December 09, 2024

We are pleased to present the Fiscal Year 2025 Budget of the Public Utilities Board of the City of Brownsville, Texas (Brownsville PUB). This budget funds the Brownsville PUB's three essential utility services: Electric, Water, and Wastewater. This document is the final step in a process that begins in May and extends until the budget is finally adopted in September. It is the culmination of many weeks and months of discussion and preparation by department heads, various staff members within those departments, the Executive Team and the Board of Directors. This Budget is submitted in accordance with Brownsville PUB Bond Ordinance Requirements and is comprised of the Revenue Budget, Operations & Maintenance Expense (O&M) Budget, Debt Service and Capital Budget. As required, the document presents a balanced budget (i.e., expenses and transfers do not exceed revenues) of \$276.32 million. The budget has been prepared using the accrual basis of accounting. Revenues and expenses are subject to appropriation of the Brownsville PUB's enterprise fund. This budget supports our mission to reliably provide essential services and community support through our valued and dedicated workforce.

The Brownsville PUB's FY 2025 Budget supports the Board's strategic goals to be the foundation for our community's future through customer and community engagement, work force development and continuity, organizational preparedness and resiliency, process improvement, reliable infrastructure, and technology and innovation. All three utilities provide 24-hours-per-day/7 days-per-week/365 days-per-year operations and essential service delivery to meet our customers' electric, water and wastewater service needs. Without reducing services, we have prioritized funding to ensure system reliability, regulatory compliance, resource sustainability, health and safety, community benefits and jobs, as well as environmental stewardship.

The Budget is more than a projection of revenues and expenses for the upcoming year. The Budget is the financial guide for the operation of the Brownsville PUB during the upcoming fiscal year. The adoption o this document is one of the most significant actions taken by the Board annually. The Budget establishes the financial limits used to provide utility services to the Brownsville PUB customers. It serves as the ultimate guide for the General Manager & CEO and staff when planning, organizing and implementing the policies and practices needed to provide safe, reliable service at the most economical rates possible.

The Revenue, O&M, Debt Service and Capital Budgets were presented and approved by the Board on September 09, 2024.

The proposed O&M, Personnel and Capital Budgets have been thoroughly reviewed by Executive Management, Directors, Managers and Finance Staff. This group of personnel scrutinized each budget in detail with each Department Head and recommended changes in requested vs recommended amounts in order to balance the needs of all departments to the available funding levels.

The approved budget has a number of key decisions the Board considered as the budget was reviewed.

- In May 2022, the Brownsville City Commission approved rate adjustments. The water and wastewater rates will increase by 4% on January 1, 2025.
- Pay As You Go (PAYGO) CIP Funding: The approved budget includes \$55.4 million to fund Capital Improvement Projects with cash.
- Pay As You Go (PAYGO) Resaca CIP Funding: The approved budget includes \$1.4 million to fund Resaca Capital Improvement Projects with cash collected from the Resaca Fee.
- Inflationary Wage & Merit Adjustments The approved budget includes a 4% inflationary wage adjustment for all employees and \$500,000 for merit adjustments.

The budget preparation process and budget preparation calendar are presented in additional detail on pages 40 through 43.

FY 2025 BUDGET

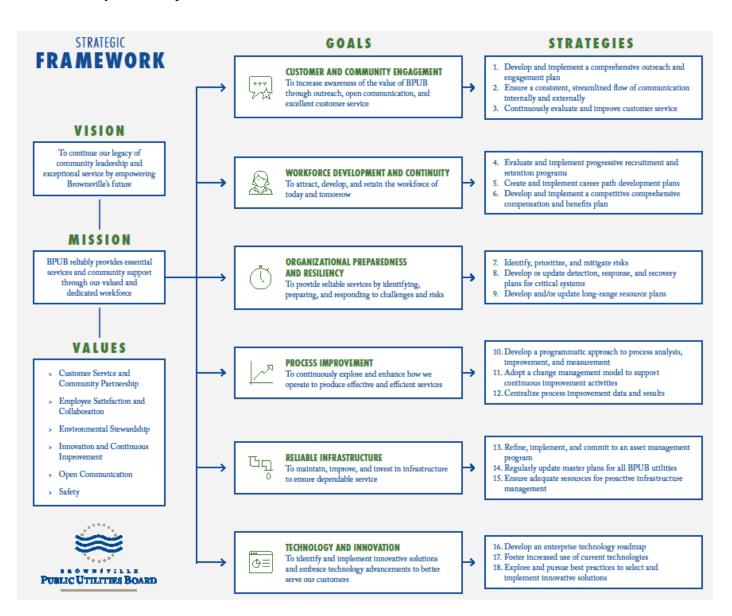

The Budget for FY 2025 is divided into six major sections:

- 1. **OVERVIEW** This section includes the following information:
 - a. Organizational Chart
 - b. Summary Letter
 - c. GFOA Distinguished Budget Presentation Award for FY Beginning 10/1/23
 - d. Budget Program
 - e. Budget Preparation Process & Procedures
 - f. Budget Preparation Calendar
 - g. Significant Financial Program Components
 - h. Total Combined Utility Requirements Chart
 - i. FY 2025 Uses of Funds Chart
 - j. FY 2025 Requirements as a Percent of Total Budget Chart
 - k. Budget Recap FY 2025 Revenues
 - 1. FY 2025 Revenues Utility Percent by Revenue Type Chart
 - m. O&M Expenses Recap by Type FY 2015 FY 2025
 - n. O&M Expenses Recap by Account FY 2020 FY 2025
 - o. O&M Expenses Recap by Department & Type FY 2025
 - p. O&M Expenses Recap by Department FY 2021 FY 2025
 - q. O&M Expenses Recap by Department FY 2025 Budget
 - r. FY 2025 Approved Budgeted Number of Positions by Division/Organization
 - s. Net Position Computation of Change in Net Position and Funds Available for Capital and Reserve Funds
 - t. Unit Sales Statistics
 - u. Outstanding Debt
 - v. Outstanding Principal Debt through Maturity Graph
 - w. Debt Service
 - x. Debt Service Requirements by Fiscal Year
- 2. **REVENUES** Contains the historical and forecasted revenues for each utility system, and discussion about revenue sources and trends.
- 3. **O&M EXPENSE BUDGET** Contains the Operations & Maintenance Expenses summarized by Department, and by Account. Also included is a description of each department's major functions, accomplishments and performance measures.
- 4. **CAPITAL BUDGET** Contains details of the funding sources and expenditures needed for facilities extensions, plant expansions and improvements, machinery, and vehicles.
- 5. **GRANTS** Contains details of grants, funding agencies, grant amounts, and grant period.
- 6. **APPENDICES** Contains a description of Brownsville PUB's Operations Expense Analysis by Account, maps of the Utility's service territory, a glossary and statistical section.

STRATEGIC PLAN

Brownsville PUB is currently operating under its 2019-2024 Strategic Plan. A Strategic Plan Refresh was underway in 2024 as the new Executive Team arrived at the utility. As part of the utility's realignment, the Executive Team moved the Strategic Planning function from Human Resources to the Operations business unit, which became effective in late 2024. As a result, the Executive Team decided to forgo the Strategic Plan Refresh and undertake a thorough and deliberate strategic planning process to develop the 2025-2030 Strategic Plan.

Brownsville PUB intends to develop a strategy during FY 2025 that ensures affordable utility services for the community, provides direction, aligns resources, measures performance, adapts to changes, communicates priorities, and guides decision-making to achieve long-term goals. The objective of the 2025-2030 Strategic Plan will be to ensure everyone is working towards common objectives efficiently and effectively in a transparent and deliberate manner.

UNIT SALES

Projected unit sales and revenues are based on three-year averages of historical data.

Projected unit sales are as follows:

| | | UNAUDITED | | | Percent Difference FY 2025 vs |
|----------------------------|-------------------|---------------------|-----------------------|---------------------|----------------------------------|
| _ | Budget FY 2024 | Year End FY 2024 | Percent Difference | Approved FY 2025 | UNAUDITED Year End FY 2024 |
| Electric (kWh) | 1,385,641,722 | 1,404,578,210 | 1.37% | 1,428,464,629 | 1.70% |
| Water (1,000 gallons) | 6,509,096 | 6,700,456 | 2.94% | 6,780,835 | 1.20% |
| Wastewater (1,000 gallons) | 4,788,424 | 4,741,990 | -0.97% | 4,987,281 | 5.17% |

REVENUES

The schedule below summarizes sales revenues, excluding electric off-system sales revenues, by utility system:

| | | UNAUD | ITED | | Percent Difference FY 2025 vs |
|----------------------|----------------------------|-----------------|---------------|---------------------|----------------------------------|
| | Approved Budget FY 2024 | Year E FY 20 | | Approved FY 2025 | UNAUDITED Year End FY 2024 |
| Electric | \$ 156,949,448 | \$ 149,5 | 95,192 -4.69% | \$ 170,650,887 | 14.08% |
| Water | 35,789,650 | 38,1 | 41,074 6.57% | 39,732,988 | 4.17% |
| Wastewater | 30,308,488 | 30,7 | 53,014 1.47% | 32,732,829 | 6.44% |
| Total Sales Revenues | \$ 223,047,586 | \$ 218,4 | 89,280 -2.04% | \$ 243,116,704 | 11.27% |

The schedule below summarizes total revenues by general category:

| | Ap | proved Budget FY 2025 | Percent of Total | Ap | proved Budget FY 2024 | Percent of Total |
|--|----|--------------------------|------------------|----|--------------------------|------------------|
| Sales & Service To Customers | \$ | 243,116,704 | 87.98% | \$ | 223,047,586 | 85.95% |
| Off-System Sales Revenue | | 10,000,000 | 3.62% | | 15,000,000 | 5.78% |
| Interest From Investments | | 5,100,000 | 1.85% | | 6,000,000 | 2.31% |
| Other Operating & Non-Operating Revenues | | 18,100,159 | 6.55% | | 15,462,519 | 5.96% |
| Total Revenues | \$ | 276,316,863 | 100.00% | \$ | 259,510,105 | 100.00% |

Projected electric unit sales in kilowatt hours are expected to increase in FY 2025 over FY 2024 unaudited Year-end by 1.70%. Comparing the approved FY 2025 vs approved FY 2024 sales revenue budget, electric base and fuel revenues are expected to increase by 8.73%.

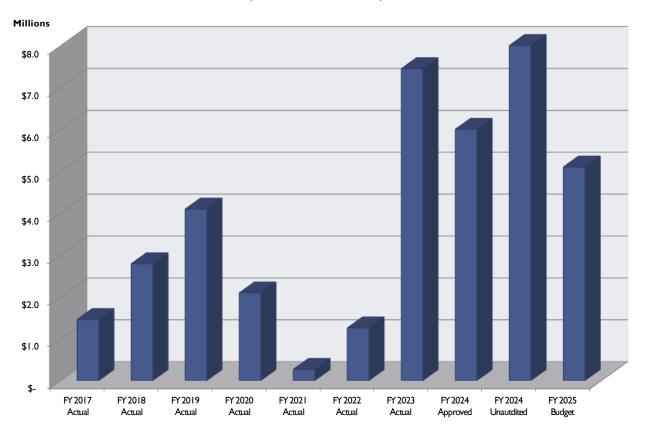

FY 2024 unaudited year-end water revenues were 6.57% higher than FY 2024 approved budget projections. Compared to budgeted water revenues for FY 2024, water revenues for FY 2025 are expected to increase by 11.02%. Wastewater revenues will increase by 8% for FY 2025 approved budget

compared to FY 2024 approved budget. The increases to water and wastewater revenue are largely attributed to approved rate increases.

