Confirmation of a Quorum

Pledge of Allegiance to the United States

I pledge allegiance to the flag of the
United States of America and to the
Republic for which it stands, one Nation
under God, indivisible, with liberty and
justice for all.

Texas Pledge

Honor the Texas flag, I pledge allegiance
to thee, Texas, one state under God,
one and indivisible.

PRESENTATION AND DISCUSSION OF THE
BROWNSVILLE PUBLIC UTILITIES BOARD'S
FINANCIAL PERFORMANCE REPORT

● ● ● B O A R D O F D I R E C T O R S M E E T I N G

Miguel A Perez
Chief Financial Officer
Finance Division

Fiscal Year 2025 Financial Performance
As of October 31, 2024
Executive Summary

Flow of Funds: Adjusted Gross Revenues came in lower than budgeted due to decreased sales driven by lower consumption. YTD, \$1.2M has been generated to replenish the improvement fund. Debt Service Coverage is at 2.80x, well above the 1.25x minimum.

FPEC has generated an over-recovery of \$16.61M as of October 31. This will be used to offset future market uncertainty.

COB Cash Transfer is lower than budgeted due to a decrease in adjusted gross revenues.

Personnel and Non-Personnel expenses came in lower than budgeted primarily due to current vacancies and timing issues.

BPUB’s **Average Bill** is lower than both the average MOU bill and the average IOU bill for 1000 kwh.

CIP Spending is at \$1.32M YTD, which is 1.7% of the FY 2025 approved plan.

All **Key Financial Metrics** are currently in compliance.

Fiscal Year 2025 Financial Performance
As of October 31, 2024
Statement of Revenues, Expenses, and Changes in Net Position

	FY 2025 OCT 2024 YTD	FY 2024 OCT 2023 YTD
1 Operating Revenues	\$ 19,033,341	\$ 20,776,442
2 Less: Operating Expenses	14,351,462	14,520,771
3 Operating Income	4,681,879	6,255,671
4 Net nonoperating revenues (expenses)	(1,816,113)	(689,884)
5 Income (loss) before capital contributions	2,865,766	5,565,787
6 Capital contributions	452,374	282,284
7 Change in net position	3,318,140	5,848,071
8 Net position at beginning of fiscal year	483,816,196	451,542,046
9 Net position at end of period	\$ 487,134,336	\$ 457,390,117

Notes:

- 1. Excludes Southmost Regional Water Authority (a component unit of the BPUB)**

Glossary of Terms

Bond Ratings – A measure of the quality and safety of a bond, based on the issuer’s financial condition; more specifically, an evaluation from a rating service indicating the likelihood that a debt issuer will be able to meet scheduled interest and principal repayments. Typically, AAA is the highest (best), and D is the lowest (worst). The Brownsville PUB is maintaining an “A2”, as rated by Moody’s, an “A-” as rated by Standard & Poor’s, and an “A-” as rated by Fitch Ratings. “A” ratings denote expectations of low credit risk and a strong capacity for payment of financial commitments.

Capital Improvement Plan (CIP) – A plan that lays out the financing, location, and timing for capital improvement projects over several years.

Debt to Capitalization Ratio – Indicates a utility funds a greater portion of capital needs on a pay-as-you-go basis and has capacity for additional borrowing for future needs.

Debt Service Coverage Ratio – Formula that measures a firm’s available cash flow to pay current debt obligations. The ratio is calculated by dividing net operating revenues by debt service, including principal and interest.

Fuel & Purchased Energy Charge (FPEC) – An electric cost adjustment is the mechanism that tracks and passes through to customers the actual cost of purchased fuel or purchased electricity. The Brownsville PUB meets on a monthly basis to make FPEC adjustments if actual costs vary from forecasted prices. Adjustments can be decreased or increased.

Improvement Fund CIP Funding – Deposit account used for meeting any capital improvements to the System.

Improvement Fund Replenishment – Deposit of any funds remaining after all debt requirements have been made.

Improvement Reserve Fund - Reserve account for future CIP projects. The goal is to establish reserves of \$15,000,000, as required by Bond Ordinance covenants.

IOU (Investor-Owned Utility) – A company that provides utility services that are privately run and own their infrastructure and equipment.

MOU (Municipally-Owned Utility) – A non-profit utility provider that is owned and operated by the municipality it serves.

Operating Reserve Funds – Reserve amount of not less than two months of budgeted O&M expenses (\$17,000,000 minimum) for the current fiscal year.

Operating Revenues – Gross Revenues with respect to any period, after deducting the O&M expenses.

Other Non-Operating Expenses – Miscellaneous expenses, debt discounts/expenses and other interest expenses.

Other Non-Operating Revenues – Revenues consisting of TCI – Pole Rental charges, miscellaneous income and billing discounts.

Other Revenues – Revenues consisting of other sales, forfeited discounts (penalties), connection and service charges and TCOS charges.

PAY-AS-YOU-GO – The principle or practice of financing expenditures with surplus funds that are currently available rather than borrowed.

Surety Policy - A financial guaranty insurance policy that insures payment of principal of and interest on Bonds that is issued simultaneously with the delivery of the Bonds

Investor Owned Utilities Residential Electric Bill Comparison October 2024 Based on 1,000 kWh of Electric Sales

Notes:

1. This comparison is compiled using information for Retail Electric Providers (REPs) which is publicly available through the Power to Choose link on the Public Utilities Commission of Texas' website. The monthly bills shown on this sheet are inclusive of all fixed (e.g. customer & metering charges) and variable charges (e.g. transmission & distribution charges).

2. For comparative purposes bills shown are all fixed plans.

Changes in Accounting for Off-System Sales

● ● ● B O A R D O F D I R E C T O R S M E E T I N G

Miguel Perez
Chief Financial Officer
Finance Division

ERCOT Zonal vs Nodal Market

- ❑ In December 2010 ERCOT switched from a zonal to a nodal market
 - ❖ Transition from zonal pricing mechanism to locational marginal pricing
 - ❖ Benefits of transition:
 - Increased efficiency
 - Improved price transparency
 - Enhanced grid reliability
 - ❖ Key points about the transition:
 - Under the zonal market BPUB submitted balanced schedules to ERCOT with equal amounts of demand and generation.
 - Any excess generation was sold to other utilities as “off-system” sales
 - Revenue not associated with retail customer
 - Flowed to Capital Improvement Fund
 - Under the nodal market ERCOT forecasts the load and dispatches generation for the entire system.
 - BPUB resources serve the ERCOT system load and not matched with BPUB customer load
 - Traditional concept of off-system sales no longer exists

BPUB Accounting Transition

- ❑ BPUB has historically accounted for generation and purchased power costs for the “native load” for our customers separately from “off-system” sales.
 - The costs to serve our customers flow through the fuel and purchased energy charge (FPEC).
 - The costs for “off-system” sales and the associated revenue are handled outside the FPEC with the net gains flowing through as “surplus sales”.

- ❑ In FY 2025 BPUB began transitioning a portion of off-system sales net revenue to begin flowing through the FPEC (1/3 per year for 3 years)
 - The FY24 budget included \$15M in off system sales at a 40% margin
 - The FY25 budget includes \$10M in off system sales at a 50% margin (closer to the five year actual average)
 - ❖ Any net revenue above \$5M will flow through the FPEC as an offset to the costs recovered from customers
 - By FY27 all transactions will flow through the FPEC and will no longer report off-system sales.

The following table shows what the financials would have looked like if all “off-system” transactions had flowed through the FPEC in FY 2024.

