1.3 EXISTING SYSTEM

1.3.1 GENERAL BACKGROUND

BPUB is located in the City of Brownsville, Texas, on the U.S.-Mexico border near the Gulf of Mexico. BPUB provides electric, water and wastewater services to the City and the surrounding area. In addition, BPUB dredges resacas located within the City of Brownsville.

The Brownsville PUB operates a rapid dewatering system that is used in conjunction with hydraulic dredges to remove sediment from Resacas beds. The rapid dewatering system employs a dual polymer treatment program that consists of both cationic and anionic emulsion flocculants used to rapidly dewater Resaca sediment in the high shear conditions associated with dredging and dewatering equipment. Dewatered sediment effluent containing low Total Suspended Solids is returned to the Resaca system.

1.3.2 RAW WATER AND SEDIMENT CHARACTERISTICS

The raw water source for the resacas within the City of Brownsville is the Rio Grande River. Raw water is diverted from the river to two surface water impoundments and then transferred into the Resaca system. The detention time in the reservoirs averages four (4) to six (6) days prior to being pumped to the resacas. During 2023, the raw water alkalinity averaged 134 mg/L, and had a maximum concentration of 175 mg/L. The Resaca sediments generally can be considered very soft, saturated in consistency and moderately to highly plastic in nature. They are generally comprised mainly of silt/clay particles and their in-situ characteristics resemble those typical of recent deposits in low flow environments. The sediment in the areas currently dredged consist of Dark Gray Fat Clay and are considered moderately to highly plastic. Liquid limits ranging from 52% to 97%. These soils contain approximately 90 to 99% clay/silt size particles as indicated by

minus #200 sieve tests. Please note that sediments do vary from Resaca to Resaca and thus require that sediment sampling and polymer adjustment occur when relocating to a different segment.

1.3.3 LOCATIONS FOR DELIVERY AND USE

Brownsville PUB
Resaca Maintenance Warehouse
103 North Park Drive
Brownsville, Texas 78520

1.3.4 CURRENT POLYMER

A dual polymer treatment program consisting of both cationic and anionic polymer is currently being applied to dewater Resaca sediment. The polymers are both highly charged viscous liquids.

The proposed water soluble polymers shall be highly charged viscous polymers. At a minimum, the proposal shall include polymer unit costs and required dosages to achieve at least thirty percent (30%) cake solids and filtrate of <100 mg/L total suspended solids (TSS).

1.4 DELIVERY REQUIREMENTS

1.4.1 PRODUCT DELIVERY REQUIREMENTS

Vendor shall provide for the delivery of the polymer in a timely manner as specified below. Delivery shall meet all OSHA and DOT Regulations and any other Federal and State Regulations that are applicable.

A Safety Data Sheet (SDS) and quality control data shall be provided with each delivery. The product that is delivered is subject to inspection and testing by Brownsville PUB personnel.

The containers shall be approximately 2300-pound totes and must comply in every respect with the Hazardous Material Regulations of the Department of Transportation.

Brownsville Public Utilities Board will reject any containers that show evidence of leakage, damage, or corrosion. Totes shall be in good mechanical order. Should the condition of the tote not conform to any recommended practice, in all applicable respects, the vendor will be called immediately and the vendor shall take action to correct the problem as soon as possible.

No shipment will be allowed to be unloaded without prior consent from plant personnel on-site. **All drivers shall wear all necessary personal protection equipment while connecting, unloading, and disconnecting containers.**

Successful vendor shall be able to deliver polymer within two (2) weeks after request and sooner in cases of emergencies. Delivery hours are Monday thru Friday from 8:00 AM to 4:00 PM. Notify Resaca Maintenance staff twenty-four (24) hours prior to delivery; at (956) 983-6562 and at (956) 983-6487.

1.4.2 QUANTITY

Estimated amount required is 62,100 pounds (27 each, 2,300-pound totes) of cationic and 62,100 pounds (27 each, 2,300-pound totes) of anionic for one (1) year. BPUB typically orders 9 totes of each chemical (for a total of 18 totes) per shipment, three times a year. Quantities may be increased or decreased to meet the requirements of the Brownsville Public Utilities Board, Resaca Maintenance Dewatering System.

1.5 QUALITY ASSURANCE

1.5.1 Vendors shall have a minimum of three (3) years certifiable experience with the type of dual polymer program proposed.

You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN.