Investment Income

The following chart illustrates actual and budgeted utility investment earnings over the past several fiscal years. Investment income which is conservatively projected based on projected investment balances is expected to decrease in FY 2025 vs actual unaudited FY 2024 and budgeted FY 2024.

Revenues are discussed in additional detail on pages 77 through 87.

RATES

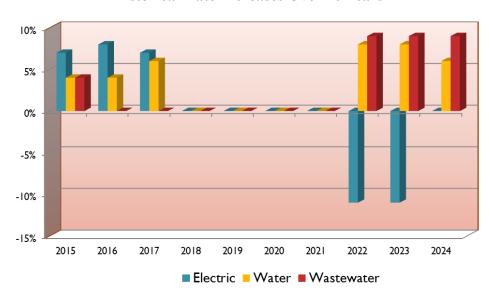

In May of 2022, the Brownsville City Commission approved rate adjustments. For fiscal year 2025 (effective January 1, 2025) the water and wastewater utilities will increase their base rates by 4%. While affordability is always a concern, the rate adjustments implemented this year will allow the Brownsville PUB to continue investing in core service areas including energy reliability, water quality and wastewater treatment services.

We will compare revenues to spending on a continual basis to ensure that adequate operating requirements and reserves are maintained and improved.

Historical Rate Increases

The following charts illustrate utility rate changes over the last ten (10) years.

Historical Rate Increases Over 10 Years

BASE RATE ADJUSTMENTS
SYSTEM RATE INCREASES - LAST TEN (10) YEARS

| FY | Electric | Water | Wastewater |

OPERATIONS & MAINTENANCE EXPENSE BUDGET

PERSONNEL

The FY 2025 Personnel Budget includes twenty-nine reclassified positions compared to the Original FY 2024 Budget. The reclassifications did not increase or decrease the total position count as approved in the FY 2024 Budget. However, during Fiscal Year 2024, one new position was approved by the Board of Directors. This position is included as an addition to the total positions approved for Fiscal Year 2025.

The following is a summary of FY 2024 changes:

| POSITIONS APPROVED FOR FY 2024 BUDGET | 631 |
|---------------------------------------|-----|
| | |

Board-Approved New Addition for Fiscal Year 2024

| Department | Department No. | |
|--------------------|-----------------------|---|
| Financial Services | 5115 | 1 |

The number of temporary full-time employees for FY 2025 is currently at 5 as illustrated on a separate schedule on page 28.

The approved Personnel Budget for FY 2024 totaled \$55,485,455 an increase of \$7,027,741 or 14.5%, as compared to the amended Personnel Budget for FY 2023. This increase was due to the implementation of the salary market study.

The approved Personnel Budget for FY 2025 totals \$60,098,974, an increase of \$4,613,519 or 8.3% from the approved FY 2024 Personnel Budget. This increase is due to the implementation of the inflationary wage adjustment, merit adjustment, and new positions.

| Non-personnel Expenses | | 46,234,994 | | 40,722,890 | 88.08% | 42,377,170 | 4.06% |
| Overall Total: | \$ | 203,698,187 | \$ | 182,823,583 | 89.75% | \$ 202,948,765 | 11.01% |

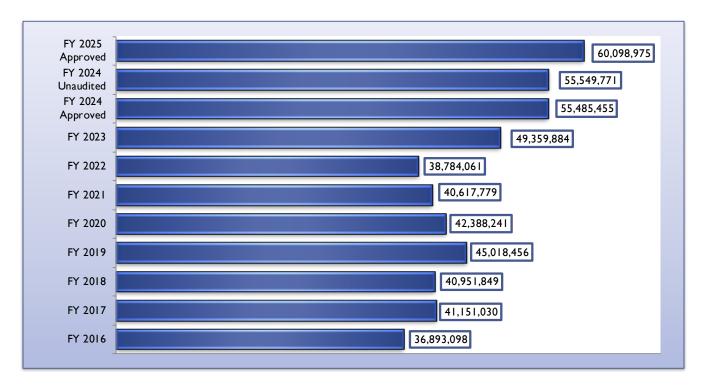

The following chart illustrates the cost of fuel and purchased energy to meet electric demand over the last several years. In FY 2016, Brownsville PUB had a total cost of \$55.45 million. The Approved FY 2025 Fuel & Energy Cost Budget is \$88.23 million. The 10-year history reflects an average increase of 2.50% per fiscal year. The unusually high costs in FY 2021 are a result of the Winter Storm Uri event in February 2021.

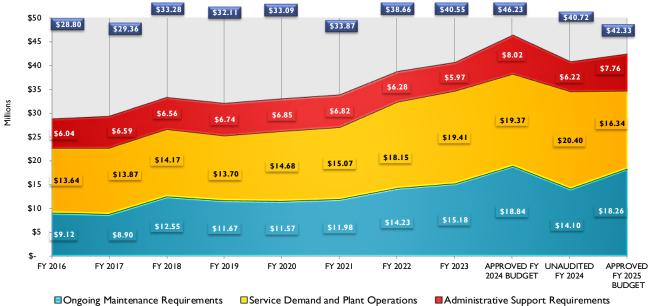

The following chart illustrates how the cost of off-system sales has fluctuated over the last ten years. In FY 2016, Brownsville PUB had a total cost of \$4.54 million. The Approved FY 2025 Off-System Sales Expenses Budget is \$5 million. The 10-year history represents an average increase of 1.02% per fiscal year. The unusually high costs in FY 2021 are a result of the Winter Storm Uri event in February 2021.

The following chart illustrates how the cost of personnel services has increased over the last several years. In FY 2016, Brownsville PUB had a total O&M personnel cost of \$36.89 million. The Approved FY 2025 O&M Personnel Budget is estimated at \$60.10 million. The \$2.44 million average yearly change is a result of added positions, market pay adjustments, promotions, health insurance, retirement, and other personnel benefit changes. This change averages 5.06% per fiscal year.

The O&M Non-personnel Services Budget includes all operating and maintenance expenses driven by ongoing plant and infrastructure maintenance requirements, service demand and plant operations, and administrative support requirements. The following chart provides historical expense trends for the Brownsville PUB.

DEBT SERVICE

A summary of each system's cost of borrowed money is on page 74, Debt Service section of this Budget.

The Brownsville PUB continues to have insured bond ratings from the national rating agencies. Standard & Poor's Global Ratings, a division of Standard & Poor's Global, has assigned short term insured ratings of AA. The Brownsville PUB underlying ratings on its senior lien debt are "A2", "A-" and "A-" by Moody's, Standard & Poor's, and Fitch Ratings, respectively.

Revenue bonds outstanding at September 30, 2024 and 2023 were \$254,450,000 and \$272,035,000 respectively. Interest on bonds is due semi-annually on March 1 and September 1, and the principal is due annually on September 1. Revenue bond debt service coverage for the Brownsville PUB's priority and second lien obligations was calculated at 2.98 and 3.05 times at September 30, 2024 and 2023, respectively.

On August 24, 2005, the Brownsville PUB sold \$163,725,000 in tax exempt bonds and \$56,855,000 in taxable bonds as part of a major debt restructuring. The tax-exempt bonds, Series 2005A, provided proceeds to refund \$50,890,000 in Series 1995 outstanding obligations, \$50,000,000 in Series 2001A and \$50,000,000 in Series 2001B variable rate outstanding obligations, and \$7,250,000 in outstanding commercial paper notes, and provided \$20,000,000 in new money bonds. The taxable bonds, Series 2005B, provided proceeds to defease \$27,420,000 in Series 1992 outstanding obligations and \$22,120,000 in Series 1995 outstanding obligations.

The Brownsville PUB issued \$77,805,000 in aggregate principal amount of Utilities System Revenue Refunding Bonds, Series 2008. The refunding bonds provided proceeds to defease \$40,000,000 of Commercial Paper Notes, Series 2004, \$32,285,000 of the Series 2002A Utility System Subordinate Lien Revenue and Refunding Bonds, and \$13,415,000 of the Series 2002B Utility System Subordinate Lien Revenue and Refunding Bonds.

On November 1, 2012, the Brownsville PUB issued \$840,000 City of Brownsville, Texas Utilities System Junior Lien Revenue Bonds, Series 2012, for the purpose of building, improving, extending, enlarging, and repairing the City's utilities system and to pay costs of issuance of the bonds.

On April 10, 2013, the Brownsville PUB issued \$118,185,000 in Utilities System Revenue Refunding Bonds, Series 2013. The refunding bonds provided proceeds to refund \$109,985,000 of Utility System Improvement and Refunding Bonds, Series 2005A. In addition, the proceeds provided funds of \$11,818,500 to make a cash deposit into the Debt Service Reserve Fund.

On July 15, 2015, the Brownsville PUB issued \$94,770,000 in Utilities System Revenue Refunding Bonds, Series 2015. The bonds provided proceeds to refund \$49,060,000 of Series 2005A Revenue Improvement & Refunding Bonds, \$27,815,000 of Series 2005B Revenue Refunding Bonds and \$5,480,000 of Series 2011 Revenue Refunding Bonds. In addition, the proceeds provided funds to defease \$20,000,000 in outstanding Commercial Paper Notes.

On May 17, 2016, the Brownsville PUB issued \$39,410,000 in Utilities System Revenue Refunding Bonds, Series 2016. The bonds provided proceeds to refund \$42,505,000 of Series 2008 Revenue Refunding Bonds.

On June 20, 2018, the Brownsville PUB issued \$14,000,000 in Utilities System Revenue Refunding Bonds, Series 2018. The bonds provided proceeds to refund \$340,000 of Series 2007 Junior Lien Revenue Bonds, \$9,585,000 of Series 2008 Revenue Refunding Bonds and \$5,055,000 of Series 2012 Revenue Refunding Bonds.

On July 29, 2020, The Brownsville PUB issued \$53,590,000 of Series 2020 tax exempt bonds and \$62,320,000 of Series 2020A taxable bonds. The tax-exempt bonds, Series 2020, provided funds to refund \$12,105,000 of Series 2012 Revenue Refunding Bonds. In addition, the proceeds provided funds to defease \$50,000,000 in outstanding Commercial Paper Notes. The taxable bonds, Series 2020A, provided funds to refund \$54,480,000 of outstanding Series 2013A Revenue Refunding Bonds.

On May 25, 2022, The Brownsville PUB issued \$17,165,000 of Series 2022 tax exempt bonds and \$35,605,000 of Series 2022A taxable bonds. The proceeds provided funds to defease \$53,000,000 in outstanding Commercial Paper Notes.

The Brownsville PUB's participation in the Southmost Regional Water Authority (SRWA) Reverse Osmosis Plant Project was complete and operational during 2005. The SRWA successfully issued \$30,975,000 in Water Supply Contract Revenue Bonds, Series 2002, during FY 2003 and has expended approximately 100% of bond proceeds in the construction of the desalination plant. The Series 2002 bonds were issued with insured ratings of "Aaa" and "AAA" by Moody's Investor Services and Fitch Ratings, respectively. The underlying ratings on the bonds were "A2" and "A" by Moody's and Fitch, respectively. The Brownsville PUB total interest in the project is 92.91%. The SRWA is considered a blended component unit of the Brownsville PUB. As a participating owner, the BPUB is obligated to contribute its percentage allocation of the SRWA's debt service obligations and annual system budget. The Brownsville PUB's total 2024 and 2023 contributions to the SRWA were \$7,257,738 and \$7,401,467 respectively. The Brownsville PUB's participation in the SRWA's desalination project provides the City with an alternate, long-term, drought-resistant source of drinking water.

