Authority were \$6,170,629 and \$6,155,725, respectively. The Public Utilities Board's participation in the Authority's desalination project provides the City with an alternate, long-term, drought-resistant source of drinking water.

The Authority issued \$9,950,000 in aggregate principal amount of Water Supply Contract Revenue Refunding Bonds, Series 2006. The refunding bonds provided proceeds to defease \$9,360,000 of the Series 2002 Revenue Bonds for the years 2019 and from 2028 through 2032.

On December 7, 2009, the Authority issued \$9,295,000 in Water Supply Contract Revenue Bonds, Series 2009A and \$3,795,000 in Water Supply Contract Revenue Bonds, Series 2009B through the Texas Water Development Board Drinking Water State Revolving Fund for the construction of a full scale Micro Filtration Pretreatment System. The objective of this project is to achieve compliance with both existing and future maximum contaminant levels for arsenic in public drinking water by constructing a full scale Micro Filtration Pretreatment System prior to entering the existing reverse osmosis treatment process. An additional need is to control and reduce iron levels to eliminate complaints of colored water. Project objectives also include an additional 1.0 million gallons per day of capacity through upgrading certain pumps within the existing well field and adding one additional reverse osmosis train.

On September 26, 2012, the Southmost Regional Water Authority issued \$13,530,000 in Water Supply Contract Revenue Refunding Bonds, Series 2012. The refunding bonds had a closing date of October 18, 2012, and the proceeds plus the bond premium were used to defease \$14,990,000 of the Series 2002 Revenue Bonds for the years 2013 through 2027.

On April 18, 2017, the Authority issued \$9,255,000 in Water Supply Contract Revenue Refunding Bonds, Series 2017. The refunding bond proceeds plus the bond premium of \$725,245 were used to defease \$9,715,000 of the Series 2006 Water Supply Contract Revenue Refunding Bonds for the years 2019 through 2032.

#### **Request For Information**

This financial report is designed to provide the reader with a general overview of the Public Utilities Board's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Chief Financial Officer, P.O. Box 3270, Brownsville, TX 78523-3270. This report is available on the Public Utilities Board's website – www.brownsville-pub.com.

Notes to the Financial Statements September 30, 2017 and 2016

#### (1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies employed in the preparation of these financial statements.

#### (a) The Reporting Entity

The Public Utilities Board of the City of Brownsville, Texas (Public Utilities Board), a component unit of the City of Brownsville, Texas (City), was formed in 1960 to provide electric, water, and wastewater services to its customers in the Brownsville area. The financial statements of the Public Utilities Board have been prepared in conformity with accounting principles generally accepted in the United States of America as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles.

The Public Utilities Board is a component unit of the City of Brownsville, Texas, based upon the selection of the governing authority. It is a separate operating authority established by the City's charter. Its purpose is to own, operate, and maintain a combined utilities system which provides the City and certain adjacent unincorporated areas with electricity, water, and wastewater services. The specific elements of oversight responsibility of the Public Utilities Board is that the City Commission appoints six of the seven-member governing board and the Mayor of the City serves Ex-Officio as the seventh member. Each appointed board member serves a four-year term. The Public Utilities Board does not have the right to encumber, sell, or hypothecate the utilities system. The specific elements of accountability for fiscal matters are (1) the City Commission is vested with the right to set utility rates and approve the issuance of debt and (2) the City has the right to share in the surplus, if any, of the Public Utilities Board. Further, the Public Utilities Board is not required to pay any property taxes or franchise taxes to the City, and the City is not required to pay for the utility services furnished to the City by the Public Utilities Board. The financial statements presented here are also included in the Comprehensive Annual Financial Report of the City of Brownsville, Texas.

The reporting entity of the Public Utilities Board consists of the primary government (in this case, the Public Utilities Board) and a blended component unit, Southmost Regional Water Authority (the Authority). The Authority is a conservation and reclamation district created pursuant to Article XVI, Section 59, of the Texas Constitution and the Act of June 12, 1981, 67<sup>th</sup> Leg., Ch. 511, 1981 Tex. Gen. Laws 2196. The Authority is reported as a blended component unit because the Public Utilities Board manages the day-to-day operations and owns 92.91% of the Authority entitling it to 92.91% of the total water allocation.

The Authority provides treated water to various areas of Cameron County. Essential disclosures related to the Authority are included in its complete financial statements. These statements may be obtained at P.O. Box 3270, Brownsville, Texas 78523-3270.

#### (b) Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The financial statements are presented in accordance with accounting standards generally accepted in the United States of America for proprietary funds of governmental entities. The Public Utilities Board complies with all applicable pronouncements of the GASB. The Public Utilities Board is

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

#### (b) Measurement Focus, Basis of Accounting, and Financial Statement Presentation – Continued

accounted for as a proprietary fund. Proprietary funds are used to account for operations that are financed and operated in a manner similar to private business enterprises where the intent is to recover the cost of operations through user charges. A proprietary fund is accounted for on the "economic resources" measurement focus using the accrual basis of accounting, under which revenues are recognized in the accounting period in which they are earned and the related expenses are recorded in the accounting period incurred, if measurable. All assets and liabilities are included on the statement of net position.

## (c) Current Year GASB Statement Implementations

In fiscal year 2017, the Public Utilities Board implemented the following GASB statements:

GASB Statement No. 77, *Tax Abatement Disclosures*, provides financial disclosure requirements for governments that enter into tax abatement agreements. This Statement indicates how disclosures for tax abatements should be organized and what descriptive information should be presented. As the Public Utilities Board is not a tax-levying government and is not party to tax abatement agreements, there was no impact on financial reporting.

GASB Statement No. 78, *Pensions Provided through Certain Multiple-Employer Defined Benefit Pension Plans*, clarifies requirements for the application of GASB Statement No. 68 for certain governments whose employees receive pension benefits through a cost-sharing multiple-employer plan. As the Public Utilities Board does not sponsor benefits through the type of plan addressed by the Statement, the guidance is not applicable and has no impact on financial reporting.

GASB Statement No. 80, Blending Requirements for Certain Component Units – an amendment of GASB Statement No. 14, provides additional criterion for blending of a component unit incorporated as a not-for-profit corporation in which the primary government is the sole corporate member. As the component unit of the Public Utilities Board is not incorporated as a not-for-profit, there was no impact to the financial statements upon implementation of the Statement.

GASB Statement No. 82, Pension Issues – an amendment of GASB Statements No. 67, No. 68, and No. 73, addresses issues regarding the presentation of payroll-related measures in required supplementary information, the selection of assumptions and treatment of deviations from the guidance in an Actuarial Standard of Practice for financial reporting purposes, and the classification of payments made by employers to satisfy employee contribution requirements. This statement did not have a significant impact on financial reporting.

In fiscal year 2016, the Public Utilities Board implemented the following GASB statements:

GASB Statement No. 72, Fair Value Measurement and Application, addressed accounting and financial reporting issues related to fair value measurements. This Statement provided guidance for determining a fair value measurement for financial reporting purposes. This Statement also provided guidance for applying fair value to certain investments and disclosures related to all fair value measurements. New footnotes were added upon implementation of this Statement.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

#### (c) Current Year GASB Statement Implementations - Continued

GASB Statement No. 73, Accounting and Financial Reporting for Pensions and Related Assets That Are Not Within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68, provided guidance for defined benefit pensions that are not within the scope of Statement No. 68, and for the assets accumulated for purposes of providing those pensions. There was no impact to the financial statements upon implementation of this Statement.

GASB Statement No. 76, *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments*, reduced the GAAP hierarchy to two categories of authoritative GAAP and addressed the use of authoritative and non-authoritative literature in the event that the accounting treatment for a transaction or other event is not specified within a source of authoritative GAAP. There was no significant impact to the financial statements upon implementation of this Statement.

GASB Statement No. 79, Certain External Investment Pools and Pool Participants, addressed how certain investment pool transactions are reported in response to anticipated changes in a U.S. SEC rule that was previously included in GASB literature. There was no significant impact to the financial statements upon implementation of this Statement.