September 2024 UNAUDITED @ 10.10.24		Electric	Electric		
		CURRENT METHOD	OFF-SYSTEM TRANSITION TO NET POWER SUPPLY	VARIANCE

Process for Developing and Implementing Utility Rate Changes

● ● ● B O A R D O F D I R E C T O R S M E E T I N G

Monica G Cavazos
Director of Finance
Finance Division

Agenda

1. Background
2. Data Gathering, Assumptions, and Rate Design
3. Progress Meetings and Presentations
4. Resolution and Ordinance Approval Process

Background

- ❑ Previous Water/Wastewater Cost of Service Rate Study was completed in February 2013
 - Water rate increases were approved as follows: 6% on 10/1/13; 4% on 10/1/14; 4% on 10/1/15 and 6% on 10/1/16
 - Wastewater rate increases were approved as follows: 2% on 10/1/13; 4% on 10/1/14

- ❑ RFQ Process for Water/Wastewater Cost of Service Rate Study
 - December 2019 – BPUB advertised a Request for Proposals
 - ❖ Scope included determination of revenue requirements and the development of a five-year rate plan
 - January 2020 – BPUB Board approved the selection of Willdan Financial Services
 - August 2020 – Willdan presented a Draft water/wastewater rate study report to the BPUB Board
 - ❖ The BPUB Board requested a change in scope for the study to include options to support the resaca program

Data Gathering, Assumptions, and Rate Design

□ Data

- Water & Wastewater accounts
 - ❖ By class and meter size
- Consumption data by customer class and month for October 2016 to January 2020
- Billed revenues data by customer class and month for October 2016 to January 2020
- Five-year financial forecast
- Five-year Capital Improvement Plan
- Water produced by month and day for each water treatment plant for October 2016 to January 2020
- Influent and effluent totals by month and day for each wastewater treatment plant for October 2016 to January 2020
- Outstanding debt service schedules for water and wastewater

□ Assumptions

- Current water/wastewater rates are not covering entire cost of service
- Most personnel and operating expenses expected to continue to increase 2% per year
- \$163 million in water/wastewater CIP over next 5 years which would require significant long-term debt

Data Gathering, Assumptions, and Rate Design (Cont.)

Rate Design

☐ Determining appropriate rate design

- Implement higher increases initially with lower increases in the later years or uniform percentage adjustments
- Recover Resaca costs through monthly water base rates or a separate fee
- Resaca fee to recover only RESTORE program matching funds or also recover USACE matching funds

☐ Scenarios

- Recover Resaca costs through levelized water base rates
- Recover Resaca costs through non-levelized water base rates
- Recover Resaca costs and RESTORE matching requirements with a separate fee
- Recover Resaca costs, RESTORE and USACE program matching requirements with a separate fee

Progress Meetings and Presentations

- December 13, 2021 – Willdan presented four rate scenarios to the BPUB Board to include resaca costs in base rates or create a separate resaca fee
 - ❖ The Board approved presenting the two scenarios creating a separate resaca fee to the City Commission for their consideration
 - ❖ The Board also requested that in addition to the proposed non-levelized water and wastewater rates, Willdan also develop levelized scenarios.
- February 2, 2022 – Updated rate study with levelized water and wastewater rates options were presented to the Finance Committee who recommended the full results be reviewed with City staff and Commissioners
- February 14, 2022 - The final Rate Study Report presented to BPUB Board with options for levelized or non-levelized water and wastewater rate increases and a Resaca Fee to cover grant matching requirements for RESTORE or USACE or both.

Resolution and Ordinance Approval Process

- February 24, 2022 – BPUB Executive Team and staff met with City Manager and COB staff to review rate plan.
- March 14, 2022 – BPUB Board of Directors approved Resolution 2022-0314-IC6 approving the study by Willdan and requesting the City Commission approve and adopt the rates and fees identified in the study.
 - ❖ The BPUB Board left the choice of levelized vs non-levelized and Resaca Fee options up to the City Commission.
- March 28 and 29, 2022 – BPUB Executive Team and staff had one-on-one briefings with the Mayor and Commissioners to review the proposed rate increases.
- April 19, 2022 – On 1st Reading and Public Hearing the City Commission approved Ordinance 2022-1701 for a levelized water and wastewater five-year rate plan and a Resaca Fee that covered both RESTORE and USACE.
 - ❖ May 3, 2022 – On 2nd Reading the City Commission approved an Amended and Restated Ordinance 2022-1701.
- July 11, 2022 - BPUB Board of Directors approved Resolution 2022-0711-IC2 requesting the City Commission approve changes to Section 102-114(b) of the Code of Ordinances for the addition of rates charged to El Jardin that had not been included in Ordinance 2022-1701
- August 2, 2022 – On 1st Reading and Public Hearing the City Commission approved Ordinance 2022-1569-C for the El Jardin water rate increases
 - ❖ August 16, 2022 - On 2nd Reading the City Commission approved Ordinance 2022-1569-C
- November 7, 2023 - On 1st Reading and Public Hearing the City Commission approved Ordinance 2023-1701-A canceling the scheduled adjustments to the Resaca Fee
 - ❖ November 14, 2023 - On 2nd Reading the City Commission approved Ordinance 2023-1701-A

Transmission Service in ERCOT

OVERVIEW OF OPERATIONS AND RESPONSIBILITIES

● ● ● B O A R D O F D I R E C T O R S M E E T I N G

Mark V. Dombroski
Assistant GM & COO
Operations

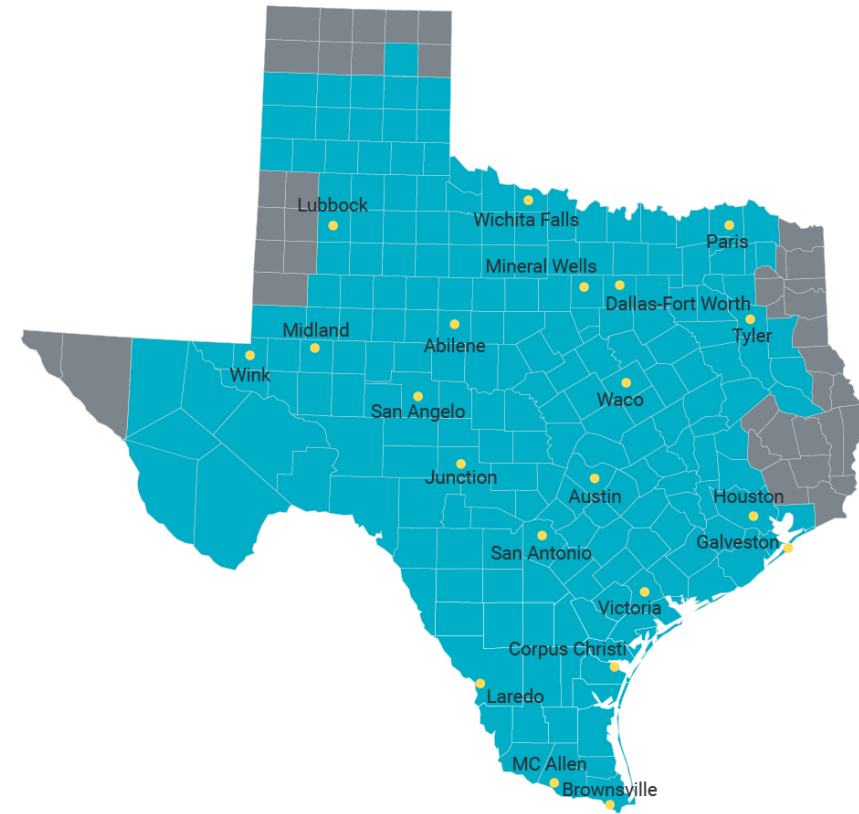

Transmission Discussion

In ERCOT, the transmission system moves electricity from power plants to consumers through a network of high-voltage lines, with costs recovered through regulated transmission rates paid by market participants.