On December 7, 2009, the SRWA issued \$9,295,000 in Water Supply Contract Revenue Bonds, Series 2009A and \$3,795,000 in Water Supply Contract Revenue Bonds, Series 2009B, through the Texas Water Development Board Drinking Water State Revolving Fund for the construction of a full-scale Micro Filtration Pretreatment System. The objective of this project is to achieve compliance with both existing and future maximum contaminant levels for arsenic in public drinking water by constructing a full-scale Micro Filtration Pretreatment System prior to entering the existing reverse osmosis treatment process. An additional need is to control and reduce iron levels to eliminate complaints of colored water. Project objectives also include an additional 1.0 million gallons per day of capacity through upgrading certain pumps within the existing well field and adding one additional reverse osmosis train.

The SRWA issued \$13,530,000 in Water Supply Contract Revenue Refunding Bonds Series 2012 on September 26, 2012. The refunding bonds provided proceeds to defease \$14,990,000 of the Series 2002 Revenue Bonds for the years 2013 through 2027.

On April 1, 2017, the SRWA issued \$9,255,000 in Water Supply Contract Revenue Refunding Bonds, Series 2017. The refunding bonds had a closing date of April 18, 2017, and the proceeds plus the bond premium were used to defease \$9,715,000 of the Series 2006 Water Supply Contract Revenue Refunding Bonds for the years 2020 through 2032.

SUMMARY OF DEBT SERVICE REQUIREMENTS

| | ACTUAL FY 2020 | ACTUAL FY 2021 | ACTUAL FY 2022 | ACTUAL FY 2023 | UNAUDITED ACTUAL FY 2024 | BUDGET FY 2025 | |
|-----------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|----------------------------|--|
| Principal Interest | \$ 14,358,196 11,585,595 | \$ 16,845,097 10,341,791 | \$ 17,517,553 10,627,412 | \$ 18,279,617 11,327,303 | \$ 16,909,367 11,596,765 | \$ 18,065,000 9,590,892 | |
| Total | \$ 25,943,791 | \$ 27,186,889 | \$ 28,144,965 | \$ 29,606,920 | \$ 28,506,132 | \$ 27,655,892 | |

Commercial Paper for FY 2025 is anticipated to incur \$830,000 of interest expense.

DEBT SERVICE COVERAGE RATIO

The Debt Service Coverage Ratio is estimated at 2.98 times for Year-end FY 2024, compared to 1.89 in the Approved FY 2024 Budget and 2.54 times budgeted for FY 2025. The Brownsville PUB's minimum coverage is 1.25 times per current bond covenants.

THE REMAINDER OF THIS PAGE INTENTIONALLY LEFT BLANK

CAPITAL BUDGET

The Board adopted the FY 2025 Capital Budget on September 09, 2024.

The FY 2025 Capital Budget totals \$76,099,290 which is \$15,618,075 less than the Brownsville PUB approved FY 2024 Budget of \$91,717,365. The Brownsville PUB's five-year capital needs increased from \$203.30 million in FY 2024 to \$232.96 million in FY 2025 for a total increase of \$29.66 million. A funding source summary and listing of construction projects and capital asset purchases are included in the Capital section of the Budget Document, beginning on page 253.

The Brownsville PUB is continuously updating a long-term Capital Improvement Plan (CIP) to prioritize use of available resources and scheduled short-term and long-term financing with minimal rate impact. If available resources are less than anticipated, Brownsville PUB will scale back on its CIP funding.

The projects proposed in the FY 2025 Capital Budget are crucial to efforts to continuously provide our present and future customers with the high-quality services and products that Brownsville PUB is committed to delivering. Many of the proposed capital projects are for renewals and replacements. Renewals and replacements are critical to Brownsville PUB's aging infrastructure, and generally increase our costs, but provide no additional revenue.

Of the projects budgeted for FY 2025, a sizeable portion is necessary for Brownsville PUB to stay in compliance with the requirements and standards set by governmental and regulatory agencies. The remainder of the FY 2025 Capital Budget includes a number of new projects and the continuation or completion of other projects that have already involved a considerable amount of time to design, permit, and construct.

Over the last 5-10 years, considerable renewal and replacement expenses have been incurred by the Brownsville PUB to correct or prevent problems. The Brownsville PUB staff continually strives to plan for and make system improvements to all three utility systems. Brownsville PUB's staff cannot accurately estimate the savings that are a direct result of capital improvements. However, staff is confident that O&M expenses are reduced shortly and long after the improvements are completed.

A recap of all the sources of funding for the Capital Budget can be found beginning on page 253.

The Brownsville PUB will use a combination of internally generated cash, grants, contributions-in-aid-of-construction, impact fees, and short-term debt obligations to fund the Capital Budget during FY 2025.

Capital projects are discussed in additional detail on pages 258 through 363.

The following table illustrates major expenditures that account for 67.34% of the total approved FY 2025 Capital Budget.

TRANSFER TO THE CITY OF BROWNSVILLE

Beginning in FY 2006 transfers to the City of Brownsville (City) are undertaken on a quarterly basis calculated at ten percent (10%) of gross revenues received for the preceding fiscal year quarter, as adjusted in accordance with the following bond covenant: (1) prior to applying the percentage set forth above to determine the amount to be transferred to the City, the amount of gross revenues for a fiscal year quarter shall be reduced by an amount equal to all costs for the purchase of power and fuel paid or incurred by the Brownsville PUB during such fiscal year quarter as well as funding requirements for SRWA and (2) the amount of funds to be transferred to the City shall be reduced by any amounts owed by the City to the Brownsville PUB for utility services.

The unaudited FY 2024 estimated year-end gross transfer is \$17,739,987, up \$1,986,749 from the FY 2024 Approved budget, with an estimated net cash transfer of \$11,650,576. The FY 2025 approved budget gross transfer is \$17,584,424.

The chart below shows the gross and net transfers to the City of Brownsville over the past nine years.

City of Brownsville Gross and Net Transfers (Dollars in Millions)

DISTINGUISHED BUDGET PRESENTATION AWARD

The Government Finance Officers Association of the United States and Canada (GFOA) presented a Distinguished Budget Presentation Award to the Brownsville PUB for its Annual Budget for the fiscal year beginning October 1, 2023. In order to receive this award, a governmental unit must publish a budget document that meets program criteria as a policy document, as an operations guide, as a financial plan, and as a communications device. The Fiscal Year beginning October 1, 2007 was the first year Brownsville PUB had received the award. This award is valid for a period of one year only. We believe our current Budget continues to conform to program requirements, and we are submitting it to the GFOA to determine its eligibility for another award.

ACKNOWLEDGEMENTS

The budget review was a very extensive process involving staff at all levels and areas of the organization. The entire Brownsville PUB staff is to be commended for the patience and cooperation exhibited during the continued refinement of the final approved budget. The General Manager & CEO, Assistant General Manager & COO, Chief Financial Officer, Chief Administrative Officer, General Counsel & Chief Legal Officer and financial staff closely analyzed each department's budget on a line-by-line basis. Work sessions were held with all Divisions to ensure proper documentation was presented to justify all requests.

We extend our personal thanks to the dedicated employees who spent many hours preparing, revising and finalizing this document.

We would also like to acknowledge the support of the Board of Directors for its continuing interest in the development of a strong financial system and balanced budget to serve the customers of the Brownsville PUB.

Respectfully submitted,

Marilyn D. Gilbert

BUDGET PROGRAM

Overview

It is the Brownsville PUB's practice to adopt a budget prior to the start of each year which begins October 1. The budget, in addition to the financial statements, is prepared on the accrual basis. The process leading to the budget adoption involves participation from all management and supervisor levels and includes a communications plan that encourages input and guidance from Board Members.

The budget focuses on identifying funding levels necessary to continue basic utility services, systems improvement priorities, and community goals. The Chief Financial Officer (CFO) provides the Board Members and the General Manager & CEO with information on projected revenues and funding requirements to enable the General Manager and Board Members to provide direction in formulating budget goals and objectives as well as budget strategies to achieve such goals.

The Brownsville PUB's FY 2024-25 budget is a balanced budget, with revenues and other financing sources equal to the expenditures and other financing uses.

Priorities

The Brownsville PUB has adopted a set of priorities for defining the Organization's mission. These priorities are used by the departments in formulating goals, objectives and measures when preparing their budgets.

Financial Program

The Brownsville PUB follows a comprehensive financial program that guides the financial practices including accounting and reporting practices, investments, and debt financing. These practices are reviewed by the Brownsville PUB CFO to ensure that the Utility is in compliance with Bond Covenants, GASB Statements, and state and Federal regulatory requirements. Recommendations for changes are submitted to the Board for approval when necessary. These financial program practices are explained in further detail in the significant financial program components section starting on page 44.

Restricted Use of Public Funds

The Brownsville PUB shall not lend its credit or gratuitously grant public money or things of value in aid of any individual, association, or corporation. The Brownsville PUB shall not grant any extra compensation, fee, or allowance to a public officer, agent, servant, or contractor after service has been rendered or a contract entered into and performed in whole or in part without Board approval. Nor shall the Brownsville PUB pay or authorize the payment of any claim against the Brownsville PUB under any agreement or contract made without authority of law.

No public funds of the Brownsville PUB may be spent in any manner other than as provided for in the budget adopted or amended by the Board.

BUDGET PREPARATION PROCESS & PROCEDURES

Preface

Budgeting is the process of allocating resources to the prioritized needs of the Brownsville PUB. Although budget formats and practices are by no means uniform in the public utility industry, formal budgets play a major role in the planning, control, and evaluation of operations. The adoption of the budget implies that a set of decisions have been made by the Board and Brownsville PUB's General Manager & CEO which culminate in matching Brownsville PUB's resources with its needs. This enables Administration to execute and control the activities that have been approved by the budget and evaluate performance based upon comparisons between budgeted and actual expenses.

Objectives of Budgeting

Performance evaluations allow citizens and taxpayers to hold policy makers and administrators accountable for their actions. Because accountability to citizens often is stated explicitly in state laws and constitutions, it is considered a cornerstone of budgeting and financial reporting. The Governmental Accounting Standards Board (GASB) recognizes its importance and has outlined the following objectives taken from *GASB Concepts Statement No. 1 (Paragraph 77)*:

- Financial reporting should provide information to determine whether current-year revenues were sufficient to pay for current-year services.
- Financial reporting should demonstrate whether resources were obtained and used in accordance with the entity's legally adopted budget. It should also demonstrate compliance with the Bond Covenant and other finance-related legal or contractual requirements.
- Financial reporting should provide information to assist users in assessing the service efforts, costs, and accomplishments of the governmental entity.

Meeting these objectives requires budget preparation to include several concepts recognizing accountability. Often these concepts have been mandated for state and local public sector budgets. They include requirements that budgets should:

- Be balanced so that current revenues are sufficient to pay for current services.
- Be prepared in accordance with all applicable Bond Covenant, Federal, state, and local legal mandates and requirements.
- Provide a basis for the evaluation of a governmental utilities service effort, cost and accomplishments.
- Attempt to provide adequate Improvement Funds for "normal" capital activities by utility.

Budget Process Overview

The budgeting process is comprised of three major phases: planning, preparation, and evaluation. It begins with sound planning. Planning defines the goals and objectives the Board has established and defines the strategy that Brownsville PUB's General Manager & CEO will implement to attain those

goals and objectives. Once the strategy has been established, budgetary resource allocations are initiated to support them. Budgetary resource allocations are the preparation phase of budgeting.

Finally, the budget is evaluated for its effectiveness in attaining goals and objectives. Evaluation typically involves an examination of how funds are expended, what outcomes result from the expense of funds, and to what degree these outcomes achieve the objectives stated during the planning phase. This evaluation phase is important in determining the following year's budgetary allocations. Budget preparation is not a one-time exercise to determine how Brownsville PUB will allocate funds. Rather, it is part of a continuous cycle of planning and evaluation necessary to achieve the established goals.