#### (d) Operating Revenues and Expenses

Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with the Public Utilities Board's principal ongoing operations. The principal operating revenues of the Public Utilities Board is charges to customers for sales and services. Operating expenses include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

Operating revenue consists of cash receipts from quasi-external transactions with the City and other governments, and other cash receipts that do not result from transactions defined as capital and related financing, non-capital financing, or investment activities.

The Public Utilities Board did not use any revenue received from fees collected from a water supply or sewer service constructed in whole or in part from funds from the economically distressed areas program account for purposes other than utility purposes.

#### (e) Utility Service Revenue and Electric Purchased Power Expense

Electric, water, and wastewater revenues are recognized as billed on a cycle basis with recognition of unbilled revenues at September 30, 2017 and 2016, based upon the meter reading dates for the unbilled portion of each cycle. Electric rate schedules include power cost adjustment clauses that permit recovery of purchased power costs, not included in base rates, and in the month after such costs are incurred. The Public Utilities Board charges to expense the cost of purchased power in the period of purchase.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

## (f) Capital Assets

Utility plant-in-service is stated at cost which generally includes the cost of contracted services and certain materials and labor. Maintenance and repairs of property and items determined to be less than units of property are charged to operating and maintenance expenses; major plant replacements are capitalized. Assets acquired through contributions, such as those from land developers, are capitalized at estimated fair value at the date contributed. Capital assets are defined by the Public Utilities Board as assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of eighteen months. Meter and line transformer inventory have been included in utility plant to conform to Federal Energy Regulatory Commission guidelines.

Donated capital assets, donated works of art and similar items, and capital assets received in a service concession arrangement are reported at acquisition value rather than fair value.

Depreciation is computed using the straight-line method over the estimated useful lives of the assets. The following estimated useful lives are used for depreciation purposes in 2017 and 2016:

Classification	Range of lives
Electric, Water & Wastewater plant-in-service	30 to 50 years
Buildings	30 to 50 years
Improvements other than buildings	25 to 50 years
Equipment	10 to 50 years
Vehicles	3 to 5 years

#### (g) Investments

The Public Utilities Board invests funds in accordance with its policy, bond indentures, and the Texas Public Funds Investment Act. Investments consist primarily of United States Treasury obligations and government-backed securities. Statutes authorize the Public Utilities Board to invest in obligations of the United States or its agencies and instrumentalities; direct obligations of the State of Texas or its agencies; obligations of states, agencies, counties, cities and other political subdivisions of any state rated not less than A or its equivalent; certificates of deposit; certain commercial paper; certain mutual funds; and fully collateralized repurchase agreements.

The Public Utilities Board follows the provisions of GASB Statement No. 31, Accounting and Financial Reporting for Certain Investments and for External Investment Pools. In accordance with GASB Statement No. 31, the Public Utilities Board's general policy is to report short-term investments at amortized cost. All other investments are reported at fair value. The term "short-term" refers to investments that have a remaining term to maturity of one year or less at time of purchase. Fair value determinations of all securities are made on a quarterly basis.

#### (h) Inventories

Materials and supplies inventories are stated at cost. Fuel and coal inventories are valued at cost using the last-in first-out method.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

#### (i) Compensated Absences

The Public Utilities Board's annual vacation and sick leave policies allow employees to accumulate and vest in annual vacation and sick leave benefits up to specified limits. Upon termination, employees are paid for any unused vacation and sick leave with certain options available. The Public Utilities Board records its obligations for these unused benefits as they are earned by the employees.

#### (j) Regulatory Basis Assets

The Public Utilities Board elected to establish a regulatory asset for the debt issuance costs in accordance with regulated operations under GASB Statement No. 62. The debt issuance costs would otherwise have been expensed upon implementation of GASB Statement No. 65.

#### (k) Cash Equivalents

For purpose of the Statements of Cash Flows, the Public Utilities Board considers money market accounts, certificates of deposit, and investments with original maturities of three months or less from the date of acquisition to be cash equivalents.

#### (l) Budgets and Budgetary Accounting

The Public Utilities Board is not legally required to adopt a budget; therefore, comparative statements of actual expenses to budget expenses are not included within the financial statements.

#### (m) Deferred Inflows of Resources

GASB Concept Statement No. 4, *Communication Methods in General Purpose External Financial Reports That Contain Basic Financial Statements*, provided definitions for elements in the financial statements. Deferred inflows of resources are the acquisition of net assets applicable to a future reporting period. GASB Statement No. 63 establishes guidance for reporting this element on the statement of net position, and GASB Statement No. 65 establishes accounting and financial reporting standards that reclassify, as deferred inflows of resources, certain items that were previously reported as liabilities. Deferred inflows of resources related to recoverable fuel costs totaled \$0.3 million at September 30, 2016. Pursuant to GASB Statement No. 68 accounting methodologies adopted beginning in fiscal year 2015, recognition of deferred inflows of resources related to pension amounted to \$1.7 million as of September 30, 2017, and \$2.4 million as of September 30, 2016.

## (n) Deferred Outflows of Resources

Deferred outflows of resources are the consumption of net assets applicable to a future reporting period, as defined in GASB Concept Statement No. 4. GASB Statement No. 63 establishes guidance for reporting this element on the statement of net position and GASB Statement No. 65 establishes accounting and financial reporting standards that reclassify, as deferred outflows of resources, certain items that were previously reported as assets.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

#### (n) Deferred Outflows of Resources - Continued

For current and advance refunding of debt, the difference between the reacquisition price and the net carrying amount of the old debt is recorded as unamortized reacquisition costs and reported as deferred outflows of resources. These amounts are amortized as components of interest expense over the shorter of the remaining life of the refunding or the refunded debt. At September 30, 2017, and September 30, 2016, reacquisition costs totaled \$19.9 million and \$21.0 million, respectively. Pursuant to GASB Statement No. 68 accounting methodologies adopted beginning in fiscal year 2015, recognition of deferred outflows of resources related to pension amounted to \$9.4 million as of September 30, 2017, and \$11.0 million as of September 30, 2016. Deferred outflows of resources related to recoverable fuel costs totaled \$0.4 million at September 30, 2017.

#### (o) Contingent Liabilities

The Public Utilities Board provides for contingent liabilities when it is probable a liability has been incurred and the amount of loss can be reasonably estimated.

#### (p) Recoverable Fuel Costs

Recoverable fuel costs represent fuel costs incurred by the Public Utilities Board which have not yet been billed to customers or which have been billed to customers based on estimated fuel costs and has not been incurred. The Public Utilities Board recovers these costs via the fuel adjustment charge assessed with the monthly utility bills. At September 30, 2017 and 2016, the Public Utilities Board had under collected \$364,158 and over collected \$303,078, respectively, in current recoverable fuel costs. These monies are considered either a liability or receivable as the amounts deferred are expected to be offset by October fuel charges.

#### (q) Grant Revenue

Revenue from state and federal grants is recognized as earned to the extent of incurred program expenses. Grant funds are considered to be earned when all eligibility requirements have been met. Accordingly, when such funds are received in advance, they are recorded as unearned revenue.

#### (r) Restricted Net Position

Net position is restricted for the following purposes at September 30, 2017 and 2016:

_	2017	_	2016
\$	3,544,986	\$	3,576,530
	121,093,500		110,290,480

The above restricted net position is all subject to restrictions externally imposed by creditors through bond covenants.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – Continued

#### (r) Restricted Net Position - Continued

In accordance with bond covenants related to the funds and accounts and flow of funds, the Public Utilities Board is required to retain in the Plant Fund a reserve amount to pay operating and maintenance expenses of not less than two months of budgeted operating and maintenance expenses for the current fiscal year.

#### (s) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

#### (t) Comparative Data/Reclassifications

Comparative total data for the prior year have been presented in the accompanying financial statements in order to provide an understanding of changes in the Public Utilities Board's financial position and operations. Also, certain amounts presented in the prior year data have been reclassified in order to be consistent with the current year's presentation.