- How the power transmission system works within ERCOT
- Roles BPUB plays within the transmission system
- Transmission Cost of Service (TCOS) – How transmission tariffs are approved by the Public Utility Commission of Texas
- Transmission Charge Matrix – how costs are recovered for the use of the transmission system
- How transmission expenses and revenues flow through BPUB customers' bills
- An alternative approach for consideration

The ERCOT Market

- Manages the flow of power to 26 million customers – about 90% of Texas
- Schedules power on a grid that connects 1,100 generator units with 52,700 miles of transmission lines
- Performs financial settlement for the competitive wholesale market
- Members of the market include consumers, cooperatives, generators, power marketers, retail electric providers, investor-owned electric utilities, transmission and distribution providers, and municipally owned electric utilities

ERCOT Market Participants

- Qualified Scheduling Entity (QSE)
- Resource Entity (RE)
- Transmission and Distribution Service Provider (TDSP)
- **Transmission Service Provider (TSP)**
- **Distribution Service Provider (DSP)**
- Load Serving Entity (LSE)
 - Non-opt-in Entity (NOIE)
 - Competitive Retailer (CR)
 - Opt-in Entity (Opt-In)
 - Retail Electric Provider (REP)

Price Regulation and the ERCOT Market

Generation of power
is a competitive
wholesale market

Transmission of power is an Open Access market
regulated by the Public Utility Commission of Texas

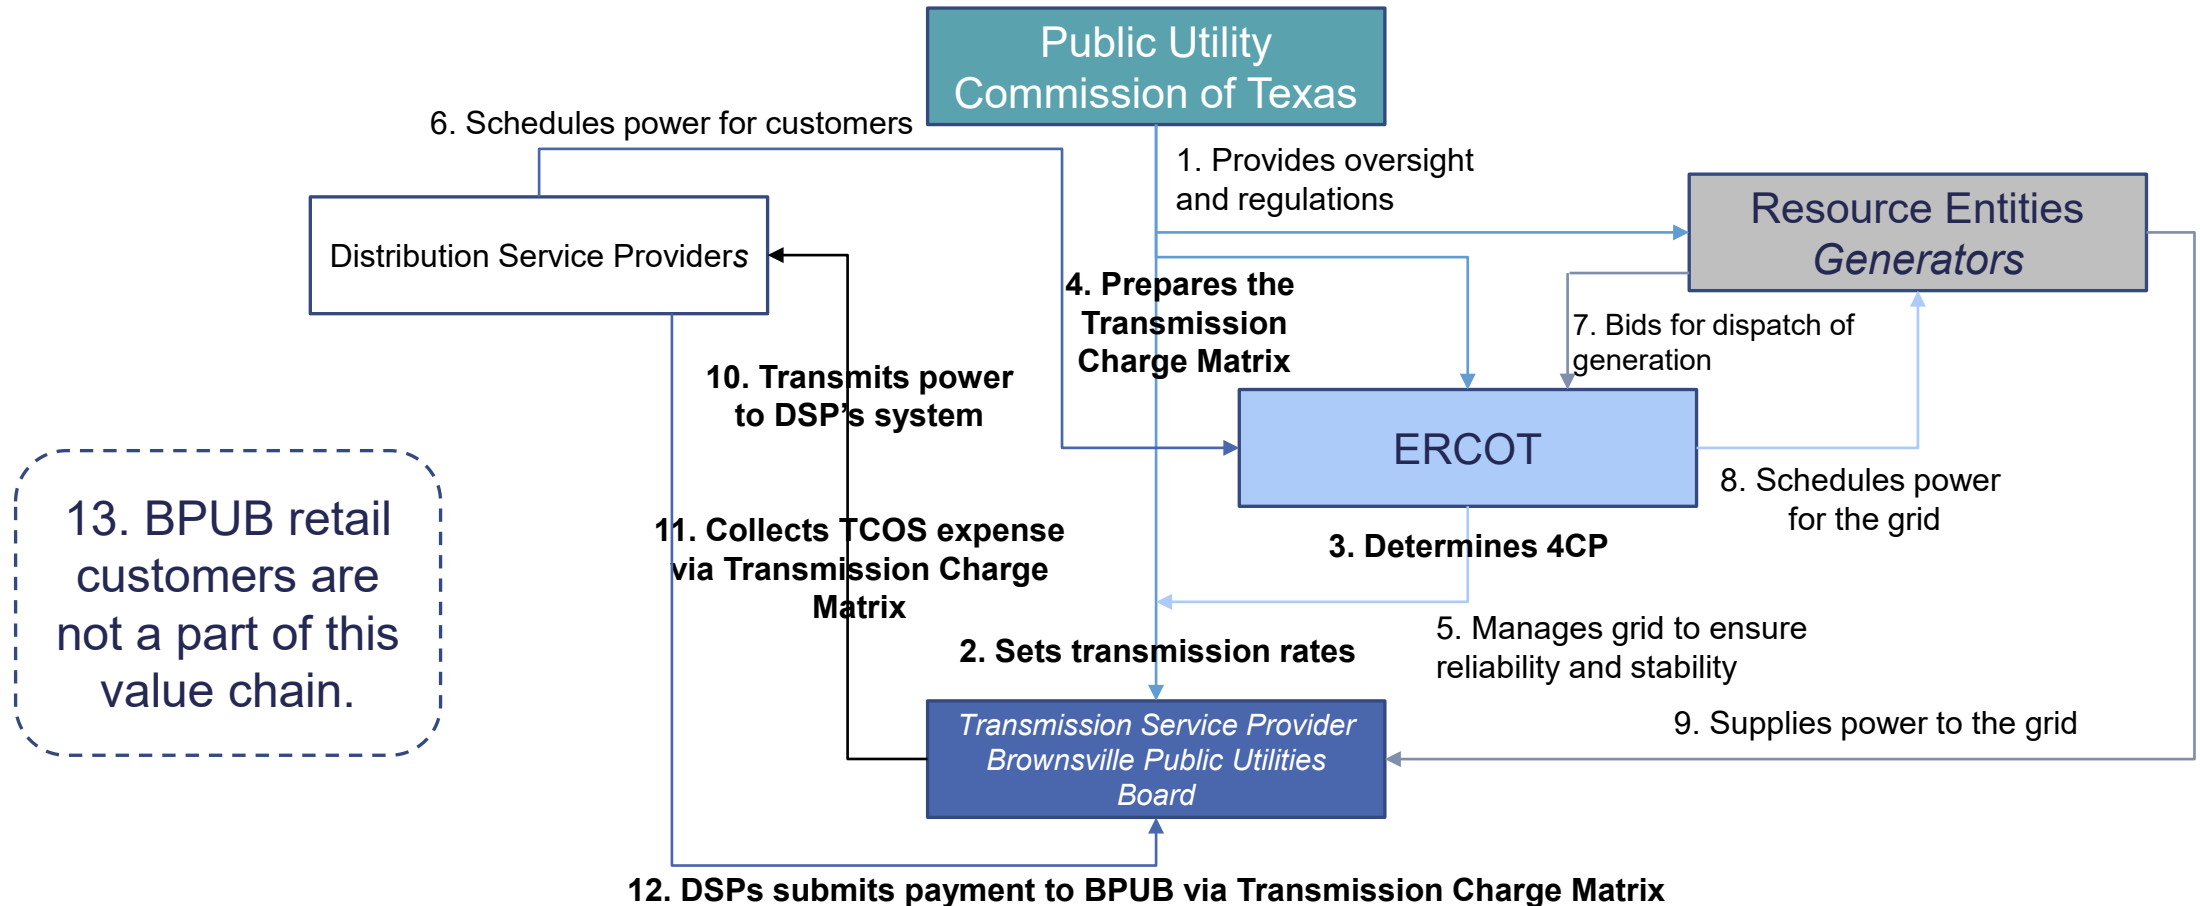

BPUB's retail service is a non-
competitive market regulated by
the Brownsville City
Commission and the
BPUB Board of Directors