Annual Budget Process

The CFO established a budget process to comply with the Brownsville PUB Bond Ordinance and GASB guidance requiring a balanced budget. A line-item budgeting format has been selected primarily because of its simplicity and control orientation. Brownsville PUB bases the budget upon historical expenses and revenue data. The development process is comprised of the following:

- Discussion with the General Manager & CEO and Assistant General Manager & COO to set Brownsville PUB goals and budget timetable to comply with the Board's goals and objectives.
- The Financial Planning Team prepares budget packets for the Directors and Managers. Packets will have detailed instructions to help estimate O&M and capital requirements. All line item accounts must be accompanied by a justification. Capital funding requests will be evaluated by established sub-teams for each category in the Capital Fund. Budget Team recommendations will be forwarded to the Financial Planning Team for inclusion in the first budget draft. Additionally, a 5-year Capital Project Budget is included for Director's review and prioritization.
- Budget draft is reviewed and balanced by the General Manager & CEO, the Assistant General Manager & COO, CFO, CAO, CLO.
- Balanced budget is presented to the Board for approval.

Approved Detailed Budget Procedures

The Financial Planning Team established the following internal controls to ensure operational compliance with the Brownsville PUB's Board-Approved Budget (O&M and Capital). Management has identified possible issues that could compromise the budget's integrity and implemented procedures to define, address or prevent their occurrence.

- <u>Line-item Budget Purchases</u> The Banner accounting system provides management the ability to analyze and control spending through a line-item budget process. The requisition and encumbrance process is dependent on available funds within an organization's account structure.
- <u>Budget Changes</u> Management has the option of re-allocating budgeted funds within a department, within a division or among other divisions This may be necessary to initiate a purchase if funds are unavailable in a certain account. An approved <u>Budget Change Form</u> is required before changes to the budget are processed.

- <u>Budget Amendments</u> Management will request increases to the Approved Budget only after they have looked within the Organization for available funds and the request is a result of an extraordinary requirement or emergency situation. This may be necessary throughout the year to address unexpected requirements for additional resources. Board approval is required before amendments to the combined system revenue and revenue requirements budget are processed.
- <u>Personnel Additions</u> Personnel additions that increase the Board-approved position control total cannot be processed without a budget amendment. However, management can choose to reclassify open positions to address immediate staffing needs without Board approval as long as the dollar amounts or number of employees do not increase the approved budget totals. Reclassifying positions are generally allowed as long as the positions are at the same or at a lower pay level. In cases where management feels a need to reclassify a position to a higher level and after Human Resources has approved the reclassification, securing the funding with the Financial Planning Team will be the next step. Funding in these cases would mean sacrificing the salaries of two approved positions to fund the higher salaried position either by reclassifying the approved position to a lower pay grade or temporarily unfunding and suspending the approved position. The Financial Planning Team and the Human Resource Department can present management with the available options to fund the reclassification of the position requested.

Six-Month Budget Review Process

Brownsville PUB's Six-Month Budget Review enables management to evaluate mid-year performance and address unplanned expenses. During the normal course of business, there are strong possibilities that extraordinary circumstances deplete available funds. The review can be used as the tool to request budget increases, identify funding deficiencies, and predict future expenses based on mid-year totals. The evaluation process and possible budget increases will be governed by the following:

- Requests of additional O&M Funds will not exceed the calculated total of additional revenues estimated to be collected for the remainder of the year.
- Requests of additional Capital Funds must first be funded from available funds from closed projects or funds deferred from current active projects. Request total cannot exceed approved capital fund total.
- Requests for permanent employee positions will not be considered after the budget is adopted until all approved positions are filled or the reclassification of open positions has been exhausted.
- Any existing deficit accounts must be cleared within a department or division before Directors or Managers can consider requesting additional funds for extraordinary expenses.
- Budget analysis may identify possible available funds within a department or division prompting a transfer to the Contingency account. The funds will be swept from the accounts unless Directors and Managers can document and justify that the funds are vital to their department's operations in the remaining six months of the fiscal year. The CFO will initiate this procedure based on the expense justification and Brownsville PUB's financial position. Additionally, the presence of extraordinary expenses that impact revenues, customer services, production of services, safety, Federal/state regulations, and employee benefits will influence the decision-making process.

NOTES

1. The Southmost Regional Water Authority (SRWA) Budget was approved on August 5, 2024.

SIGNIFICANT FINANCIAL PROGRAM COMPONENTS

The accounting practices of Brownsville PUB conform to generally accepted accounting principles (GAAP) as applicable to local governmental units. The following is a summary of the more significant components:

The Reporting Entity

The Brownsville PUB was formed in 1960 to provide electrical, water, and wastewater services to its customers in the Brownsville area. The financial statements of the Brownsville PUB are prepared in conformity with accounting principles generally accepted in the United States of America as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles.

The Brownsville PUB is a component unit of the City of Brownsville, Texas as defined in GASB Statement No. 14, the Reporting Entity as amended by GASB Statement No. 39, determining whether certain organizations are component units. It is a separate operating authority established by the City's charter. Its purpose is to own, operate, and maintain a combined utilities system which provides the City and certain adjacent unincorporated areas with electricity, water, and wastewater services. The specific elements of oversight responsibility of the Brownsville PUB is the appointment by the City Commission of six of the seven-member governing board with the Mayor of the City serving Ex-Officio as the seventh member. Each appointed Board Member serves a four-year term. The Brownsville PUB does not have the right to encumber, sell, or hypothecate the utilities system. The specific elements of accountability for fiscal matters are (1) the City Commission is vested with the right to set utility rates and (2) the City is vested with the right to authorize the issuance of debt for the utilities system. Further, the Brownsville PUB is not required to pay any property taxes or franchise taxes to the City and the City pays for the utility services furnished to the City by the Brownsville PUB in accordance with bond covenants that address Transfers to the City.

The reporting entity of the Brownsville PUB consists of the primary and a blended component unit, the SRWA. The SRWA is a conservation and reclamation district created pursuant to Article XVI, Section 59, of the Texas Constitution and the Act of June 12, 1981, 67th Leg., Ch. 511, 1981 Tex. Gen. Laws 2196. The SRWA provides treated water to various areas of Cameron County. Essential disclosures related to SRWA are included in its complete financial statements. These statements may be obtained at P.O. Box 3270, Brownsville, Texas 78523-3270, c/o Finance Department.

<u>Fund Accounting, Measurement Focus, Basis of Accounting, and Financial Statement Presentation</u>

The Brownsville PUB is a single enterprise fund, which is organized on the basis of systems (Electric, Water and Wastewater), each of which is considered a separate accounting entity. Resources are allocated to, and accounted for in these systems based upon the purpose for which they are to be spent. For external reporting purposes, these systems are combined.

The budget, as well as the financial statements, are prepared on the accrual basis; budgeted revenues will be recognized when earned and budgeted expenses will be recognized when incurred, regardless of the timing of related cash flows. The expenditure budget is prepared on a comparable basis to Generally Accepted Accounting Principles, with the exception of debt service (including principal and interest)

that is budgeted in full when due. Depreciation and interest expense are recorded as expenses for financial statement purposes (depreciation is not budgeted).

The annual audited financial statements are presented in accordance with accounting standards generally accepted in the United States of America for proprietary funds of governmental entities. The Brownsville PUB complies with all applicable pronouncements of the GASB. The Brownsville PUB is accounted for as a proprietary fund. Proprietary funds are used to account for operations that are financed and operated in a manner similar to private business enterprises where the intent is to recover the cost of operations through user charges. A proprietary fund is accounted for on the "economic resources" measurement focus using the accrual basis of accounting, under which revenues are recognized in the accounting period in which they are earned and the related expenses are recorded in the accounting period incurred, if measurable. All assets and liabilities are included on the balance sheet. In accordance with GASB Statement No. 20, Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities that Use Proprietary Fund Accounting, the Brownsville PUB has elected not to follow pronouncements of the Financial Accounting Standards Board (FASB) issued after November 30, 1989.

Flow of Funds Bond Ordinance Covenants

City Ordinance No. 2005-1438 established certain "funds". These "funds" are mandatory asset segregation and not funds in the sense of governmental fiscal and accounting entities with self-balancing sets of accounts.

The following paragraphs briefly describe in summary form the manner in which Gross Revenues and Net Revenues are utilized and their priority of payment.

<u>Plant Fund</u>... The Ordinance requires all Gross Revenues to be deposited by the Brownsville PUB, as collected and received, into a separate account known as the Plant Fund. All Gross Revenues deposited into the Plant Fund shall be transferred for the following uses and in the order of priority shown below:

FIRST: to the payment of all necessary and reasonable Operating and Maintenance Expenses as defined in the Ordinance or required by statute (including, but not limited to, Chapter 1502, Texas Government Code, as amended) to be a first charge on and claim against the Gross Revenues, including the establishment of a fuel adjustment subaccount or similar accounts. In addition, the Brownsville PUB is required to retain in the Plant Fund a reserve amount to pay Operating and Maintenance Expenses of not less than two months of budgeted Operating and Maintenance Expenses for the current Fiscal Year (the "Operating Reserve Fund") which amount was funded initially in the amount of \$12,500,000 with lawfully available funds of the Brownsville PUB, and will be replenished as described in subparagraph ELEVENTH below.

SECOND: to the payment of the amounts required to be deposited into the Debt Service Fund created and established for the payment of the Senior Lien Obligations as the same become due and payable. (See "Debt Service Fund" below.)

THIRD: to the payment of the amounts required to be deposited into the Senior Lien Reserve Fund and other debt service reserves for Senior Lien Obligations created and established in accordance with the Ordinance to maintain the amounts required to be deposited in accordance with the provisions of the Ordinance or the ordinances relating to the issuance of any Additional Senior Lien Obligations.

FOURTH: to the payment of the amounts required to be deposited into the debt service fund created and established for the payment of the currently outstanding Junior Lien Obligations or any Additional Junior Lien Obligations hereafter issued by the City as the same become due and payable.

FIFTH: to the payment of the amounts required to be deposited into the reserve fund created and established in connection with the Junior Lien Obligations to maintain the amounts required to be deposited in accordance with the provisions of the ordinances relating to the issuance of the currently outstanding Junior Lien Obligations or any Additional Junior Lien Obligations hereafter issued by the City.

SIXTH: to the payment of the amounts required to be deposited into the debt service fund created and established for the payment of the Commercial Paper Obligations (to the extent the Commercial Paper Obligations are payable from a subordinate lien on the Net Revenues), or any Subordinate Lien Obligations hereafter issued by the City as the same become due and payable.

SEVENTH: to the payment of the amounts required to be deposited into the reserve fund, if any, created and established to maintain the amounts required to be deposited in accordance with the provisions of the ordinances relating to the currently outstanding Commercial Paper Obligations (to the extent the Commercial Paper Obligations are payable from a subordinate lien on the Net Revenues), or any Subordinate Lien Obligations hereafter issued by the City as the same become due and payable.

EIGHTH: to the payment of the amounts required to be deposited into the debt service fund created and established for the payment of any Inferior Lien Obligations as the same become due and payable.

NINTH: to the payment of the amounts required to be deposited into the reserve fund, if any, created and established to maintain the amounts required to be deposited in accordance with the provisions of the ordinances relating to the issuance of any Inferior Lien Obligations.

TENTH: to the payment of the amounts to be deposited into the City Transfer Fund and to be transferred to the City's General Fund as provided in the Ordinance. (See "Transfers to the City's General Fund" below.)

ELEVENTH: to the payment of the amount to replenish the Operating Reserve Fund to the amount required in subparagraph FIRST above.

TWELFTH: to the payment of the accrual to fund or to replenish the Capital Improvement Fund created and established by the Ordinance, along with the accumulation of any other surplus Net Revenues. (See "Capital Improvement Fund" below.)