## (u) Deferred Compensation Plan

The Public Utilities Board offers a deferred compensation plan created in accordance with Internal Revenue Code Section 457. The plan, available to all Public Utilities Board employees, permits them to defer a portion of their salary until future years. The deferred compensation is not available to employees until termination, retirement, death, or unforeseeable emergency.

Amendments to the laws governing Section 457 deferred compensation plans substantially became effective January 1, 1997. The Public Utilities Board approved plan amendments such that plan assets are held in trust, with Nationwide Retirement Solutions, Inc. as trustee, for the exclusive benefit of the plan participants and their beneficiaries. The assets cannot be diverted to any other purpose. The Public Utilities Board does not have legal access to the resources of the deferred compensation plan; as such the plan is not reported in the Public Utilities Board's financial statements.

#### (v) Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the Fiduciary Net Position of the Texas Municipal Retirement System (TMRS) and additions to/deductions from TMRS's Fiduciary Net Position have been determined on the same basis as they are reported by TMRS. For this purpose, plan contributions are recognized in the period that compensation is reported for the employee, which is when contributions are legally due. Benefit payments and refunds are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (2) DEPOSITS AND INVESTMENTS

#### (a) Basis of Investments

On October 10, 2016, the Public Utilities Board approved a revised Investment Policy which included an "Investment Strategy Statement" that addressed the understanding of investment suitability, the preservation and safety of principal, liquidity, marketability of the investment prior to maturity, diversification, and yield of the investment portfolio. In regards to the safety and risk of investments, the Public Utilities Board abided by the Investment Policy that requires all available funds to be invested in conformance with state and federal regulations, applicable bond ordinance requirements, and GASB's standards. Each investment transaction shall seek to first and foremost ensure that capital losses are avoided, whether they are from securities' defaults or erosion of fair value.

The Public Utilities Board's bank deposits and Certificates of Deposit investments were entirely covered by the Federal Deposit Insurance Corporation or by collateral held by a third-party safekeeping bank in the Public Utilities Board's name.

The carrying value of deposits with financial institutions approximates fair value. As of September 30, 2017 and 2016, the Public Utilities Board had the following investments:

	September 30, 2017						
			Weighted Avg				
	Maturity						
Investment Type		Amount	(Days)	Allocation	Rating

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (2) DEPOSITS AND INVESTMENTS - Continued

#### (a) Basis of Investments - Continued

Interest rate risk – In accordance with the Public Utilities Board's Investment Policy the weighted average to maturity for the Public Utilities Board's portfolio limits the maximum allowable maturity to two years by not exceeding the anticipated cash flow requirements. As of September 30, 2017 and 2016, the investment portfolio had maturities that met anticipated cash flow requirements.

The Public Utilities Board's invests in TexPool, TexasDAILY, and TexStar to provide its liquidity needs. These pools are structured somewhat like money market mutual funds and allow shareholders the ability to deposit or withdraw funds on a daily basis. These pools are rated AAAm and must maintain a dollar weighted average maturity not to exceed a 60-day limit. At September 30, 2017, TexPool, TexasDAILY, and TexStar had a weighted average maturity of 34 days, 36 days, and 28 days, respectively. The Public Utilities Board invests in government investment pools with 100% overnight liquidity.

Credit risk – The Public Utilities Board identifies and manages credit risks by following the Investment Policy. The Public Utilities Board implements its investment strategy, establishes and monitors compliance with investment policies and procedures, and consistently monitors prudent risk controls. The Public Utilities Board will seek to control the risk of loss by monitoring the ratings of portfolio positions to assure compliance with the rating requirements imposed by the Public Funds Investment Act. The Public Utilities Board also manages exposure to credit risk by limiting its investments to a rating of "A" or better. As of September 30, 2017 and 2016, the Public Utilities Board's security agencies investments had a rating of AA+ or above.

Custodial credit risk – In accordance with the Public Utilities Board's Investment Policy, the financial institution must collateralize all funds with a minimum of 102% of the fair value of the principal portion. The Public Utilities Board seeks to control the risk of loss due to the failure of a security issuer or grantor. Such risk shall be controlled by investing only in the safest types of securities as defined in the Investment Policy.

The Public Utilities Board signed an agreement with its financial institution pledging funds to 102% minimum of the fair value of the principal position. As of September 30, 2017 and 2016, the Public Utilities Board invested 18.3% and 13.67%, respectively, in U.S. Agencies (Federal Home Loan Bank, Federal National Mortgage Association, Federal Home Loan Mortgage Corporation), which hold high ratings by nationally recognized statistical rating organizations. Investments in U.S. Agencies are proven to be the safest investments with minimal risk of loss. All investments are insured, registered, or held by an agent in the Public Utilities Board's name; therefore, the Public Utilities Board is not exposed to custodial credit risk.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (2) DEPOSITS AND INVESTMENTS - Continued

#### (a) Basis of Investments – Continued

Concentration of credit risk – In accordance with the Investment Policy, the Public Utilities Board manages its credit risk exposure through diversification, and limiting its investments in each government-sponsored security to 75%. As of September 30, 2017 and 2016, the portfolio was in compliance as noted above.

TexPool – The State of Texas Comptroller of Public Accounts exercises oversight responsibility over TexPool, the Texas Local Government Investment Pool, along with Federated Investors managing the daily operations of the pool under a contract with the State Comptroller. Oversight includes the ability to significantly influence operations, designation of management and accountability for fiscal matters. Additionally, the State Comptroller has established an advisory board composed both of participants in TexPool and of other persons who do not have a business relationship with TexPool. The advisory board members review the investment policy and approves any fee increases. Finally, TexPool is rated AAAm by Standard & Poor's.

As a requirement to maintain the rating weekly portfolio, information must be submitted to Standard & Poor's as well as the office of the Comptroller of Public Accounts for review. TexPool operates in a manner consistent with the SEC's Rule 2a-7 of the Investment Company Act of 1940. As such, TexPool uses amortized cost to report net assets and share prices since that amount approximates fair value.

TexSTAR – Texas Short Term Asset Reserve Program (TexSTAR) is a local government investment pool providing short-term liquidity requirements. JPMorgan Fleming Asset Management, Inc. and First Southwest Asset Management, Inc. serve as co-administrators under an agreement with the TexSTAR Board of Directors to provide investment and participant services for this pool. JPMorgan Chase Bank or its subsidiary J.P. Morgan Investor Services Company provides the custodial, transfer agency, fund accounting, and depository services for this pool. At year end, TexSTAR was rated AAAm by Standard & Poor's. The Public Utilities Board reports its investment in TexSTAR at the fair value amount provided by TexSTAR, which is the same as the value of the pool share.

TexasTERM/TexasDaily – TexasTERM/TexasDaily is a local government investment pool. Administrative and investment services to the pool are provided by PFM Asset Management LLC, under an agreement with the TexasTERM Advisory Board and act on behalf of the pool participants. At year end, TexasTERM was rated AAAm by Standard & Poor's. The Public Utilities Board reports its investment in TexasTERM at the fair value amount provided by TexasTERM, which is the same as the value of the pool share.

Fair Value measurement – The Public Utilities Board records assets and liabilities in accordance with GASB Statement No. 72, *Fair Value Measurement and Application*, which determines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurement. The Public Utilities Board's fair value measurements are performed on a recurring basis.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (2) DEPOSITS AND INVESTMENTS - Continued

#### (a) Basis of Investments – Continued

As a basis for considering market participant assumptions in fair value measurements, Statement No. 72 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels:

- Level 1 inputs are quoted prices (unadjusted) for identical assets or liabilities in active markets that a government can access at the measurement date. Equity securities and U.S. Government Treasury securities are examples of Level 1 inputs.
- Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Government agency and mortgage-backed securities and certificates of deposit are examples of Level 2 inputs.
- Level 3 inputs are unobservable inputs that reflect the Authority's own assumptions about factors that market participants would use in pricing the asset or liability (including assumptions about risk).

The valuation technique the Public Utilities Board uses to measure fair value is the market approach. This approach uses prices and other relevant information generated by market transactions involving identical or comparable assets, liabilities, or a group of assets and liabilities, and is applied consistently.