BPUB as a Distribution Service Provider

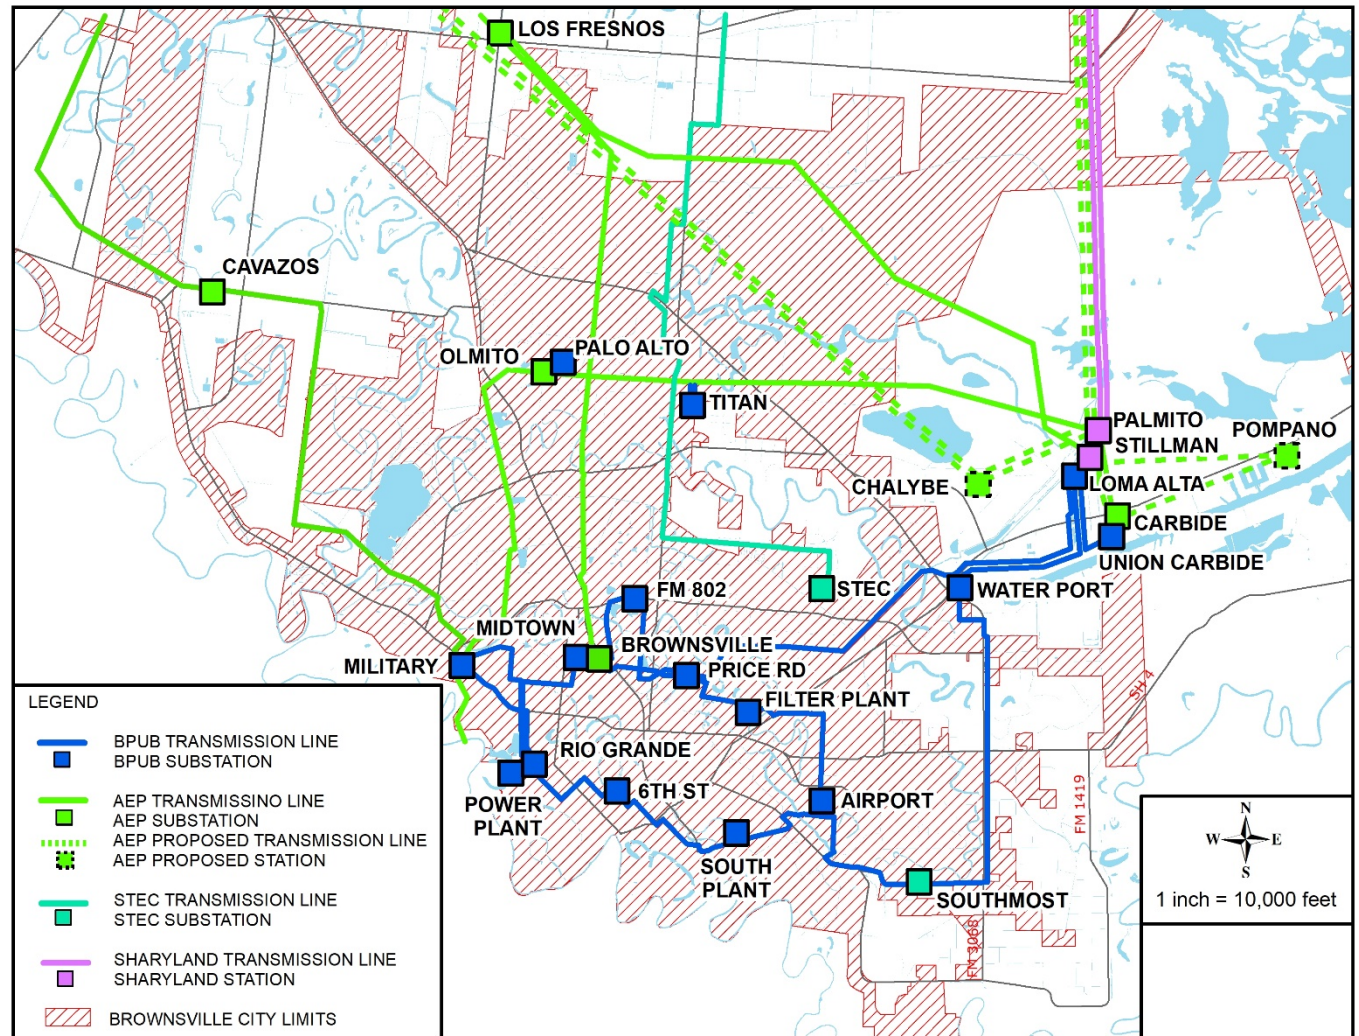

BPUB as a Transmission Service Provider

BPUB Transmission System

BPUB owns and operates approximately 50 miles of 69kV and 138kV transmission lines, which move power to substations and then step it down to 15 kV for distribution to customers.

BPUB's transmission system is relatively small and has a lower voltage than many TSPs within ERCOT.

PUCT Transmission Filings

Transmission is highly regulated in the ERCOT market. As a Transmission Service Provider, BPUB must regularly file with the Public Utility Commission of Texas.

Texas Administrative Code
Title 16: Economic Regulation
Part 2: Public Utility Commission of Texas
Chapter 25: Substantive Rules Applicable to Electric Service Providers
Sub-Chapter I: Transmission and Distribution
Division 1: Open-Access Comparable Transmission Service for Electric Utilities in the Electric Reliability Council of Texas

- **Transmission Cost of Service (TCOS) Rate Case:** A comprehensive filing to establish or change a wholesale transmission tariff rate. For non-IOU TSPs, this includes a thorough review of all operating expenses, investment in capital, revenues, debt service, coverage ratio, and General Fund Transfer. Filing can be voluntary, or the PUCT can compel the TSP to file.
- **Interim Update of Transmission Rates:** Non-IOU TSPs may file an interim update twice yearly to adjust their TCOS rates to reflect transmission facility additions and retirements. All other cost elements remain consistent with the existing TCOS-approved tariff.
- **Earnings Monitoring Report:** Each non-IOU TSP must file an annual report to the PUCT demonstrating that their earnings do not exceed the allowable amount from the latest TCOS rate case.

Process for Transmission Cost of Service (TCOS) Rate Case

1. Filing the Application: BPUB submits a detailed tariff application to the PUCT.
2. Notice and Publication: BPUB notifies affected parties, including customers and other stakeholders, of the application.
3. Review and Evaluation: The PUCT staff reviews the BPUB application to ensure it complies with state laws and regulations. This includes evaluating BPUB's cost of service, revenue requirements, and the fairness of the proposed rates.
4. Intervention and Public Participation: Interested parties, such as consumer groups or other utilities, may intervene in the proceeding, and public hearings may be held to hear objections.
5. Administrative Hearings: If there are contested issues, the case may go to an administrative law judge who conducts hearings and makes recommendations based on the evidence presented.
6. Commission Decision: The PUCT commissioners review the administrative law judge's recommendations and make a final decision. They may approve, modify, or reject BPUB's proposed tariff.
7. Implementation: Once approved, BPUB implements the new tariff rates and terms. The PUCT monitors BPUB's compliance and requires periodic reporting.

BPUB TCOS Rate Case Filing

TCOS Rate Filing Package: Filed with PUCT to request changes in transmission rates. It includes detailed financial and operational data to justify the rate change.

BPUB's last full TCOS filing, Docket 51536, was approved on January 14, 2022. It was based on the FY 2019 audited financials.

BPUB has not made any Interim Updates to its TCOS filing.