<u>Debt Service Fund</u> . . . For purposes of providing funds to pay the principal of, premium, if any, and interest on the Senior Lien Obligations as the same become due and payable, the Brownsville PUB is required to maintain, at the Depository, a separate and special account or fund known as the Debt Service Fund. The Brownsville PUB is required to deposit into the Debt Service Fund prior to each principal and interest payment date from the available Net Revenues an amount equal to the amount required to fully pay the interest on and the principal of the Senior Lien Obligations then falling due and payable, such deposits to pay maturing principal and accrued interest on the Senior Lien Obligations to

be made by the Brownsville PUB in substantially equal monthly installments on or before the business day before the 15th day of each month, beginning on or before the business day before the 15th day of the month next following the delivery of the Bonds to the Underwriters. If the Net Revenues in any month are insufficient to make the required payments into the Debt Service Fund, then the amount of any deficiency in such payment is required to be added to the amount otherwise required to be paid into the Debt Service Fund in the next month.

Senior Lien Reserve Fund . . . The Ordinance requires the Brownsville PUB to create, establish, and maintain with a Depository a separate and special fund or account known as the Senior Lien Reserve Fund for the purpose of accumulating a reserve for the payment of the Senior Lien Obligations equal to the least of (1) 100% of the Maximum Annual Debt Service Requirements for the Senior Lien Obligations, (2) 125% of the Average Annual Debt Service Requirements for the Senior Lien Obligations and (3) 10% of the initial principal amount of the Outstanding Senior Lien Obligations (calculated by the Brownsville PUB at the beginning of each Fiscal Year and as of the date of issuance of the Bonds and each series of Additional Senior Lien Obligations) (the "Required Reserve Amount").

Junior Lien Reserve Fund . . . To accumulate and maintain a reserve for the payment of the Junior Lien Obligations equal to 100% of the Average Annual Debt Service Requirements (calculated by the Brownsville PUB at the beginning of each Fiscal Year and as of the date of issuance of each series of Additional Junior Lien Obligations) for the Junior Lien Obligations (the Junior Lien Required Reserve Amount), the Issuer agrees that the Brownsville PUB will create and establish, and shall maintain a separate and special fund or account known as the "City of Brownsville, Texas Utilities System Junior Lien Revenue Bond Reserve Fund" (the Junior Lien Reserve Fund), which Fund shall be maintained at the Depository. All funds deposited into the Junior Lien Reserve Fund shall be used solely for the payment of the principal of and interest on the Junior Lien Obligations, when and to the extent other funds available for such purposes are insufficient, and, in addition, may be used to retire the last Stated Maturity or Stated Maturities of or interest on the Junior Lien Obligations.

Transfers to the City's General Fund . . . For purposes of providing funds to transfer to the City's General Fund, the Ordinance requires the Brownsville PUB to create and maintain at the Depository a separate and special account or fund to be known as the City Transfer Fund. The Brownsville PUB is required to deposit into the City Transfer Fund from the available Adjusted Revenues an amount equal to one-third of the quarterly amount hereinafter described to be made by the Brownsville PUB to the City in substantially equal monthly installments on or before the business day before the 15th day of each month, beginning on or before the business day before the 15th day of the month next following the delivery of the Bonds to the Underwriters. After making each of the payments required by the provisions of subparagraphs FIRST through NINTH as described above under "Funds and Accounts and Flow of Funds - Plant Fund", the Designated Chief Financial Officer of the Brownsville PUB is required to transfer no later than the business day preceding the 15th day of the month following the end of each Fiscal Year quarter, an amount of money from the City Transfer Fund equal to ten percent (10%) (or such lesser amount as may be determined from time to time by the City Commission of the City) of the Gross Revenues received for the preceding Fiscal Year quarter, as adjusted in accordance with the next two following sentences, to be utilized by the City in the manner permitted by the provisions of Chapter 1502, as amended, Texas Government Code. Prior to applying the percentage set forth in the preceding sentence to determine the amount to be transferred to the City, the amount of Gross Revenues for a Fiscal Year quarter shall be reduced by an amount equal to all costs for the purchase of power, fuel and paid or incurred by the Brownsville PUB during such Fiscal Year quarter and by amounts paid by the Brownsville PUB to the Southmost Regional Water Authority with respect to the Southmost water project. Furthermore the amount of funds to be transferred to the City in accordance with the provisions

of the Ordinance shall be reduced by any amounts owed by the City to the Brownsville PUB for utility services provided by the Brownsville PUB. To the extent that the available Net Revenues in any quarter are insufficient for the Brownsville PUB to make all or part of the required transfer to the City, the Brownsville PUB shall make up such shortfall (i) in the next quarter in which available Net Revenues exceed the amounts required to make the transfer to the City pursuant to the foregoing provisions and the payment to the Operating Reserve Fund under the provisions of the Ordinance, or (ii) to the extent such shortfall has not been made up by the last quarter of the Fiscal Year, solely from any surplus funds deposited into the Capital Improvement Fund for such Fiscal Year.

<u>Capital Improvement Fund</u>... The Ordinance creates and establishes a special fund known as the Capital Improvement Fund. Money on deposit in the Capital Improvement Fund may be used for making any capital improvements to the System and for meeting contingencies of any nature in connection with the operations, maintenance, improvement, replacement, or relocation of properties constituting the System including, but not limited to, the replacement of any equipment relating to the System, as may be determined from time to time by the Brownsville PUB, and to fund the costs of any rate stabilization subaccount or any other similar subaccounts.

The Ordinance requires the City to deposit Net Revenues of the System, after making each of the payments required by the provisions of subparagraphs FIRST through ELEVENTH as described above under "Funds and Accounts and Flow of Funds - Plant Fund", into a Capital Improvement Reserve Fund of the Capital Improvement Fund in an annual sum equal to \$3,000,000 until the amount on deposit in the Capital Improvement Reserve Fund of the Capital Improvement Fund equals or exceeds \$15,000,000 (the "Capital Amount"). In the event that such annual payments are not made, the Brownsville PUB is required to request the City to establish sufficient rates and charges for the System to cure any such deficiency with respect to the accumulation of the Capital Amount within one year. When and so long as the cash and investments in the Capital Improvement Reserve Fund of the Capital Improvement Fund equals the Capital Amount, no deposits will be required to be made to the credit of the Capital Improvement Reserve Fund of the Capital Improvement Fund; but, if and when the Capital Improvement Reserve Fund Account of the Capital Improvement Fund at any time contains less than the Capital Amount, the City is required to cure the deficiency in the Capital Amount by resuming monthly deposits to said Fund from Net Revenues of the System, or at the option of the City from any other lawfully available funds, such monthly deposits to be in amounts equal to not less than 1/36th of the Capital Amount covenanted by the City to be maintained in the Capital Improvement Fund.

Budgetary Controls

Controls are in place to reduce the possibility of overspending in individual line items. Requisitions that exceed budgeted amounts are flagged as such, and are not converted to purchase orders until the overbudget condition is corrected. This is accomplished by allowing departments to transfer budgets between line items within their purview.

Operating Revenues and Expenses

Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with the Brownsville PUB's principal ongoing operations. The principal operating revenues of the Brownsville PUB are charges to customers for sales and services. Operating expenses include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

The Brownsville PUB defines operating revenues consistent with the precepts of GASB Statement No. 9, paragraphs 16 to 19 and 31: cash receipts from customers, cash receipts from quasi-external transactions with the City and other governments, and other cash receipts that do not result from transactions defined as capital and related financing, non-capital financing, or investment activities.

Utility Service Revenue and Electric Purchased Power Expense

Electric, water, and wastewater revenues are recognized as billed on a cycle basis with recognition of unbilled revenues year-end, based upon the meter reading dates for the unbilled portion of each cycle. Electric rate schedules include power cost adjustment clauses that permit recovery of purchased power costs, not included in base rates, in the month after such costs are incurred. The Brownsville PUB charges to expense the cost of purchased power in the period of purchase.

Capital Assets

Utility plant-in-service is stated at cost which generally includes the cost of contracted services and certain materials and labor. Maintenance and repairs of property and items determined to be less than units of property are charged to operating and maintenance expenses; major plant replacements are capitalized. Assets acquired through contributions, such as those from land developers, are capitalized at estimated fair value at the date contributed. Capital assets are defined by the Brownsville PUB as assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of eighteen months.

Meter and line transformer inventory have been included in utility plant to conform to Federal Energy Regulatory Commission guidelines.

Depreciation is computed using the straight-line method over the estimated useful lives of the assets.

Investments

The Brownsville PUB invests funds in accordance with the Texas Public Funds Investment Act, bond indentures, and the Brownsville PUB's approved investment policy, which is approved annually by the Board of Directors. The investment policy was approved by the Board of Directors on September 09, 2024, which included an "Investment Strategy Statement" that addressed the understanding of investment suitability, the preservation and safety of principal, liquidity, marketability of the investment prior to maturity, diversification, and yield of the investment portfolio.

Investments consist primarily of United States Treasury Obligations, certificates of deposit, and government-backed securities. Statues authorize the Brownsville PUB to invest in obligations of the United States or its agencies and instrumentalities; direct obligations of the State of Texas or its agencies; obligations of states, agencies, counties, cities and other political subdivisions of any state rated not less than A or its equivalent; certificates of deposit; prime domestic bankers' acceptances; eligible investment pools; certain commercial paper; certain mutual funds; and fully collateralized repurchase agreements. Investments are made only with certified brokers/dealers as required by the investment policy provisions and state law.

The Brownsville PUB follows the provisions of GASB Statement No. 31, Accounting and Financial Reporting for Certain Investments and for External Investment Pools. In accordance with GASB No. 31, the Brownsville PUB's general policy is to report short-term investments at amortized cost. All

other investments are reported at fair value. The term "short-term" refers to investments that have a remaining term to maturity of one year or less at time of purchase. Fair value determinations of all securities are made on a quarterly basis.

Cash Management Policies and Practices

During the year, cash is invested in money market mutual funds, certificates of deposit, agencies, and various investment pools as either short term or long-term investments. Cash deposits are properly secured at all times per Brownsville PUB's Investment Policy. Accordingly, cash deposits are either insured by federal depository insurance or collateralized. All collateral on deposits is held by a third-party institution in the Brownsville PUB's name.

Capital Spending Guidelines

Working as a team, Department Heads and key staff members developed a comprehensive departmental and system wide capital improvements plan, taking into consideration both expansion and major rehabilitation. After completion, the team met to discuss and evaluate the plans based on available working capital, anticipated impact fee collections, grant funding and long-term financing to determine which projects were prudent.

The Capital Improvement Plan (CIP) was then incorporated into the Capital Budget and put through the same rigorous scrutiny as the other budgets to determine which projects/items would be funded in this fiscal year.

At the time major capital expenditures are initiated, or when capital projects cannot be funded from rates or other sources, staff seeks Board approval to obtain alternative financing through bonds or short-term commercial paper (CP) issues.

Commercial Paper Program

Short term debt, including commercial paper notes, shall be used when authorized for interim financing of capital projects approved by BPUB Board and to take advantage of lower interest rates in the short-term variable rate market, which provide the BPUB with flexibility in timing its entry into the long-term fixed rate market. Commercial paper notes shall be used for funding additions, improvements and extensions to the combined electric system, waterworks system, and sewer system included in BPUB's annual CIP plan as approved by the Board.

Capital projects should be financed through a combination of cash referred to as pay-as-you-go financing (equity contributions from current net revenues) and debt. An annual funding ratio between 15% and 30% of equity contribution is desirable.

Commercial Paper will be paid with cash or refunded with long term revenue refunding bonds when economic and business conditions are appropriate. Debt financing for capital projects will not exceed the useful life of the asset, and in no case shall the term exceed 30 years. There shall always be at least interest paid in the first fiscal year after the sale of the revenue refunding bonds and principle starting generally no later than the second fiscal year after the issue. Bond sales which are structured to achieve level debt service payments on an issue by issue basis are desirable.