The following table presents fair value balances and their levels within the fair value hierarchy as of September 30, 2017 and 2016. Investment balances presented exclude amounts related to money market mutual fund investments and 2a7-like external investment pools accounted for using amortized cost.

#### (4) JOINT OPERATIONS

## (a) Oklaunion Project

In May 1986, the Public Utilities Board and Central Power & Light (CP&L), now known as AEP Texas Central Company (TCC), executed the Oklaunion Unit No. 1 Ownership Interest Assignment Agreement (Agreement). This Agreement allowed the Public Utilities Board to purchase an undivided 56.54% of TCC's undivided 17.97% ownership interest in the Oklaunion unit (10.16% of the project as a whole). This Agreement committed the Public Utilities Board to become a 10.16% participant in the Oklaunion unit and obligated the Public Utilities Board to contribute its 10.16% share of the Oklaunion unit's operating expenses. As a result of their participation, the Public Utilities Board is entitled to receive 10.16% of the total power generated by the plant.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### 4) JOINT OPERATIONS - Continued

#### (a) Oklaunion Project - Continued

On February 5, 2004, TCC notified the Public Utilities Board that it had auctioned off and sold its ownership interest in Oklaunion Unit No. 1 to Golden Spread Electric Cooperative, Inc. for \$42,750,000, subject to the exercise by the Public Utilities Board refusal to purchase TCC's ownership interest under the Oklaunion Unit No. 1 Construction, Ownership and Operating Agreement dated May 26, 1985. Both the Public Utilities Board and OMPA exercised their rights of first refusal for the entire TCC interest in May 2004 and each deposited in escrow \$42,750,000, respectively. The Public Utilities Board funded its obligation through the sale of Commercial Paper Notes. In May 2006, the Dallas Court of Appeals issued an opinion upholding City of Brownsville's right to acquire an additional interest in Oklaunion Unit No 1.

Golden Spread Electric Cooperative had challenged the City of Brownsville's right to acquire the interest being sold by American Electric Power – Texas Central Company. Golden Spread Electric asked the Texas Supreme Court to overturn the Dallas Court of Appeals' ruling and allow it to buy Texas Central Company's interest instead of the City of Brownsville.

On December 15, 2006, the Texas Supreme Court declined to review a ruling by the Dallas Court of Appeals in favor of the City of Brownsville and the Public Utilities Board. Subsequently on February 14, 2007, the Public Utilities Board completed its purchase of the additional 54 megawatts (7.8%) of the Oklaunion Power System for \$51 million.

#### (b) Calpine/Hidalgo Project

On December 15, 1999, the Public Utilities Board purchased an undivided interest from Calpine Energy which entitles the Public Utilities Board to 105 MW of the 500 MW combined cycle plant located in Edinburg, Texas, approximately 56 miles from Brownsville, Texas. The unit consists of two gas turbines, a heat recovery steam generator and steam turbine.

#### (5) SHORT-TERM DEBT

## (a) Commercial Paper

Commercial paper balances and activity as of and for the year ended September 30, are as follows:

	 2017	 2016
Beginning Balance	\$ 7,000,000	\$ -
Additions	7,000,000	7,000,000
Deletions		 -
Ending Balance	\$ 14,000,000	\$ 7,000,000

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (5) SHORT-TERM DEBT – Continued

#### (a) Commercial Paper - Continued

The Public Utilities Board issued \$7,000,000 of Commercial Paper during fiscal year 2017 and \$7,000,000 of Commercial Paper during fiscal year 2016.

On September 25, 2012, the Public Utilities Board issued \$20,690,000 in Utility System Revenue Refunding Bonds, Series 2012. The refunding bonds had a closing date of October 18, 2012, and the proceeds plus \$5,275,000 in issuer contributions were used to defease \$24,450,000 of Commercial Paper Notes.

On April 20, 2004, the City Commission of the City of Brownsville, Texas, approved and authorized the issuance of short term obligations in an aggregate principal amount not to exceed \$50,000,000. A total of \$44,500,000 was issued in fiscal year 2004. The purpose of the Commercial Paper Program is to pay for additions, improvements, and extensions to the City's combined electric system, waterworks system and sewer system. The Commercial Paper was used to purchase an additional ownership interest in Oklaunion, an electric generating plant. The Reimbursement and Credit Agreement was executed between the City, acting through the Public Utilities Board, and State Street Bank and Trust Company, Credit and Liquidity Provider, for the Commercial Paper. In order to assure timely payment of the principal of and interest on the Commercial Paper Notes, a Letter of Credit was executed by the City and Deutsche Bank Trust, as beneficiary Issuing and Paying Agency. The stated amount of the Letter of Credit is \$50,000,000 (principal plus accrued interest cannot exceed \$50,000,000).

On September 17, 2013, the City Commission of the City of Brownsville adopted an Ordinance No. 2013-1582 authorizing the issuance of the City of Brownsville, Texas Utilities System Commercial Paper Notes, Series A in a maximum aggregate principal amount of \$100,000,000 outstanding at any time. Subsequently on September 20, 2016, the City Commission of the City of Brownsville adopted Ordinance No. 2016-1619 supplementing the Original Ordinance and authorizing the substitution of the Credit Facility. On November 1, 2016, the City of Brownsville and the Mitsubishi UFJ Financial Group (MUFG) entered into a Reimbursement Agreement related to the Commercial Paper Notes, Series A. The City of Brownsville requested that the Bank issue its Letter of Credit to secure certain payments to be made with respect to the Commercial Paper Notes in the amount of \$111,095,891, of which \$100,000,000 will be available to pay principal of the Commercial Paper Notes upon maturity thereof, and of which \$11,095,891 will be available to pay accrued interest on the Commercial paper Notes at maturity.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

## (6) LONG-TERM DEBT

## (a) Revenue Bonds

Revenue bond balances and activity as of and for the year ended September 30, 2017, are as follows:

The Public Utilities Board is required by various debt agreements to comply with various financial statements and other covenants including maintaining required debt service coverage ratios. No non-compliance with covenants was noted which constitutes an "event of default" under these agreements.

On December 7, 2009, the Authority issued \$9,295,000 in Water Supply Contract Revenue Bonds, Series 2009A and \$3,795,000 in Water Supply Contract Revenue Bonds, Series 2009B through the TWDB Drinking Water State Revolving Fund for the construction of a full scale Micro Filtration Pretreatment System. The Series 2009A bonds were issued at 0.0% interest with annual installments ranging from \$305,000 to \$310,000 through maturity in 2039. The Series 2009B bonds bear interest at a range from 0.10% to 4.25% with annual installments ranging from \$125,000 to \$270,000 through maturity in 2029.

On February 28, 2011, the Public Utilities Board issued \$12,305,000 in Utilities System Revenue Refunding Bonds, Series 2011. The refunding bonds provided proceeds to refund \$6,270,000 of Junior Lien Exchange Revenue Refunding Bonds, Series 2005A and \$5,980,000 of Junior Lien Exchange Revenue Refunding Bonds, Series 2005B.

On October 1, 2012, the Public Utilities Board issued \$840,000 in Utility System Junior Lien Revenue Bonds, Series 2012. Proceeds from the sale of the Obligations were used for the purpose of funding construction improvements to the wastewater system on the FM 511 – 802 Colonia Project.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (6) LONG-TERM DEBT - Continued

#### (a) Revenue Bonds - Continued

On September 25, 2012, the Public Utilities Board issued \$20,690,000 in Utility System Revenue Refunding Bonds, Series 2012. The refunding bonds had a closing date of October 18, 2012 and the proceeds plus \$5,275,000 in issuer contributions were used to defease \$24,450,000 of Commercial Paper notes.

On September 26, 2012, the Authority issued \$13,530,000 in Water Supply Contract Revenue Refunding Bonds, Series 2012. The refunding bonds had a closing date of October 18, 2012, and the proceeds plus the bond premium were used to defease \$14,990,000 of the Series 2002 Revenue Bonds for the years 2013 through 2027.