DOCKET NO. 51536	
APPLICATION OF BROWNSVILLE PUBLIC UTILITIES BOARD FOR TRANSMISSION COST OF SERVICE AND WHOLESALE TRANSMISSION RATES	§ § § § §
	BEFORE THE PUBLIC UTILITY COMMISSION OF TEXAS
WHOLESALE TRANSMISSION TARIFF	
<p>COMES NOW Brownsville Public Utilities Board (BPUB) and files this, its Wholesale Transmission Tariff, as required by Ordering Paragraph 12 of the Final Order in this case, issued January 14, 2022, and in support thereof would respectfully shows as follows:</p>	
I. TARIFF ALREADY ADMITTED INTO EVIDENCE	
<p>Attached as Exhibit A is the Wholesale Transmission Tariff which was attached to the Supplemental Testimony of James Daniel, filed October 8, 2021 and admitted into evidence in the case pursuant to Order No 16 on October 20, 2021. Exhibit A contains only one modification to that tariff: the approval date had been blank and is now listed as "January 14, 2022," to be consistent with the date of the Commission's Final Order in the case.</p>	
II. "APPROVED" STAMP	
<p>WHEREFORE, PREMISES CONSIDERED, BPUB respectfully requests that the tariff attached as Exhibit A "be stamped Approved and kept in the Commission's tariff book" as required by Ordering Paragraph 12 of the Final Order issued in this case on January 14, 2022.</p>	

Transmission Charge Matrix

The Transmission Charge Matrix is a tool the PUCT uses to determine the charges that TSPs can bill DSPs for using their transmission networks. This matrix ensures that the transmission infrastructure costs are fairly distributed among the grid's users.

How the PUCT Determines the Transmission Charge Matrix

1. Data Collection: ERCOT collects and reports the 4CP demand data for each DSP. This data is used to allocate the transmission costs among the DSPs.

2. Revenue Requirements: Each TSP submits its revenue requirements through its transmission cost of service. The PUCT reviews and approves these requirements.

3. Annual Updates: The PUCT updates the transmission charges annually based on the previous year's average of the four-coincident-peak (4CP) demand for June, July, August, and September.

4. Matrix Calculation: Using the 4CP data and the approved revenue requirements, the PUCT calculates the transmission charges for each DSP. The resulting matrix specifies the amount each DSP must pay to each TSP.

5. Commission Approval: The final transmission charge matrix is approved by the PUCT and becomes effective for the following year. This ensures that the charges are based on the most recent and accurate data.

Transmission Charge Matrix Calculations

$\text{TSP Receivable} = ((\text{Approved TCOS} / \text{ERCOT Avg. 4CP}) / 12) \times \text{DSPs Avg. 4CP}$

$\text{"Postage Stamp Rate"} = \text{Total of all TSP Approved TCOS} / \text{ERCOT Avg. 4CP}$

$\text{DSP Payable} = (\text{"Postage Stamp Rate"} \times \text{DSPs Avg. 4CP}) / 12$

Determination of 4 Coincident Peak

Distribution
Service
Providers

Transmission Charge Matrix

BPUB must pay this because we deliver power to retail customers. The cost is unrelated to BPUB's ownership and operation of its transmission system.

BPUB gets paid from other utilities because it owns and operates transmission in ERCOT. The payment is unrelated to serving power to retail customers.

2024 Matrix	BPUB pays because we are a Distribution Service Provider	BPUB receives because we are a Transmission Service Provider
AEP Texas	\$2,555,182	(\$950,800)
Austin Energy	\$360,099	(\$406,679)
City of Bartlett	\$0	(\$435)
CenterPoint	\$2,258,831	(\$2,904,133)
Lower Colorado River Authority	\$2,475,765	(\$0)
Lubbock Power & Light	\$83,509	(\$83,031)