Debt Service Coverage Ratio

The Debt Service Coverage Ratio is estimated at 2.54 for FY 2025, compared to 2.98 unaudited actual for FY 2024, and 1.89 in the approved FY 2024 Budget.

The Utility's minimum coverage for Senior lien debt is 1.25 times which is required by bond covenants.

Transfers to the City

The issuance of the 2005A and 2005B refunding bonds modified certain existing covenants which included the calculation of the transfers to the City. Beginning FY 2006, transfers to the City are made on a quarterly basis calculated at ten percent (10%) of the gross revenues received for the preceding fiscal year quarter, as adjusted in accordance with the following: (1) prior to applying the percentage set forth above to determine the amount to be transferred to the City, the amount of gross revenues for a fiscal year quarter shall be reduced by an amount equal to all costs for the purchase of power and fuel paid or incurred by the Brownsville PUB during such fiscal year quarter as well as funding requirements for the SRWA and (2) the amount of funds to be transferred to the City shall be reduced by any amounts owed by the City to the Brownsville PUB for utility services.

Prior to FY 2006, Article VI of the Charter provided for the transfer to the City's general fund by the Brownsville PUB from "Surplus Funds" available at the close of each fiscal year (after retaining in the Plant Fund an amount deemed by the Brownsville PUB to be sufficient to pay system operation and maintenance expenses for the next 60 days), to the extent available, the greater of \$400,000 or 50% of such surplus funds. Surplus funds, as defined in the Charter, are amounts remaining in the Plant Fund at the close of each fiscal year after all Charter requirements and after all payments have been fully and timely made into funds created by ordinances authorizing outstanding bonds secured by a pledge of the system's net revenues. Required payments to the City for the years ended September 30, 2024 and 2023 totaled \$11,650,576 and \$12,055,925, respectively, of which \$3,501,038 and \$4,801,496 respectively, was payable at September 30, 2024 and 2023.

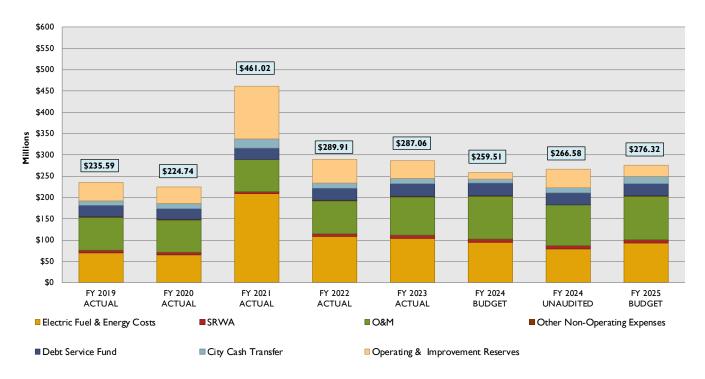

Following is the computation for distribution to the City of Brownsville for FY 2025:

| Gross Revenue | \$ 276,316,863 |
|--|-------------------|
| Less: | |
| Fuel & Energy Costs | 88,225,000 |
| Off-system Sales Expenses | 5,000,000 |
| Southmost Regional Water Authority (SRWA) | 7,247,621 |
| Adjusted Gross Revenues | \$ 175,844,242 |
| Budgeted COB Transfer at 10% of Adjusted Gross Revenues | \$ 17,584,424 |
| Less: | |
| COB Usage and Other | (6,271,078) |
| Net Cash Transfer to COB | \$ 11,313,346 |

OUTSTANDING DEBT

The Brownsville PUB has the following bonds outstanding as of September 30, 2024:

- \$163,725,000 Utilities System Revenue Improvement and Refunding Bonds, Series 2005A, due in a final installment of \$100,000 in 2031 with an interest rate of 5.0%. As of September 30, 2024, the outstanding balance was \$100,000.
- \$77,805,000 Utilities System Revenue Refunding Bonds, Series 2008, due in a final installment of \$100,000 in 2033 with an interest rate of 5.0%. As of September 30, 2024, the outstanding balance was \$100,000.
- \$840,000 Utilities System Junior Lien Revenue Bonds Series 2012, due in annual installments ranging from \$45,000 to \$60,000 through 2032 with interest rates ranging from .270% to 3.49%. As of September 30, 2024, the outstanding balance was \$410,000.
- \$118,185,000 Utilities System Revenue Refunding Bonds, Series 2013, due in annual installments ranging from \$8,755,000 to \$9,565,000 through 2026 with interest rates ranging from 2.0% to 4.0%. As of September 30, 2024, the outstanding balance was \$18,715,000.
- \$94,770,000 Utilities System Revenue Refunding Bonds, Series 2015, due in annual installments ranging from \$675,000 to \$5,675,000 through 2045 with interest rates ranging from 4.0% to 5.0%. As of September 30, 2024, the outstanding balance was \$45,335,000.
- \$39,410,000 Utilities System Revenue Refunding Bonds, Series 2016, due in annual installments ranging from \$1,515,000 to \$3,930,000 through 2033 with an interest rate of 5.0%. As of September 30, 2024, the outstanding balance was \$21,310,000.
- \$14,000,000 Utilities System Revenue Refunding Bonds, Series 2018, due in annual installments of \$310,000 to \$1,650,000 through 2033 with interest rates ranging from 4.0% to 5.0%. As of September 30, 2024, the outstanding balance was \$5,555,000.
- \$53,590,000 Utility System Revenue Refunding Bonds, Series 2020, due in annual installments of \$320,000 to \$2,880,000 through 2050 with interest rates ranging from 2.125% to 5.0%. As of September 30, 2024, the outstanding balance was \$52,175,000.
- \$62,320,000 Utility System Revenue Refunding Bonds, Series 2020A (Taxable), due in annual installments of \$10,105,000 to \$12,105,000 through 2031 with interest rates ranging from 0.579% to 1.882%. As of September 30, 2024, the outstanding balance was \$57,980,000.
- \$17,165,000 Utility System Revenue Refunding Bonds, Series 2022, due in annual installments of \$535,000 to \$1,305,000 through 2051 with interest rates ranging from 4.0% to 5.0%. As of September 30, 2024, the outstanding balance was \$17,165,000.
- \$35,605,000 Utility System Revenue Refunding Bonds, Series 2022A (Taxable), due in annual installments of \$5,285,000 to \$6,660,000 through 2037 with interest rates ranging from 4.0% to 5.0%. As of September 30, 2024, the outstanding balance was \$35,605,000.

The Brownsville PUB had \$30 million in commercial paper obligations outstanding as of September 30, 2024.

Outstanding Principal Debt Through Maturity

DEBT SERVICE

Following is a summary of each system's cost of borrowed money, including principal repayments and interest expense associated with the retirement of outstanding bonded debt and pooled loans. The Utility does not have a legally mandated debt limit.

Operating revenues for all three utilities include base rate charges billed to customers. Electric Operating Revenues also include the recovery of fuel and purchased energy charges as well as Electric Reliability Council of Texas (ERCOT) related off-system sales. Water Operating Revenues include the assessment of the Resaca Fee imposed on all water customers. The unusually high Electric Sales in FY 2021 were primarily attributable to the Winter Storm Uri event in February 2021.

REVENUES - SOURCES, ASSUMPTIONS AND TRENDS

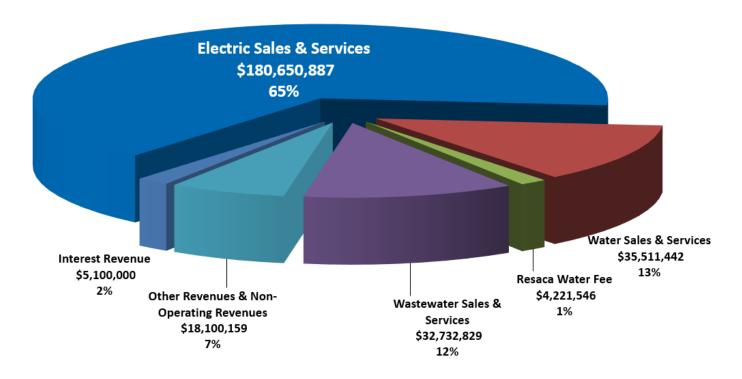

SOURCES

In FY 2025, Brownsville PUB expects to generate 87.98% of revenues through base rates charged to customers and from the Fuel & Purchased Energy Charge (FPEC). Off-system sales revenue (ERCOT related transactions) make up 3.62% of the total revenue budget for FY 2025. Because of the uncertainty of these off-system sales BPUB takes a conservative approach to forecasting them. The remainder is made up of interest from investments and other operating and non-operating revenues (other revenues) which include customer service charges such as forfeited discounts (penalties) and connection and service charges. Other revenues also include Tele-Communications Inc. (TCI) pole rental charges, Transmission Cost of Service (TCOS), and ERCOT congestion rights revenues. These other revenues are relatively stable therefore the forecast is based on historical averages.

FY 2025 REVENUES BY SYSTEM AND SOURCES

ASSUMPTIONS AND TRENDS

The Brownsville PUB estimated unit sales, sales revenues and customer billings for FY 2025 for the electric, water and wastewater systems. Unit sales and revenues are based on three-year average historic data of customer sales and financial results with a customer growth factor added to the calculations. We continue to compare our revenues to our level of spending on a continual basis to ensure that adequate operating reserves are built up and maintained.

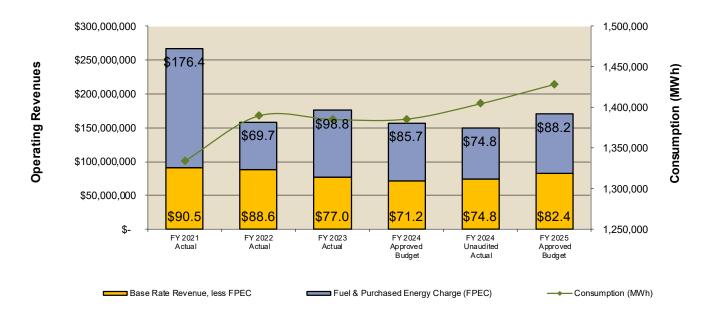

Electric, water and wastewater revenues were developed using current City Commission approved rates.

The FPEC in the electric system is analyzed and adjusted as needed on a monthly basis due to the volatility of fuel and purchased power prices.

ELECTRIC

Total FY 2025 electric sales revenues (excluding off-system sales) are expected to increase \$13.70 million or 8.73% above the FY 2024 Approved Budget levels primarily due to an increase in the projected fuel costs and unit sales.

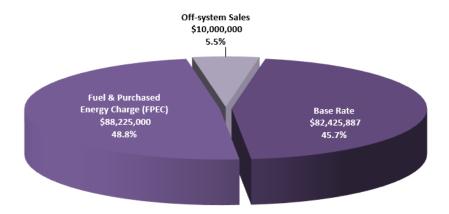

Electric consumption and operating revenues are depicted in the chart below

Fiscal Years 2024 and 2025 Original Budget base rate projections reflect gradual changes in unit sales. Based upon budgeted unit sales, adjusted electric sales revenues, excluding off-system sales for FY 2025, will be approximately \$170.65 million compared to \$156.95 million budgeted in 2024.

The exceptionally high fuel & purchased energy charge in FY 2021 is primarily due to the Winter Storm Uri event in February 2021.