On May 1, 2013, the Public Utilities Board issued \$118,185,000 in Utilities System Revenue Refunding Bonds, Series 2013. The refunding bond proceeds plus a bond premium of \$16,723,650 were used to defease \$109,985,000 of the Series 2005A Utilities System Revenue Improvement and Refunding Bonds which are callable on September 1, 2015, and funded \$11,818,500 of Public Utilities Board Senior Lien Reserve Fund.

On October 18, 2012, the Public Utilities Board issued \$20,690,000 in aggregate principal amount of Utilities System Revenue Refunding Bonds, Series 2012. The proceeds of the refunding bonds plus \$5,275,000 in issuer contributions were used for a current refunding of \$24,450,000 of Commercial Paper Notes. As a result, the refunded commercial paper notes are considered to be defeased and the liability was removed from long-term debt.

On July 15, 2015, the Public Utilities Board issued \$94,770,000 in Utilities System Revenue Refunding Bonds, Series 2015. The refunding bond proceeds plus a bond premium of \$8,945,752 were used to defease \$49,060,000 of the Series 2005A Utility System Revenue Improvement and Refunding Bonds; \$27,815,000 of the Series 2005B Utility System Revenue Refunding Bonds; \$5,480,000 of the Series 2011 Utility System Revenue Refunding Bonds; and \$20,000,000 of the Utilities System Commercial Paper Notes.

On May 15, 2016, the Public Utilities Board issued \$39,410,000 in Utilities System Revenue Refunding Bonds, Series 2016. The refunding bond proceeds plus a bond premium of \$7,705,681 were used to defease \$42,505,000 of the Series 2008 Utility System Revenue Refunding Bonds. As a result, the refunded debt is considered to be defeased and the liability was removed from long-term debt.

On April 18, 2017, the Authority issued \$9,255,000 in Water Supply Contract Revenue Refunding Bonds, Series 2017. The refunding bond proceeds plus the bond premium of \$725,245 were used to defease \$9,715,000 of the Series 2006 Water Supply Contract Revenue Refunding Bonds for the years 2019 through 2032.

#### (b) Advance Refunding

During fiscal year 2017, the Southmost Regional Water Authority issued \$9,255,000 in aggregate principal amount of Water Supply Contract Revenue Refunding Bonds, Series 2017. The refunding

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (6) LONG-TERM DEBT – Continued

#### (b) Advance Refunding - Continued

bonds were issued to provide resources to purchase U.S. Government State and Local Government Series securities that were placed in an irrevocable trust for the purpose of generating resources for all future debt service payments of \$9,715,000 of the Series 2006 Water Supply Contract Revenue Refunding Bonds for the years 2019 through 2032. As a result, the refunded bonds are considered to be defeased and the liability has been removed from long-term debt. The reacquisition price exceeded the net carrying amount of the old debt by \$154,884. This amount together with \$492,816 unamortized deferred amount from the prior refunding is being netted against the new debt and amortized through the year 2032. The Public Utilities Board completed the advance refunding to reduce its total debt service payments over the next 16 years by \$898,007 and to obtain an economic gain (difference between the present values of the old and new debt service payments) of \$692,682.

During fiscal year 2016, the Public Utilities Board issued \$39,410,000 in aggregate principal amount of Utilities System Revenue Refunding Bonds, Series 2016. The refunding bonds were issued to provide resources to purchase U.S. Government State and Local Government Series securities that were placed in an irrevocable trust for the purpose of generating resources for all future debt service payments of \$42,505,000 of the Series 2008 Utilities System Revenue Refunding Bonds for the years 2019 through 2033. As a result, the refunded bonds are considered to be defeased and the liability has been removed from long-term debt. The reacquisition price exceeded the net carrying amount of the old debt by \$4,956,383. This amount together with \$576,913 of unamortized deferred amount from the prior refunding is being netted against the new debt and amortized through the year 2033. The Public Utilities Board completed the advance refunding to reduce its total debt service payments over the next 18 years by \$6,380,112 and to obtain an economic gain (difference between the present values of the old and new debt service payments) of \$5,282,797.

#### (c) Prior Year Defeasance of Debt

In prior years, the Public Utilities Board has defeased various bond issues by creating separate irrevocable trust funds. New debt has been issued and the proceeds have been used to purchase U.S. government securities that were placed in the trust funds. The investments and fixed earnings from the investments are sufficient to fully service the defeased debt until the debt is called or it matures. For financial reporting purposes, the debt has been considered defeased and therefore removed as a liability from long-term debt. As of September 30, 2017 and 2016, the amount of defeased debt outstanding but removed from long-term debt amounted to \$51,880,000 and \$54,620,000, respectively.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (7) RISK MANAGEMENT

The Public Utilities Board is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; and natural disasters for which the entity carries commercial insurance. The Public Utilities Board has established a limited risk management program for employee health and workers' compensation for which the Public Utilities Board retained risk of loss. For insured programs, there have been no significant reductions in insurance coverage. Liabilities are reported when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated. Liabilities include an amount for claims incurred but not reported. The result of the process to estimate the claims liability is not an exact amount as it depends on many complex factors, such as inflation, changes in legal doctrines, and damage awards. Accordingly, claims are reevaluated periodically. The estimate of the claims liability also includes amounts for claim incremental adjustment expenses. Estimated recoveries from third parties are another component of claims expense. Excess coverage insurance policies cover individual claims in excess of \$145,000 and \$350,000 (each Accident) / \$1,050,000 (Aggregate) for health and workers' compensation, respectively. Settlement amounts have not exceeded insurance coverage for the current year or the three prior years.

## (a) Workers' Compensation Program

The Public Utilities Board has a workers' compensation self-insurance plan for the purpose of providing medical and indemnity payments as required by law for on-the-job related injuries. The plan is administered by a service agent. The Public Utilities Board has an excess workers' compensation insurance contract with an insurance carrier coverage which provides Texas statutory limits for claims in excess of \$350,000 for any one accident or occurrence. The aggregate deductible under this policy is \$1,050,000. Management feels that the contributions made during the year for workers' compensation will offset any claims paid during the year. Therefore, the entire liability is estimated to be long term and recorded as such.

#### (b) Health Insurance Program

The Public Utilities Board has a group health self-insurance plan for the purpose of providing health insurance for the employees and their dependents. The plan is administered by a service agreement. The Public Utilities Board has a stop loss insurance contract with an insurance carrier covering claims in excess of \$145,000 per individual. The Public Utilities Board also has aggregate limits, which fluctuate based on enrollment but that are currently set at \$8,012,614. This figure would be the Board's maximum liability, including claims and fixed cost for the 2018 Plan Year.

The following is a summary of changes in claims liability for the Workers' Compensation and Health Insurance programs, which is included in accounts payable and accrued liabilities payable from restricted assets, for the years ended September 30, 2017 and 2016:

Ba		Beginning Balance 2016	Claims and Adjustments		Claims Payments		Ending Balance 2017		Amounts Due Within One Year	
Workers' Compensation	\$	133,295	\$	789,779	\$	(783,390)	\$	139,684	\$ 122,571	
Health Insurance	\$	134,672	\$	6,074,824	\$	(6,052,285)	\$	157,211	\$ 157,211

#### (8) TEXAS MUNICIPAL RETIREMENT SYSTEM

#### (a) Plan Description

The Public Utilities Board participates as one of 872 plans in the nontraditional, joint contributory, hybrid defined benefit pension plan administered by the Texas Municipal Retirement System (TMRS). TMRS is an agency created by the State of Texas and administered in accordance with the TMRS Act, Subtitle G, Title 8, Texas Government Code (the TMRS Act) as an agent multiple-employer retirement system for municipal employees in the State of Texas. The TMRS Act places the general administration and management of the System with a six-member Board of Trustees. Although the Governor, with the advice and consent of the Senate, appoints the Board, TMRS is not fiscally dependent on the State of Texas. TMRS's defined benefit pension plan is a tax-qualified plan under Section 401 (a) of the Internal Revenue Code. TMRS issues a publicly available comprehensive annual financial report (CAFR) that can be obtained at www.tmrs.com.