Transmission Charge Matrix

Net Payment Exchange

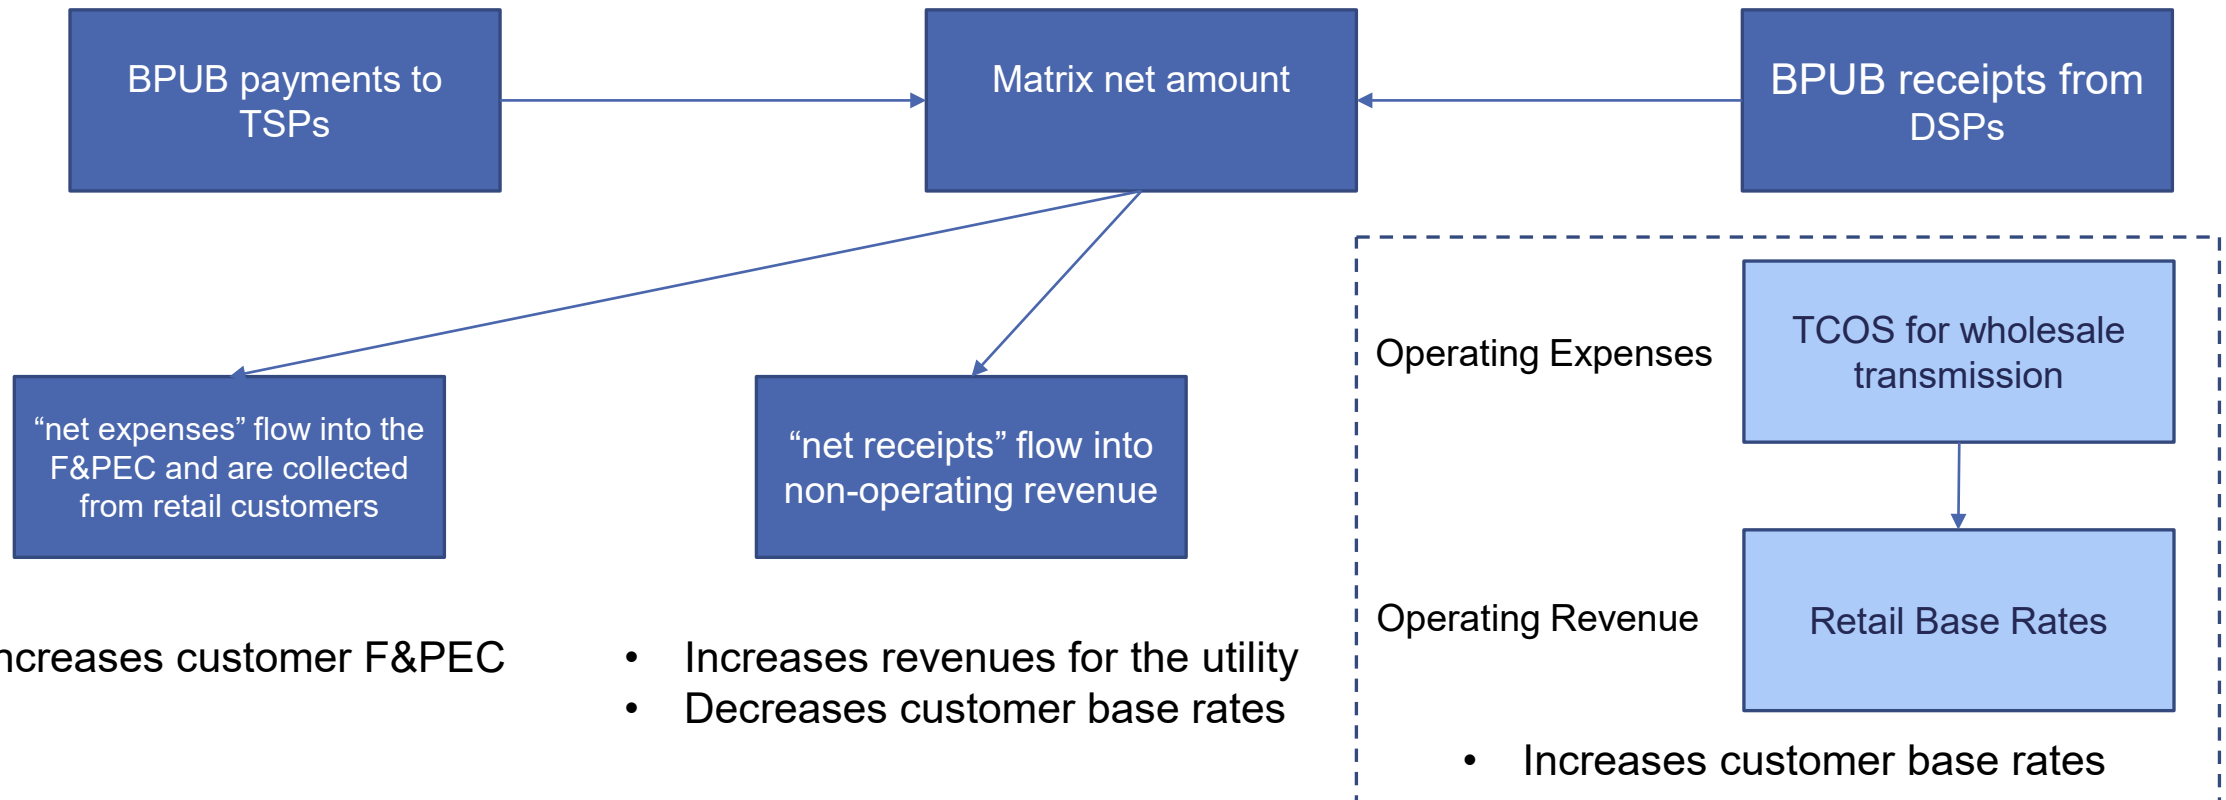

The utilities in the Matrix net the amounts, divide by 12, and exchange monthly payments. This is for administrative and cash flow purposes, not because the costs and revenues are related.

2024 Matrix	BPUB Payable	BPUB receivable	Annual Net Amount Due	Monthly Payment
AEP Texas	\$2,555,182	(\$950,800)	\$1,604,381	\$133,698.42
Austin Energy	\$360,099	(\$406,679)	(\$46,580)	(\$3,881.67)
City of Bartlett	\$0	(\$435)	(\$435)	(\$36.25)
CenterPoint	\$2,258,831	(\$2,904,133)	(\$645,302)	(\$53,775.17)
Lower Colorado River Authority	\$2,475,765	(\$0)	\$2,475,765	\$206,313.75
Lubbock Power & Light	\$83,509	(\$83,031)	(\$478)	(\$39.83)

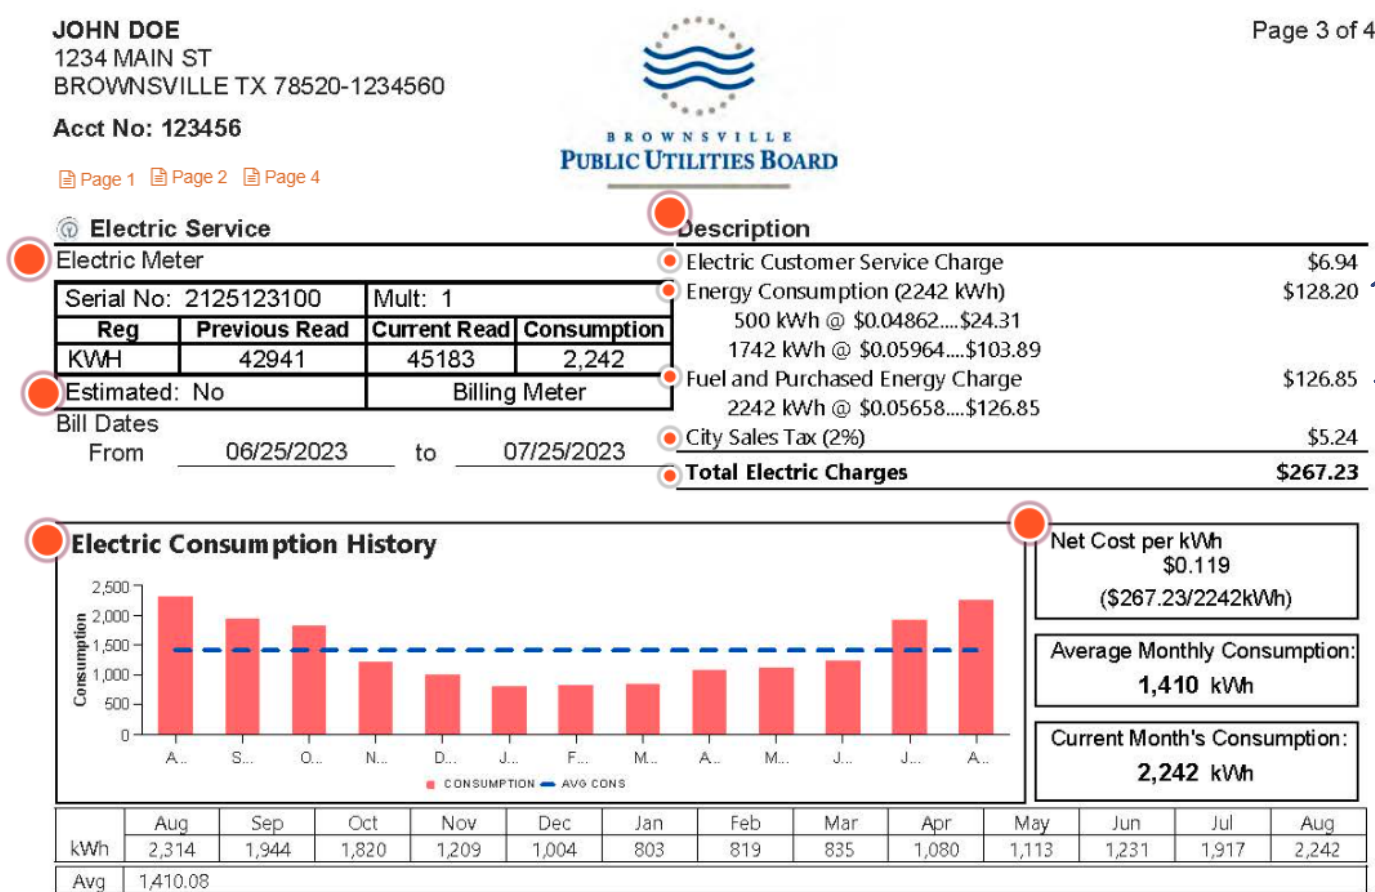

Current Approach to Transmission Costs on Customer Bills

Retail Customer Expenses

Transmission Wholesale Revenue

BPUB Customer Bill

“net receipts” flow into non-operating revenue. Wholesale TCOS recovered.

Transmission is not evident on the bill.

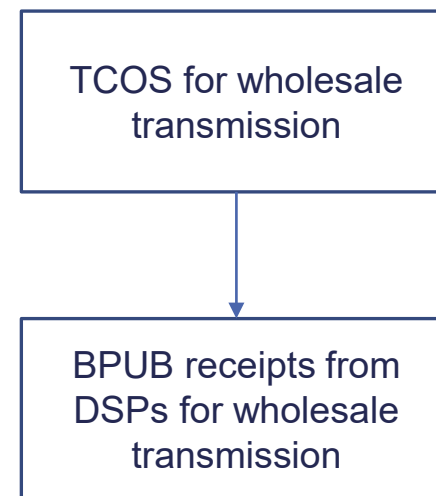

“net expenses” flow into the F&PEC and are collected from retail customers.