The following graph shows electric sales revenues by revenue source:

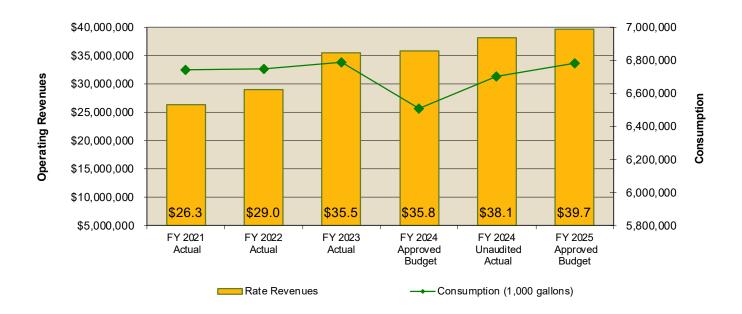

Based upon a review of historical customer statistics, customer accounts have increased on average by approximately 1.4% per year. For the fiscal year ended September 30, 2024, Brownsville PUB's approximate 54,700 electric customers were comprised of 87.7% residential, 10.9% commercial/industrial, and 1.1% municipal. Residential, commercial/industrial, and municipal customers provided approximately 51.7%, 44.1% and 4.1%, respectively, of electric system sales revenues.

The remaining other operating revenues and non-operating revenues were estimated for the periods based upon recent trends and/or estimated changes in fees and charges where appropriate.

WATER

Total FY 2025 water revenues are expected to increase by \$3,943,338 or 11.02% above FY 2024 budget levels. This is largely attributed to approved rate increases that will take effect on January 1, 2025.

Water consumption and operating revenues are depicted in the following chart.

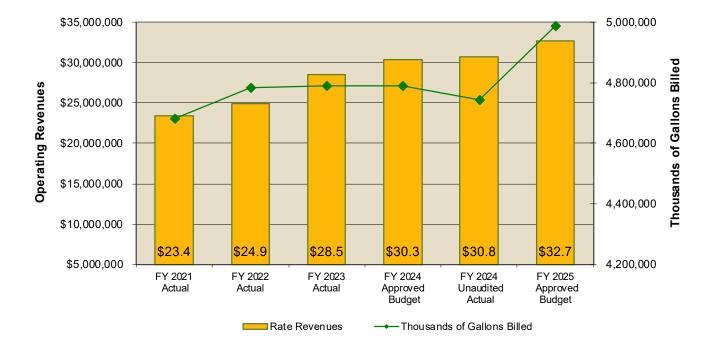

For the fiscal year ended 2024, Brownsville PUB's approximate 55,863 water customers were comprised of residential, commercial, and municipal customers within the City and adjacent unincorporated areas. Brownsville PUB also sells treated water at wholesale rates to three water distribution systems and in FY 2023 these sales accounted for approximately 5.99% of the water system's sales revenues and 9.02% of its sales volume. The Brownsville PUB partnered with the SRWA and built a 10.0 million gallon per day reverse osmosis water treatment plant of which the Brownsville PUB has 92.91% ownership. This plant includes a 7.5-million-gallon storage tank.

The remaining other operating revenues and non-operating revenues were estimated for the periods based upon historical trends.

WASTEWATER

Total FY 2025 wastewater revenues are expected to increase by \$2,424,341 or 8% above FY 2024 amended budget levels. This is largely attributed to an approved rate increase of 4% that will take effect on January 1, 2025.

Wastewater consumption and operating revenues are depicted in the following chart.

The wastewater system provided service to approximately 56,337 customers at the end of FY 2024 and accounted for approximately 13% of the Brownsville PUB's total operating revenues during that period.

The remaining other operating revenues and non-operating revenues were estimated for the periods based upon historical trends.

| 46 | Debt Service Coverage | 2.54 | 2.40 | 2.23 | 2.22 | 2 2.15 | 2.16 |

The five-year forecast was developed using the following assumptions:

- Sales & Service to Customers include 1.4% customer growth for all utilities and reflect future planned rate adjustments to the water and wastewater utilities.
- The Resaca Fee is projected at the current rate of \$6.25.
- Fuel & purchased energy charges are expected to increase by 2.5% annually.
- Off System Sales Revenue and Other Operating & Non-Operating Revenues primarily include unpredictable ERCOT related transactions and based on historical averages.
- Interest from Investments are forecasted to decrease over the next five years due to anticipated reductions to FED rates.
- SRWA and Non-Personnel O&M expenses are forecasted to increase by 2.5% based on average national inflation rates, while Personnel O&M expenses are forecasted to increase by 1.5%.
- Other Non-Operating Expenses have and should continue to remain relatively flat.
- Debt Service is expected to increase during FY 2028 due to conversion of Commercial Paper notes to long term debt.
- The City Cash Transfer fund is based on Adjusted Gross Revenues and is forecasted to increase at a rate of approximately 1% annually.

This forecast is designed to provide sufficient funding for the goals of the five-year strategic plan, including customer and community engagement, workforce development and continuity, organizational preparedness and resiliency, process improvement, reliable infrastructure and technology and innovation.

Dept. No: 1110

PERFORMANCE MEASURES FOR THE GENERAL MANAGER DEPARTMENT

Department Function:

The General Manager is the Chief Executive Officer of the Brownsville PUB. It is the General Manager & CEO's responsibility to execute the plans and decisions of the Board, thereby directing and coordinating the activities of all Utility employees. The General Manager & CEO ensures that all policies and resolutions passed by the Board are enforced and duly administered. In addition, the General Manager & CEO informs the Board of legislative matters, capital improvements, budget items, policies, and services offered to customers. The Assistant General Manager & COO, Chief Financial Officer, Director of Human Resources, and Communications & Administrative Services Director directly report to the General Manager & CEO.

Department Goals/Objectives:

The department's objectives are to provide our customers, both internally and externally, with economical, reliable, and friendly service. To efficiently direct all aspects of the utility systems. To effectively direct Strategic Planning efforts in order to coordinate and prioritize goals and objectives. Identify, select, and retain a professional management team. Recognize constraints and limitations of State and Industry guidelines in addition to other applicable rules and regulations. Conduct periodic staff meetings and workshops.

Department Responsibility: Paul M. Gonzalez

Title: General Counsel & Chief

Legal Officer

Telephone Ext: 6732

Dept. No: 1115

PERFORMANCE MEASURES FOR THE LEGAL SERVICES DEPARTMENT

Department Function:

The Legal Services Department was created in January 2024. The department consists of three (3) employees, General Counsel & Chief Legal Officer hired in February 2024, Contracts Coordinator hired in May 2024, and Legal Assistant hired in June 2024. The department serves as strategic legal advisor to the Brownsville Public Utilities Board in all legal matters, including litigation, prosecution, employment disputes, contract negotiations, and reviewing legal documentation for regulatory, legislative, and administrative matters. It provides legal support and guidance - directly or through outside counsel retained by the Board - concerning all legal proceedings and claims pertaining to the operation and administration of BPUB. Administratively, the General Counsel and Chief Legal Officer assists by reviewing invoicing and billing for Legal Services. The General Counsel and Chief Legal Officer oversees the functions of Internal Audit, Records Management, Real Estate, NERC Compliance, and the Contracts Coordinator to ensure compliance with all applicable laws, regulations, and ordinances. The function of the Contracts Coordinator is to develop and coordinate contracts, implement policies and procedures for BPUB, and maintain an efficient contract administration and repository system.

Department Goals/Objectives:

The department's objective is to provide legal review and guidance concerning all legal matters to BPUB. In addition, the department's goals are to:

- Deliver legal advice that aligns with company policy, mission, and values.
- Participate in the decision-making process and protect BPUB's legal interests.
- Develop and implement policies and procedures that meet legal requirements and standards.
- Effectively direct Strategic Planning efforts in order to coordinate and prioritize goals and objectives.
- Build strong relationships with internal stakeholders to improve legal communication and collaboration

Director of Internal Audit 6269

PERFORMANCE MEASURES FOR THE INTERNAL AUDIT DEPARTMENT

The Internal Audit (IA) Department is responsible for conducting independent reviews of BPUB's policies, procedures and operations. The Director of Internal Audit reports functionally to the Board of Directors and administratively to the General Counsel & Chief Legal Officer. BPUB's IA Charter defines what the Board of Directors and Executive Management can expect from the IA and directs the efforts on the IA staff. An audit provides an independent, objective assurance and consulting activity as well as supports organizational objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, and governance processes.

Department Goals/Objectives:

The department's objective is to use a risk assessment program to perform audits for the fiscal year. IA staff conducts operational audits to improve and enhance the efficiency and effectiveness of BPUB's departmental functions through findings, recommendations and follow-ups. Audits are conducted to ensure standard operating policies and procedures are utilized in daily operations. IA staff also investigates allegations pertaining to fraud, waste and abuse of BPUB's resources.

PERFORMANCE MEASURES FOR THE KEY ACCOUNT MARKETING DEPARTMENT

Department Function:

The Key Account Marketing Department focuses on meeting the unique customer service needs of Key Accounts, BPUB's largest industrial and commercial clients. Key Accounts Representatives serve as a single-point of contact for Key Accounts and are on-call 24 hours a day, seven days a week. In addition, the Key Account Department is responsible for the recruitment of new commercial business for the utility and facilitates electric conversions from other utility companies to BPUB.

Department Goals/Objectives:

The Brownsville Public Utilities Board's Key Account and Business Development Department is dedicated to providing exceptional customer service and becoming a strategic partner to all Key Accounts 24/7.

INPUT MEASURES

Employees (FTE's)
O&M Expenses

OUTPUT MEASURES

Number of Key Accounts Number of field visits Number of analyses performed for Key Accounts

OUTCOME MEASURES

Number of new Key Accounts Number of electric conversions (to BPUB) facilitated by KA Department

Number of new subdivision projects faciliated by KA Department

Number of new commercial projects facilitated by KA Department Key Accounts satisfied with the level of service delivered by KA Department (per survey results)

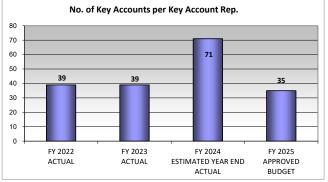

Percentage of Key Accounts Electric Revenue(\$) versus system revenue (\$)

EFFICIENCY MEASURES

Number of Key Accounts per representative Average number of field visits per representative

Title: Director of Customer Services

Telephone Ext: 6255
Dept. No: 1130

PERFORMANCE MEASURES FOR THE CUSTOMER SERVICES DEPARTMENT

Department Function:

The Customer Services Department is one of the primary contacts with utility customers and its function is to provide administrative and managerial oversight to Customer Service, Call Center, Cashiers, Revenue Recovery, Billing & Collections in order to offer greater efficiency for internal and external customers.

Department Goals/Objectives:

The purpose of the department is to provide operational support to the division departments so that they have the necessary tools to perform their jobs and to provide administrative and managerial support in order to produce more effective services. See departments 6110 - Customer Service, 6115 - Collections, 6120 - Billing, 6125 - Call Center, 6160 Cashiers, and 5140 Revenue Recovery for specific metric data.

Department Responsibility: Eli Alvarez

Title: Director of Electrical Operations

Telephone Ext: 6234

Dept. No: 1145

PERFORMANCE MEASURES FOR THE ELECTRICAL OPERATIONS DEPARTMENT

Department Function:

The Electric Transmission & Distribution division defines, develops, implements, and manages the effective execution of operational strategies, processes, and programs for Substations and Relaying, Electric Transmission & Distribution Construction and Maintenance, Electric Meter Shop, and Electric Engineering.

Department Goals/Objectives:

Division goal is to plan and direct initiatives and strategies to be able to provide current and future customers with low-cost and operationally efficient electric power that meets or exceeds reliability standards. Maintain high levels of safety measures on daily operations, and provide resources and training to the staff to accomplish this. Execute all department functions, processes, and programs to provide reliable and quality services to our customers, and at the same time, be responsive to customer's electric needs.