The plan provisions are adopted by the governing body of the Public Utilities Board, within the options available in the state statutes governing TMRS and within the actuarial constraints in the statutes. All eligible employees of the Public Utilities Board are required to participate in the TMRS.

Plan provisions for the Public Utilities Board were as follows:

Employee deposit rate: 7%

Matching ratio (PUB to employee): 2 to 1

Years required for vesting: 5 years

Members can retire at certain ages, based on the years

of service with the Public Utilities Board. The Service

Retirement Eligibilities for the Public Utilities Board are: 5 years/age 60

Updated Service Credit
Annuity Increase (to retirees)

20 years/any age
100% Repeating, Transfers
70% of CPI Repeating

Supplemental Death Benefit to Active Employees

Yes
Supplemental Death Benefit to Retirees

Yes

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (8) TEXAS MUNICIPAL RETIREMENT SYSTEM – Continued

#### (b) Benefits Provided

TMRS provides retirement, disability, and death benefits. Benefit provisions are adopted by the governing body of the Public Utilities Board, within the options available in the state statutes governing TMRS.

At retirement, the benefit is calculated as if the sum of the employee's contributions, with interest, and the Public Utilities Board-financed monetary credits with interest were used to purchase an annuity. Members may choose to receive their retirement benefit in one of seven payment options. Members may also choose to receive a portion of their benefit as a Partial Lump Sum Distribution in an amount equal to 12, 24, or 36 monthly payments, which cannot exceed 75% of the member's deposits and interest.

At the date the plan began, the Public Utilities Board granted monetary credits for service rendered before the plan began of a theoretical amount equal to two times what would have been contributed by the employee, with interest, prior to establishment of the plan. Monetary credits for service since the plan began are a percentage (100%, 150%, or 200%) of the employee's accumulated contributions. In addition, the Public Utilities Board can grant, as often as annually, another type of monetary credit referred to as an updated service credit which is a theoretical amount which, when added to the employee's accumulated contributions and the monetary credits for service since the plan began, would be the total monetary credits and employee contributions accumulated with interest if the current employee contribution rate and the Public Utilities Board matching percent had always been in existence and if the employee's salary had always been the average of his salary in the last three years that are one year before the effective date.

At the December 31 valuation and measurement date, the following employees were covered by the benefit terms:

	Decemb	er 31,			
	2016 20				
Active employees	571	570			
Inactive employees or beneficiaries currently receiving benefits	251	240			
Inactive employees entitled to but not yet receiving benefits	107	99			
Total Plan Participants	929	909			

#### (c) Contributions

The contribution rates for employees in TMRS are either 5%, 6%, or 7% of employee gross earnings, and the Public Utilities Board matching percentages are either 100%, 150%, or 200%, both as adopted by the governing body of the Public Utilities Board. Under the state law governing TMRS, the contribution rate for each entity is determined annually by the actuary, using the Entry Age Normal (EAN) actuarial cost method. The actuarially determined rate is the estimated amount necessary to finance the cost of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

#### (8) TEXAS MUNICIPAL RETIREMENT SYSTEM – Continued

#### (c) Contributions - Continued

Employees of the Public Utilities Board were required to contribute 7% of their annual gross earnings during the fiscal year. The contribution rates for the Public Utilities Board were 17.54% and 17.57% for calendar years 2017 and 2016, respectively. The Public Utilities Board's contributions to TMRS in the fiscal year ended September 30, 2017, were \$5,074,953, and \$4,399,539 for fiscal year ended September 30, 2016, and equaled the required contributions.

#### (d) Net Pension Liability

The Public Utilities Board's net pension liability (NPL) was measured as of December 31, 2016, and total pension liability (TPL) used to calculate the net pension liability was determined by actuarial valuations as of that date.

#### Actuarial assumptions

The total pension liability in the December 31, 2016, actuarial valuation was determined using the following actuarial assumptions:

Inflation 2.5% per year Overall payroll growth 3.0% per year

Investment Rate of Return 6.75%, net of pension plan investment expense,

including inflation

Salary increases were based on a service-related table. Mortality rates for active members, retirees, and beneficiaries were based on the gender-distinct RP2000 Combined Healthy Mortality Table, with male rates multiplied by 109% and female rates multiplied by 103%. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements. For disabled annuitants, the gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment are used with males rates multiplied by 109% and female rates multiplied by 103% with a 3-year set-forward for both males and females. In addition, a 3% minimum mortality rate is applied to reflect the impairment for younger members who become disabled. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements subject to the 3% floor.

Actuarial assumptions used in the December 31, 2016, valuation were based on the results of actuarial experience studies. The experience study in TMRS was for the period December 31, 2010, through December 31, 2014. Healthy post-retirement mortality rates and annuity purchase rates were updated based on a Mortality Experience Investigation Study covering 2009 through 2011, and dated December 31, 2013. These assumptions were first used in the December 31, 2013, valuation, along with a change to the Entry Age Normal (EAN) actuarial cost method. Assumptions are reviewed annually. Plan assets are managed on a total return basis with an emphasis on both capital appreciation as well as the production of income, in order to satisfy the short-term and long-term funding needs of TMRS.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

### (8) TEXAS MUNICIPAL RETIREMENT SYSTEM – Continued

### (d) Net Pension Liability - Continued

### <u>Actuarial assumptions – Continued</u>

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. In determining their best estimate of a recommended investment return assumption under the various alternative asset allocation portfolios, actuaries focused on the area between (1) arithmetic mean (aggressive) without an adjustment for time (conservative) and (2) the geometric mean (conservative) with an adjustment for time (aggressive).

The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

		Long-Term Expected Real
Asset Class	Target Allocation	Rate of Return (Arithmetic)
Domestic Equity	17.5%	4.55%
International Equity	17.5%	6.35%
Core Fixed Income	10.0%	1.00%
Non-Core Fixed Income	20.0%	4.15%
Real Return	10.0%	4.15%
Real Estate	10.0%	4.75%
Absolute Return	10.0%	4.00%
Private Equity	<u>5.0%</u>	7.75%
Total	<u>100.0%</u>	

### Discount Rate

The discount rate used to measure the Total Pension Liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that employee and employer contributions will be made at the rates specified in statute. Based on that assumption, the pension plan's Fiduciary Net Position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

### (8) TEXAS MUNICIPAL RETIREMENT SYSTEM – Continued

### (d) Net Pension Liability - Continued

The Public Utilities Board's changes in net pension liability were as follows:

	Increase (Decrease)				
	Total Pension Plan Fiduciary			Net Pension	
		Liability		Net Position	Liability
		(a)		(b)	(a) - (b)
Balance at 12/31/2015	\$	154,341,638	\$	120,400,624	\$ 33,941,014
Changes for the year:					
Service cost		4,650,032		-	4,650,032
Interest		10,390,015		-	10,390,015
Change of benefit terms		-		-	-
Difference between expected and					
actual experience		263,997		-	263,997
Changes in assumptions		-		-	-
Contributions - employer		-		4,685,031	(4,685,031)
Contributions - employee		-		1,884,784	(1,884,784)
Net investment income		-		8,139,141	(8,139,141)
Benefit payments, including refunds					
of employee contributions		(5,481,024)		(5,481,024)	-
Administrative expense		-		(91,896)	91,896
Other changes		-		(4,951)	4,951
Net changes		9,823,020		9,131,085	691,935
Balance at 12/31/2016	\$	164,164,658	\$	129,531,709	\$ 34,632,949

### Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the net pension liability of the Public Utilities Board, calculated using the discount rate of 6.75%, as well as what the Public Utilities Board's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (5.75%) or 1-percentage-point higher (7.75%) than the current rate:

1	% Decrease	Cur	rent Single Rate 1% Increa		1% Increase
5.75%		6.75%		7.75%	
\$	58,728,512	\$	34,632,949	\$	14,891,122

### Pension Plan Fiduciary Net Position

Detailed information about the pension plan's Fiduciary Net Position is available in a separately-issued TMRS financial report. That report may be obtained on the Internet at www.tmrs.com.