Alternative Approach to Transmission Costs on Customer Bills

- Decreases customer F&PEC
- Creates a customer Transmission Access Fee
- Aligns cost causation and price signals
- Aligns revenues with their associated costs
- Common practice in Texas

Transmission Wholesale Operations

- Separates transmission as a distinct business unit
- Aligns revenues with their associated costs
- Aligns cost causation
- Decreases customer base rates

National Weather Service December to February 2025 Outlook: For the Lower Rio Grande Valley/Deep South Texas Region

- Warmer and drier than average conditions are likely December-February
- Time for necessary rains to help Amistad/Falcon reservoirs has run out, as the dry season has begun
- Dryness/drought conditions are likely to expand through the winter season
- Confidence remains high that total combined storage will remain at or near records lows through February

Appendix

AMI Solution

- Landis + Gyr

- Electric meters
- Gridstream mesh RF network
- Command Center headend system

- Badger

- Water meters
- Badger Orion LTE-m cellular endpoints
- BEACON headend system

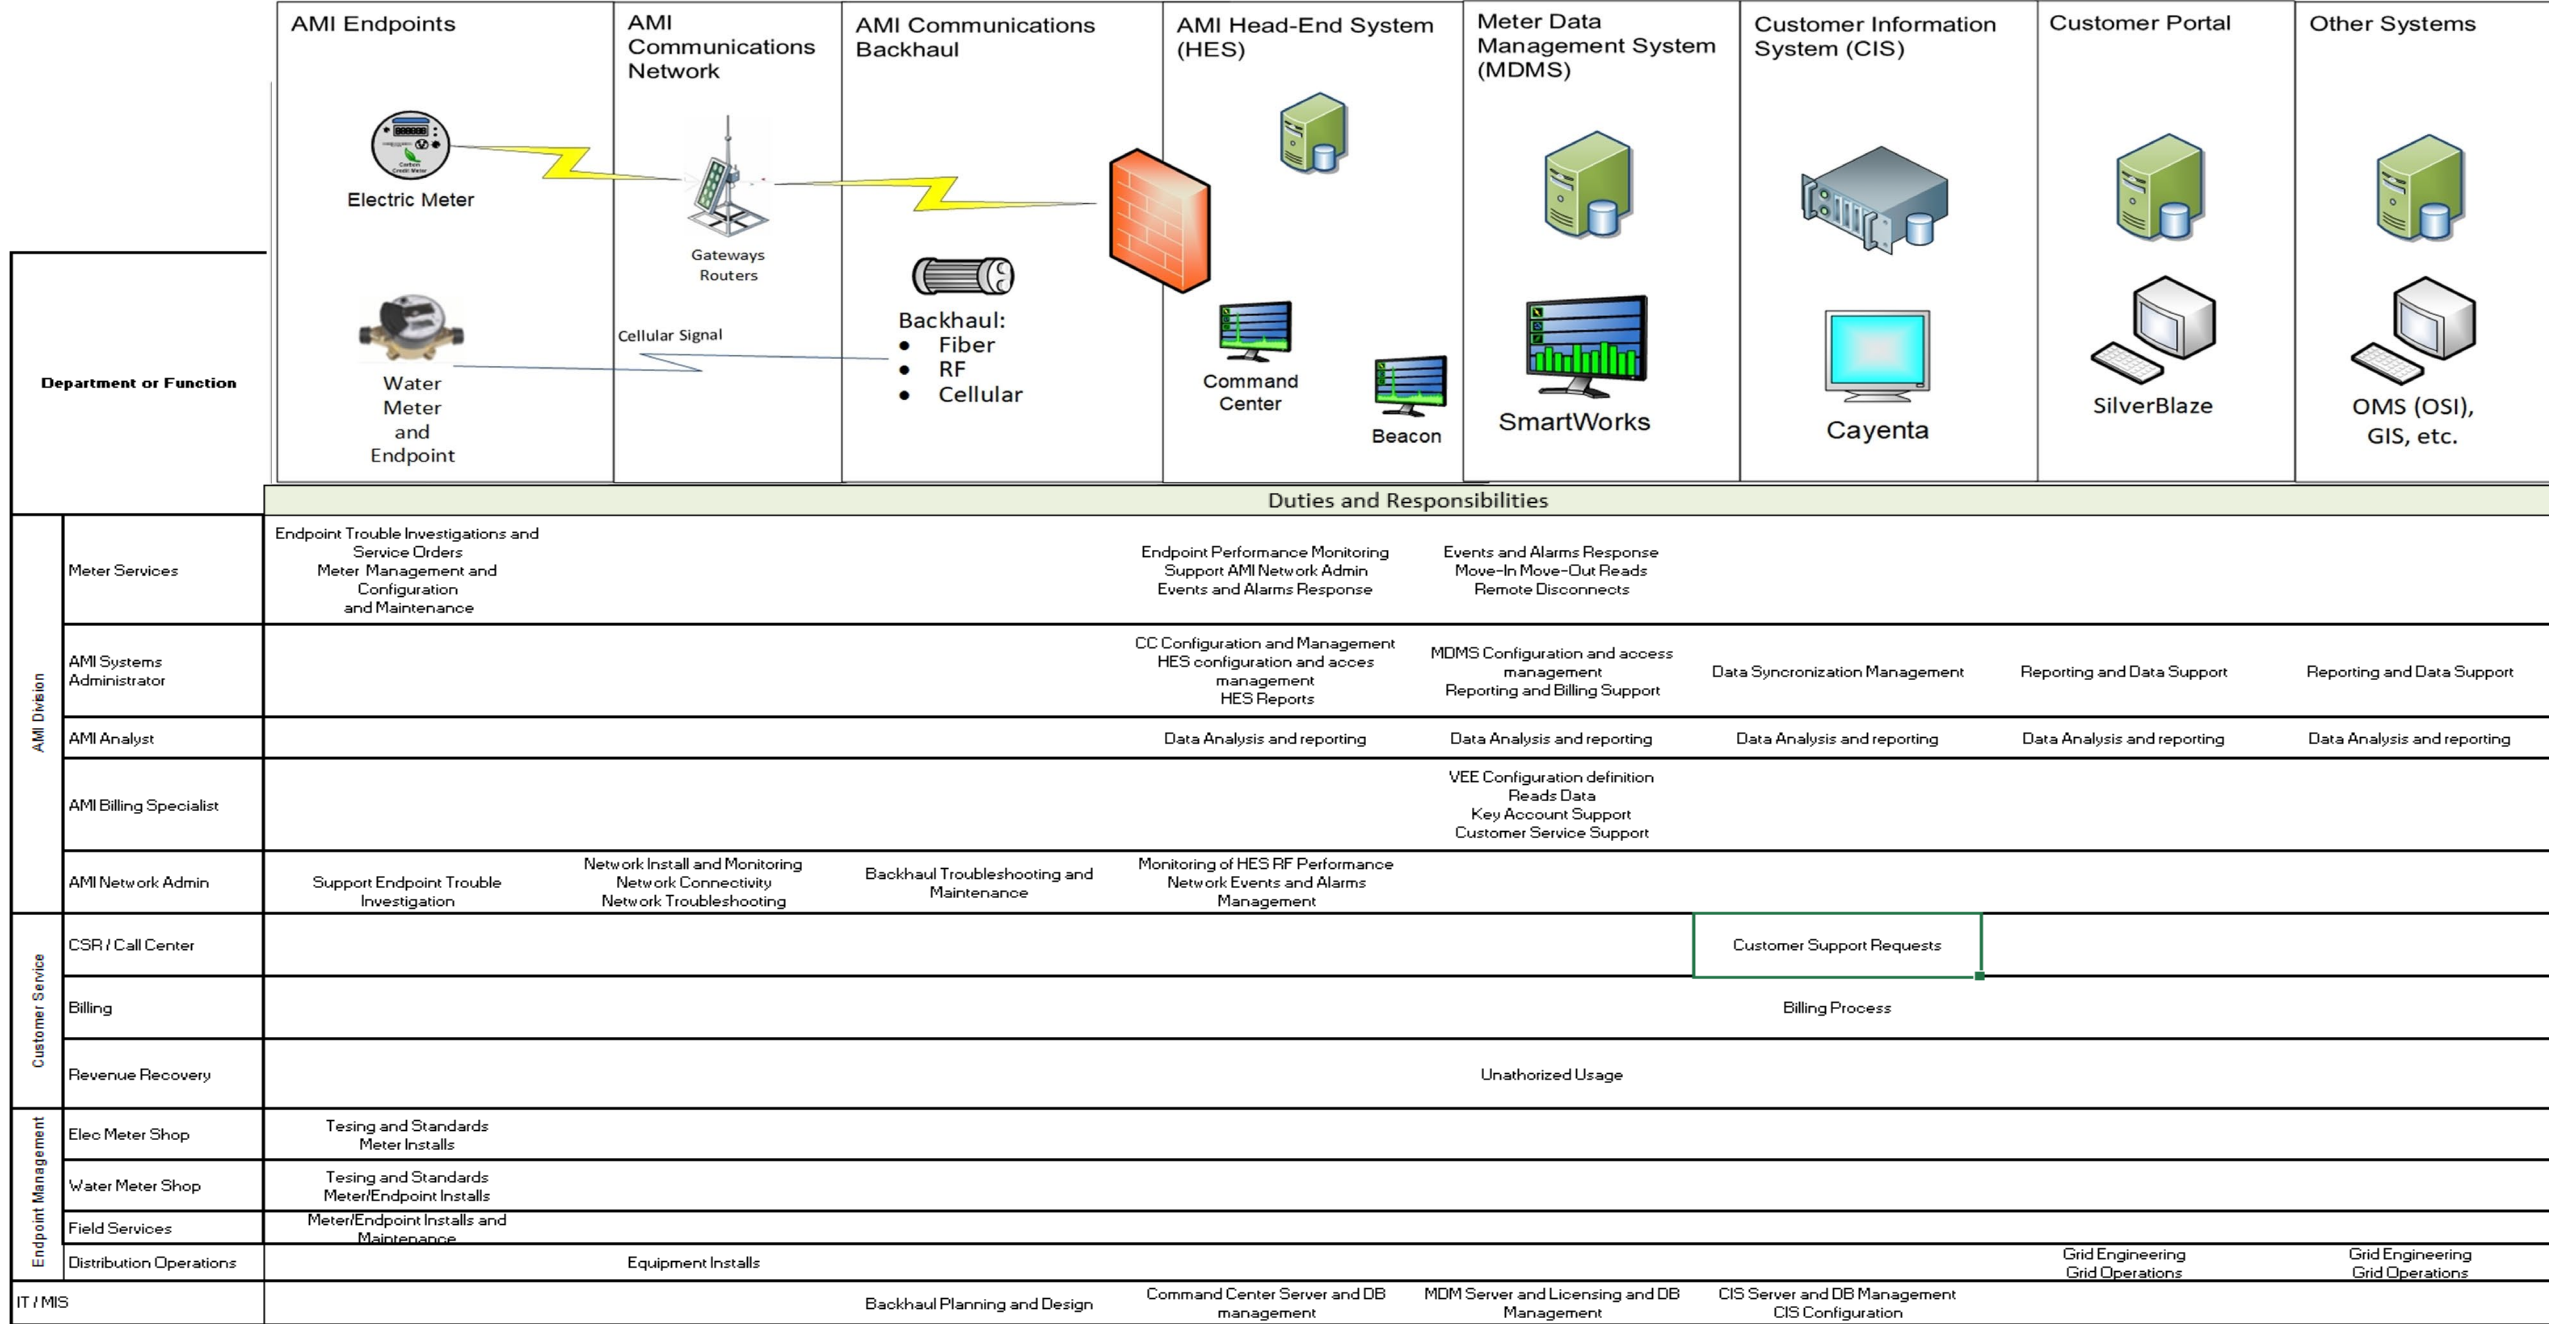

•SmartWorks

- Compass Meter Data Management System (MDMS) for electric and water

- **Allegiant**

- Electric and water meter and network installation services

Planned Integrations

- The AMI headend system will collect reads from meters at regular intervals
- The MDMS will be the system of record for long-term storage and connect to the billing system and future customer portal
- The new systems will communicate with the CIS, OMS, GIS, and a customer engagement portal

Project Objectives

Deploy AMI infrastructure across service areas

Enhance

- ✓ Electric outage detection
- ✓ Leak detection

Achieve

- ✓ Time & Resource Savings
- ✓ Seamless integration with existing systems

Ensure

- ✓ Data accuracy
- ✓ Security & compliance
- ✓ Robust training

Empower

- ✓ Customers with access to data and tools for energy and water management
- ✓ Employees to plan and execute strategies

Benefits

Customer

- ✓ Enhanced customer experience
- ✓ Fewer estimated bills
- ✓ Notifications
- ✓ Leak detection
- ✓ Online tools
- ✓ Consumption management
- ✓ Quicker outage restorations

Utility

- ✓ Timely & accurate meter reading
- ✓ Reduced truck rolls
- ✓ Enhanced outage detection
- ✓ System planning & optimization
- ✓ Reduced bill adjustments
- ✓ Real-time analytics
- ✓ Theft detection
- ✓ Improved safety

Badger Contract

EXHIBIT D

4. **Prices.** Unless stated otherwise in a governing quotation or tender, prices are stated and payable in U.S. dollars or Euros FCA Badger Meter's Facility (pursuant to Incoterms 2010 of the International Chamber of Commerce, as amended or restated from time to time ["Incoterms"]). All prices are subject to change based on Badger Meter's selling prices in effect as of the date of shipment. Quoted prices are firm for acceptance, via an order, within the effective dates provided in the quote, shipping within sixty (60) days past the expiration of the quote. Prices quoted for blanket orders are subject to review and retroactive adjustment, if necessary, based on actual quantities shipped. Written quotations are void unless accepted within the effective dates listed on the quotation and are subject to earlier change upon notice from Badger Meter. Other Badger Meter publications are maintained as sources of information and are not quotations or offers to sell.

4. Consideration and Possible Action on the Transfer of Retired Vehicles and Equipment to the City of Brownsville

MIGUEL PEREZ

5. Election of Board Officers for 2025

MARILYN GILBERT

6. Consideration and Possible Approval of Appointment of a Brownsville Public Utilities Board Representative to the Southmost Regional Water Authority for 2025

MARILYN GILBERT

Recess to Closed Meeting

Closed Session Items

1. Meeting with Board's legal counsel for advice about contemplated and pending court and administrative litigation and on matters in which the duty of the attorney under the Texas Disciplinary Rules of Professional Conduct conflicts with Chapter 551 (Sec. 551.071), including but not limited to the following:
 - a) Reports of local and special counsel;
 - b) Update on pending negotiations of non-standard contracts related to the potential business development;
 - c) Updates on pending discussions with the City of Brownsville on coordination issues, including the agenda for the December 10 joint meeting with the City Commission; and
 - d) Legal briefing regarding Brownsville Public Utilities Board fee-owned properties as part of system.
2. Presentation, discussion, and possible recommendation of information upon pricing of purchased power, generation, and fuel and their impact upon the Fuel, Purchased Energy, and Marketing Charge (Sec. 551.086).

Closed Session Items

3. Presentation and possible vendor questions for security guard services to determine firm qualifications for implementation and personnel to provide security for the Brownsville Public Utilities Board facilities (Sec. 551.076 and Sec. 551.089).
4. Deliberation of vendor proposals to determine firm qualifications for implementation and personnel to provide security for the Brownsville Public Utilities Board facilities and discuss terms and conditions of contract for annual security guard services (Sec. 551.071, Sec. 551.076, and Sec. 551.089).
5. Discussion regarding use of Brownsville Public Utilities Board properties adjacent to Gladys Porter Zoo (551.071, 551.072).
6. Discussion of Employee, Public Officer, and/or Board Members and ethical governance and responsibilities (Sec. 551-071 and Sec. 551.174)

Reconvene Open Meeting

Consideration and Action on Closed Meeting Items

1. CONSIDERATION AND POSSIBLE ACTION TO AUTHORIZE THE GENERAL
MANAGER AND CEO TO NEGOTIATE AND EXECUTE A CONTRACT FOR SECURITY
GUARD SERVICES-EDUARDO MARTINEZ
2. CONSIDERATION AND POSSIBLE ACTION ON ITEMS DISCUSSED IN CLOSED
MEETING

Consideration and Action on Future Agenda Items