### (e) Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

The Public Utilities Board recognized \$6,618,993 in pension expense for the fiscal year ended September 30, 2017, and \$17,681,051 in pension expense for the fiscal year ended September 30, 2016.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

### (8) TEXAS MUNICIPAL RETIREMENT SYSTEM – Continued

### (e) Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions – Continued

At September 30, 2017, the Public Utilities Board reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

September 30,			),
	2017		2016
\$	5,501,800	\$	7,465,604
	3,897,460		3,545,797
\$	9,399,260	\$	11,011,401
\$	(1,676,487)	\$	(2,484,829)
	-		101,509
\$	(1,676,487)	\$	(2,383,320)
	\$	\$ 5,501,800 \$ 3,897,460 \$ 9,399,260 \$ (1,676,487)	\$ 5,501,800 \$  3,897,460 \$ 9,399,260 \$  \$ (1,676,487) \$

The amount reported as deferred outflows of resources, \$3,897,460, related to pensions resulting from contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability for the year ending September 30, 2018. Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in pension expense as follows:

		Net deferred	
Year ended	O	utflows (inflows)	
September 30,	of resources:		
2018	\$	1,493,925	
2019		1,493,924	
2020		1,202,806	
2021		(325,915)	
2022		(47,022)	
Thereafter		22,539	
Total	\$	3,840,257	

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

### (9) OTHER POST-EMPLOYMENT BENEFITS

In addition to the pension benefits described in Note 8, the Public Utilities Board provides post-retirement health care benefits and supplemental death benefits to its employees.

### POST-RETIREMENT HEALTH CARE BENEFITS

### (a) Plan Description

The Public Utilities Board provides post-retirement health care benefits for employees retiring and receiving annuities from the Texas Municipal Retirement System, through a single-employer plan, who are (1) at least age 60 and have completed 10 consecutive years of active service with the Public Utilities Board immediately prior to retirement, (2) at least age 55 and have completed 25 consecutive years of active service with the Public Utilities Board immediately prior to retirement, or (3) at any age having completed 30 consecutive years of active service with the Public Utilities Board immediately prior to retirement. Prior to age 65, the Public Utilities Board will pay 100% of the cost of the Group Health Insurance Program for the retirees. Spouses and dependents are also eligible for coverage, but the retiree must pay the premiums. No coverage is available after the retiree reaches age 65, including coverage for spouses and dependents. The above eligibility and coverage requirements do not apply to retirees that retired under Retiree Package I (1999) and Retiree Package II (2005). The Retiree Package I plan results from a special offer made in fiscal year 1999 to all employees with 25 years or more of credited service or eligible for retirement under TMRS guidelines who elected to voluntarily resign or retire during the offer period. The plan provides coverage for the employees and the employees' dependent (spouse) under the Public Utilities Board's group medical plan until such time as the employee becomes 65 years of age, dies, or elects to receive coverage from another source. Under Retiree Package I, 34 retirees met these eligibility requirements. The Retiree Package II plan provides post-retirement benefits to all employees who retire from the Public Utilities Board after attaining 10 years of service and 60 years of age, 25 years of service and 55 years of age or 30 years of service regardless of age. Under the Retiree Package II plan, retirees may pay to provide spousal and dependent coverage.

Under Retiree Package II, 24 retirees met these eligibility requirements. The Public Utilities Board provides 100% of the cost of retirees to participate in this plan. Expenses for post-retirement health care benefits are recognized as retirees report claims and include a provision for estimated claims incurred but not yet reported. Expenses related to provision of these post-employment benefits cannot be reasonably estimated.

### (b) Actuarial Methods and Assumptions

Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of events far into the future. Examples include assumptions as to rates of interest, mortality, and turnover. Actuarially determined amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future.

The required schedule of funding progress immediately following the notes to the financial statements presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

### (9) OTHER POST-EMPLOYMENT BENEFITS – Continued

### **POST-RETIREMENT HEALTH CARE BENEFITS – Continued**

### (b) Actuarial Methods and Assumptions – Continued

Calculations are based on the types of benefits provided under the terms of the substantive plan at the time of each valuation and on the pattern of sharing of costs between the employer and plan members to that point. The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual funding limitations on the pattern of cost sharing between the employer and plan members in the future. Actuarial calculations reflect a long-term perspective.

The actuarial methods and significant assumptions used to determine the Annual Required Contribution (ARC) for the current year are as follows:

- 1) Measurement date is as of October 1, 2015.
- 2) The actuarial cost method used is the projected unit credit cost method.
- 3) As of this valuation date, there are no assets, hence no need for an actuarial value of assets.
- 4) The amortization method is level percent of payroll. The amortization period is 30 years. The period is open.
- 5) See below for a disclosure of the significant actuarial assumptions.
  - Discount Rate for Valuing Liabilities
    - o Without prefunding: 3.50% per annum, compounded annually
  - Inflation Rate
    - o 2.30% per annum, compounded annually
  - Payroll Growth
    - o 2.10% per annum, compounded annually

### (9) OTHER POST-EMPLOYMENT BENEFITS – Continued

### POST-RETIREMENT HEALTH CARE BENEFITS – Continued

### (c) Annual OPEB Cost and Net OPEB Obligation

The Public Utilities Board's annual other post-employment benefit (OPEB) cost is calculated based on the ARC of the employer, an amount actuarially determined in accordance with the parameters of GASB Statement No. 43, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed 30 years. The annual OPEB cost consists of the ARC, interest on the net OPEB obligation, and adjustments to the ARC. The September 30, 2017, and September 30, 2016, actuarial valuations are the basis for the annual OPEB cost of \$1.6 million and \$1.6 million, respectively.

The following table shows the components of the Public Utilities Board's annual OPEB cost for FY 2017 and FY 2016, the contributions in relation to the ARC, and changes in the net OPEB obligation. The net OPEB obligation may be either positive, reflecting a liability, or negative, reflecting an asset. The term net OPEB obligation, as used in this note, refers to either situation.

Determination of Annual Required Contribution	09/30/2017	09/30/2016
Normal Cost at fiscal year end Amortization of UAAL Annual Required Contribution (ARC)	\$ 934,587 676,825 \$ 1,611,412	\$ 934,587 676,825 \$ 1,611,412
Determination of Net OPEB Obligation	09/30/2017	09/30/2016
Net OPEB Obligation - beginning of year	\$ 8,674,722	\$ 7,866,350
Annual Required Contribution	1,611,412	1,611,412
Interest on prior year Net OPEB Obligation	303,615	275,322
Adjustment to ARC	(362,096)	(328,353)
Annual OPEB Cost	1,552,931	1,558,381
Contributions in relation to ARC	(721,240)	(750,009)
Increase in Net OPEB Obligation	831,691	808,372
Net OPEB Obligation - end of year	\$ 9,506,413	\$ 8,674,722

Employer Contibutions		721,240	\$	750,009	\$	325,753
Percentage of OPEB Cost Contributed		46.44%		48.13%		26.67%
Net OPEB Obligation	\$	9,506,413	\$	8,674,722	\$	7,866,350

### (d) Funded Status and Funding Progress

As of October 1, 2015, the most recent actuarial valuation date, the plan was zero percent funded. The actuarial accrued liability for benefits was \$16.2 million, and the actuarial value of assets was zero, resulting in an unfunded actuarial accrued liability (UAAL) of \$16.2 million. The covered payroll (annual payroll of active employees covered by the plan) was \$26.3 million, and the ratio of the UAAL to the covered payroll was 61.7 percent.

		Actu	arial V	aluation I	Date	
	10/0	1/2016	10/0	1/2015	10/0	1/2014
Actuarial Value of Assets	\$	-	\$	-	\$	-
Discount Rate		3.5%		3.5%		3.5%
Actuarial Accrued Liabilities (AAL) <sup>1</sup>		N/A	\$16,2	214,696		N/A
Unfunded Actuarial Accrued Liabilities (UAAL) <sup>2</sup>		N/A	\$16,2	214,696		N/A
Funded Ratio <sup>3</sup>		0.0%		0.0%		0.0%
Covered Payroll		N/A	\$26,2	289,939		N/A
UAAL as a % of Covered Payroll		N/A		61.7%		N/A

- (1) Actuarial Accrued Liability determined under the projected unit credit cost.
- (2) Actuarial Accrued Liability less Actuarial Value of Assets.
- (3) The Public Utilities Board sets aside the net OPEB obligation at the end of each year in an unrestricted fund for the purpose of this liability.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

### (9) OTHER POST-EMPLOYMENT BENEFITS – Continued

### POST-RETIREMENT HEALTH CARE BENEFITS – Continued

### (d) Funded Status and Funding Progress - Continued

The Schedule of Funding Progress, presented as RSI following the notes to the financial statements, presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing relative to the actuarial accrued liability for benefits over time.

Management feels that the contributions made during the year to other post-employment benefits will offset any claims paid during the year. Therefore, the entire liability is estimated to be long term and recorded as such. All assumptions for the postretirement benefits valuation as of October 1, 2015, are contained in the Public Utilities Board Actuarial Valuation Report, a copy of which may be obtained by writing to P.O. Box 3270, Brownsville, Texas 78523-3270.

### SUPPLEMENTAL DEATH BENEFIT PLAN

### (a) Plan Description

The Public Utilities Board also participates in the cost sharing multiple-employer defined benefit group-term life insurance plan operated by the TMRS known as the Supplemental Death Benefits Fund (SDBF). The Public Utilities Board elected, by ordinance, to provide group-term life insurance coverage to both current and retired employees. The Public Utilities Board may terminate coverage under and discontinue participation in the SDBF by adopting an ordinance before November 1 of any year to be effective the following January 1. The death benefit for active employees provides a lump-sum payment approximately equal to the employees' annual salary (calculated based on the employees actual earnings, for the 12-month period preceding the month of death); retired employees are insured for \$7,500; this coverage is an "other postemployment benefit," or OPEB.

### (b) Contributions

The Public Utilities Board contributes to the SDBF at a contractually required rate as determined by an annual actuarial valuation. The rate is equal to the cost of providing one-year term life insurance. The funding policy for the SDBF program is to assure that adequate resources are available to meet all death benefit payments for the upcoming year; the intent is not to prefund retiree term life insurance during employees' entire careers.

### **Schedule of Contribution Rates** (RETIREE-only portion of the rate)

The Public Utilities Board has the benefit plan administered by TMRS. The Public Utilities Board has an annual, individual actuarial valuation performed. All assumptions for the December 31, 2016 valuations are contained in the 2016 TMRS Comprehensive Annual Financial Report, a copy of which may be obtained by writing to P.O. Box 149153, Austin, Texas 78714-9153 or may be obtained from TMRS' website at www.tmrs.com.

### (10) RELATED PARTY TRANSACTION

The Public Utilities Board supplies electric, water, and wastewater services to the City without charge; this is in compliance with the provisions of the City charter. These services are accounted for in accordance with the Public Utilities Board's municipal rate schedules. Utilities service provided to the City for the years ended September 30, 2017 and 2016 were \$4,629,113 and \$4,804,112, respectively.

The Public Utilities Board also bills and collects the City's fees for garbage collection services, garbage tax, EPA fees, and maintenance services, and receives a 3% administrative fee for these services except garbage tax. The Public Utilities Board charged \$795,304 and \$775,830 to the City for these collection services in 2017 and 2016, respectively.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

### (11) TRANSFERS TO THE CITY

The issuance of the 2005A and 2005B refunding bonds modified certain existing covenants which included the calculation of the transfers to the City. Beginning fiscal year 2006 the transfers to the City are being made on a quarterly basis calculated at ten percent (10%) of the gross revenues received for the preceding fiscal year quarter, as adjusted in accordance with the following: (1) prior to applying the percentage set forth above to determine the amount to be transferred to the City, the amount of gross revenues for a fiscal year quarter shall be reduced by an amount equal to all costs for the purchase of power and fuel paid or incurred by the Public Utilities Board during such fiscal year quarter as well as funding requirements for the Southmost Regional Water Authority; and (2) the amount of funds to be transferred to the City shall be reduced by any amounts owed by the City to the Public Utilities Board for utility services. Prior to fiscal year 2006 Article VI of the Charter provided for the transfer to the City's general fund by the Public Utilities Board from "Surplus Funds" available at the close of each fiscal year (after retaining in the Plant Fund an amount deemed by the Public Utilities Board to be sufficient to pay system operation and maintenance expenses for the next 60 days), to the extent available, the greater of \$400,000 or 50% of such surplus funds. Surplus funds, as defined in the Charter, are amounts remaining in the Plant Fund at the close of each fiscal year after all Charter requirements and after all payments have been fully and timely made into funds created by ordinances authorizing outstanding bonds secured by a pledge of the system's net revenues.

Required payments to the City for the years ended September 30, 2017 and 2016, totaled \$10,666,207 and \$9,822,602, respectively, of which \$3,104,705 and \$2,748,853, respectively, was payable at September 30, 2017 and 2016.

### (12) COMMITMENTS AND CONTINGENCIES

The Public Utilities Board is currently involved in various claims and litigation. It is the opinion of management and counsel that potential claims against the Public Utilities Board not covered by insurance resulting from litigation would not materially affect the financial position or operations of the Public Utilities Board.

At September 30, 2017, the Public Utilities Board had committed approximately \$14,466,083 for utility plant expansion and improvements. Funding of these amounts will come from available revenues of the Public Utilities Board and restricted funds.

### (13) RATE STABILIZATION

The Public Utilities Board analyzes and adjusts the fuel and purchased energy charge (FPEC) on a monthly basis. Beginning in April 2016, the Public Utilities Board implemented a bill reduction plan which set the FPEC at a rate that maintains an average residential electric bill at \$102.00 based on 1,000 kWh of electric consumption. The plan was implemented to maintain a competitive alignment with other local providers. The Public Utilities Board utilized rate stabilization funds of \$24,200,000 and \$10,525,000 in fiscal years ending September 30, 2017 and 2016 respectively, to supplement actual FPEC collections.

(A Component Unit of the City of Brownsville, Texas)

Notes to the Financial Statements September 30, 2017 and 2016

### (14) PENDING GASBs

As of September 30, 2017, the Governmental Accounting Standards Board (GASB) had issued statements not yet implemented by the Public Utilities Board. The statements being evaluated for financial statement impact are as follows:

- GASB Statement No. 74, Financial Reporting for Post-Employment Benefit Plans Other Than Pension Plans;
- GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions;
- GASB Statement No. 81, Irrevocable Split-Interest Agreements;
- GASB Statement No. 83, Certain Asset Retirement Obligations;
- GASB Statement No. 84, Fiduciary Activities;
- GASB Statement No. 85, Omnibus 2017;
- GASB Statement No. 86, Certain Debt Extinguishment Issues;
- GASB Statement No. 87, Leases.

Management is currently evaluating these pending GASB statements to determine the financial statement impact to the Public Utilities Board, if any.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the Board of Directors
Public Utilities Board of the City of Brownsville, Texas

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the business-type activities of the Public Utilities Board of the City of Brownsville, Texas, a component unit of the City of Brownsville, Texas, as of and for the year ended September 30, 2017, and the related notes to the financial statements, which collectively comprise the Public Utilities Board of the City of Brownsville, Texas's basic financial statements and have issued our report thereon dated March 12, 2018.

#### **Internal Control over Financial Reporting**

In planning and performing our audit of the financial statements, we considered the Public Utilities Board of the City of Brownsville, Texas's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Public Utilities Board of the City of Brownsville, Texas's internal control. Accordingly, we do not express an opinion on the effectiveness of the Public Utilities Board of the City of Brownsville, Texas's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or, significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

#### **Compliance and Other Matters**

As part of obtaining reasonable assurance about whether the Public Utilities Board of the City of Brownsville, Texas's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

#### Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