PERFORMANCE MEASURES FOR THE **ENVIRONMENTAL SERVICES DEPARTMENT**

Department Function:

The Environmental Services Department manages the Environmental Compliance, Pre-treatment, Cross Connection Control, and Analytical Laboratory Departments. The Environmental Services Department develops and implements environmental policies and procedures to ensure compliance with the letter and spirit of environmental laws and reduce environmental impacts. It provides environmental compliance support services (technical, regulatory, and operational) to all Brownsville PUB and SRWA operations.

Department Goals/Objectives:

The Environmental Department's goal is to provide environmental, technical, regulatory, and operational support to all Brownsville PUB and SRWA operations in order to ensure that air emissions, hazardous waste, water quality, safe drinking water, air risk management, integrated contingency plan, spill prevention control and countermeasure, AST, UST, PCB and stormwater, compliance monitoring and reporting are appropriate and timely.

Title: Acting Laboratory Manager

Telephone Ext: 6232 Dept. No: 1422

PERFORMANCE MEASURES FOR THE ANALYTICAL LABORATORY DEPARTMENT

Department Function:

The Analytical Laboratory Department provides accurate and precise laboratory analyses results to the Environmental Protection Agency (EPA), the Texas Commission on Environmental Quality (TCEQ), BPUB's customers, City of Brownsville Health Department, Water Treatment Plants, Wastewater Treatment Plants, Power Plant, Resaca Maintenance and the Distribution System. These analytical analyses are performed in accordance to the EPA, TCEQ, and the National Environmental Laboratory Accredititation Program (NELAP) requirements. We are officially accredited by the NELAP and approved by the EPA and TCEQ to conduct laboratory analyses as a commercial laboratory. All of the analytical analyses performed for compliance are defendable before any United States Judicial Court System.

Department Goals/Objectives:

The Analytical Laboratory Department's objective is to achieve the best analytical analyses through implementation of federal and state laboratory standards, enhance quality assurance and quality control that support current and future accreditation programs, and achieve costs savings through ongoing development and implementation of efficient standard operating procedures.

Title: Pretreatment Manager

Telephone Ext: 6253

Dept. No: 1430

PERFORMANCE MEASURES FOR THE PRE-TREATMENT DEPARTMENT

Department Function:

The Pre-Treatment Department function is to regulate the disposal of pollutants into the wastewater collection system, in order to prevent the introduction of untreated pollutants into the POTW, which will pass through or interfere with the treatment works as specified in the EPA Clean Water Act of 1977 and General Pretreatment Regulations for Existing and New Sources of Pollution (40 CFR 403).

Department Goals/Objectives:

The Pre-Treatment Department's objective is to implement sound consistent pre-treatment programs to comply with pre-treatment regulations and prevent enforcement actions from State and Federal agencies.

Title: Cross Connect Control Mgr

FY 2024

Telephone Ext: 6347

Dept. No: 1435

PERFORMANCE MEASURES FOR THE CROSS CONNECTION CONTROL DEPARTMENT

Department Function:

The Cross Connection Control Department function is to protect the Public Drinking Water Supply by isolating any plumbing cross-connections in the distribution system that could back flow into the city's water supply system, as specified in the EPA Clean Water Act of 1973 and the RG-478 Establishing and Managing an Effective Cross Connection Program.

Department Goals/Objectives:

The Cross Connection Control Department objectives is to provide guidelines to ensure regulatory requirements promulgated the purpose of protecting the water supply and preventing enforcement actions from State and Federal Agencies.

PERFORMANCE MEASURES FOR THE SAFETY & SECURITY OPERATIONS DEPARTMENT

Department Function:

The function of the Health & Safety Department is to provide a safe and healthful work environment for Brownsville PUB employees by planning, developing, managing, and implementing safety and health programs in accordance with local, state, and federal standards.

Department Goals/Objectives:

The Health and Safety Department's objective is to be proactive and identify potential hazards and mediate them before the employee is injured. To properly train and educate the employees of the importance of safety equipment and safety procedures in order to maintain a safe working environment. If an injury is sustained, then the Health and Safety Department must make sure that the injured employee is given the best medical care available and enable the injured employee to return to work within a timely manner.

Title: Director of Electric Engineering &

Telephone Ext: 6216
Dept. No: 2110

PERFORMANCE MEASURES FOR THE ELECTRICAL ENGINEERING & SYSTEM OPERATIONS DEPARTMENT

Department Function:

The Electric Engineering & System Operations Department defines, develops, implements, and manages the effective execution of the electric system operational strategies, processes, and programs for the Energy Control Center, Electric System Planning, and Electric Engineering Departments. Establishes design standards and procedures to manage the work of staff and the project teams by assisting in the review of quality assurance and quality control. Ensures compliance with all safety, reliability, Public Utility Commission of Texas (PUCT), North American Electric Reliability Corporation (NERC), Federal Energy Regulatory Commission (FERC), Texas Regional Entity (TRE), ERCOT, and environmental standards and requirements within the area of assigned responsibility.

Department Goals/Objectives:

The division's goal is to plan and direct initiatives and strategies to be able to provide current and future customers with low-cost and operationally efficient electric power that meets or exceeds reliability standards. Maintain high levels of safety measures on daily operations, and provide resources and training to the staff to accomplish this. Execute all department functions, processes, and programs to provide reliable and quality services to our customers, and at the same time, be responsive to customers' electric needs.

Title: Substations & Relaying Manager

Telephone Ext: 6327 Dept. No: 2120

PERFORMANCE MEASURES FOR THE SUBSTATIONS AND RELAYING DEPARTMENT

Department Function:

The function of the Substations and Relaying Department is the daily operation, maintenance, and attention to any emergencies in the Substations.

Department Goals/Objectives:

The goal for the Substations and Relaying Department is to be the leader in providing reliable means of power transmission and distribution by maintaining all substation instrumentation and equipment in good working condition.

INPUT MEASURES

Employees (FTEs) Total O&M Expenses No. of Substations

Total Power-Transformers Capacity (MVA)

OUTPUT MEASURES

Power Transformers, Test & Maintenance 138 KV Breakers, Test & Maintenance 12.5 KV Breakers, Test & Maintenance

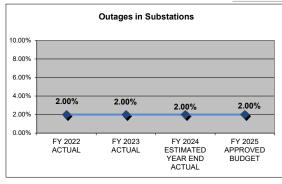

OUTCOME MEASURES

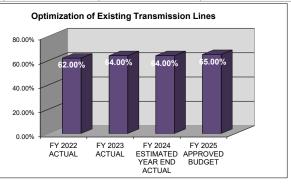

Comply With ERCOT, NERC
Monthly Substation Inspections
Battery Banks Inspection & Maintenance
Relay Testing and Documentation (comply with
PRC-005-6)
Collect Fault Data and Evaluate System Grid
Integrity

EFFICIENCY MEASURES

Outages in Substations Optimization of Existing Transmission Lines NERC Audits Violations Maintenance Reports New Connections

PERFORMANCE MEASURES FOR THE ENERGY CONTROL CENTER OPERATIONS DEPARTMENT

Department Function:

Energy Control Center Operations is responsible for several functions at Brownsville PUB. 1. The safe and reliable operation of Brownsville PUB's bulk electric system in compliance with NERC Reliability Standards, ERCOT Nodal Guides and Protocols. 2. Coordinate actions between ERCOT and neighboring entities during normal and emergency operations. 3. Nominate fuel and arrange for the transportation of fuel to Silas Ray power plant. 4. Coordinate transmission outages within Brownsville PUB as well as with neighboring entities and ERCOT. 5. Receive customer trouble call requests in Cityworks and dispatch said requests to the Electric, Water and Wastewater departments as needed. 6. Keep management informed of situations and outages affecting Brownsville PUB systems 24 hours a day, seven days a week. 7. Perform duties of the Customer Service Department after normal business hours.

Department Goals/Objectives:

Perform all actions in a safe, reliable, and efficient manner while providing excellent customer service.

Dept. No: 2210

PERFORMANCE MEASURES FOR THE ELECTRICAL SUPPORT SERVICES DEPARTMENT

Department Function:

Electrical Support Services Department is responsible for planning, organizing, installing, implementing, preventive and corrective maintenance, and repair of all equipment associated with the Water/Wastewater/Lift Station electrical systems. This includes all electrical motors, emergency generators, motor control centers, and switchgear; electrical, pneumatic, and hydraulic controls and instrumentation. This equipment is located in different parts of the utility including Water Plants, Wastewater Plants and Lift Stations, SRWA water wells, and river pumps.

Department Goals/Objectives:

The objective of the department is to ensure the reliable operation of the Water/Wastewater/Lift Station electrical systems.

PERFORMANCE MEASURES FOR THE POWER SUPPLY DEPARTMENT

Department Function:

The Power Supply department is responsible for optimizing BPUB's physical and financial portfolio within the ERCOT market, long-term integrated resource planning, BPUB's bulk electric system operations consistent with ERCOT protocols, and compliance with NERC standards.

Department Goals/Objectives:

The objective of the Power Supply department is to ensure power availability for our retail customers when they need it at an affordable and predictable price.

Dept. No. 2220

PERFORMANCE MEASURES FOR THE POWER PRODUCTION DEPARTMENT

Department Function:

This department is responsible for the operation of the Brownsville PUB wholly owned Silas Ray Power Station. It also administers and tracks 22.742% share of BPUB interest in the Calpine, Hidalgo Energy Center, a combined cycle operation located in Edinburgh, Texas. In total, this department oversees the production aspect of approximately 223 megawatts in generating capacity.

Department Goals/Objectives:

Department goals are to improve demand and availability for production through improved performance and efficiency.

INPUT MEASURES

PERFORMANCE MEASURES FOR THE ELECTRIC METER SHOP DEPARTMENT

Department Function:

The Electric Meter Shop Department is responsible for the installation, maintenance, and repair of electric meters. The department investigates high and low voltage complaints by installing voltage and current measuring devices. They test, repair, and maintain electric meters and current potential transformers. The Electric Meter Shop checks on reported electric meter tampering cases, makes service connections and disconnections, and performs other related work as required.

Department Goals/Objectives:

The Electric Meter Shop objectives are to assure that BPUB's metering systems are kept up to accuracy standards,

maintain meter testing programs and timely complete meter-related service orders.

PERFORMANCE MEASURES FOR THE ELECTRIC ENGINEERING DEPARTMENT

Department Function:

The function of the Electric Engineering Department is to provide engineering design and project management for new development projects, capital inprovement plan projects, street and security lighting projects, and activities involved in the operation and maintenance of the electrical system.

Department Goals/Objectives:

The goal of the Electric Engineering Department is to meet or exceed industry standard for engineering design of the of electrical

system.

PERFORMANCE MEASURES FOR THE ELECTRICAL SYSTEMS PLANNING DEPARTMENT

Department Function:

The function of the Electrical Systems Planning Department is to provide engineering analysis, design, and project management for new load and generation interconnection opportunities, capital inprovement plan projects, perform system studies, and activities involved in the operation and maintenance of the electrical system.

Department Goals/Objectives:

The goal of the Electrical System Planning Department is to identify and recommend improvement projects needed to support BPUB

load growth, system reliability, and system resiliency.

PERFORMANCE MEASURES FOR THE WATER & WASTEWATER ENGINEERING, PLANNING & OPERATIONS DEPARTMENT

Department Function:

The department's function is to oversee the entire Special Project and Water & Wastewater Engineering-Planning Division and ensure departmental personnel have the resources available to perform their day-to-day functions. We forecast and plan needed improvements to our system that include Engineering, Capital Improvement and projected growth. Available funding is budgeted and forecasted in accordance with prioritized project and system needs.

Department Goals/Objectives:

To provide staff with the resources (tools and funding) to make the necessary improvements to the water and wastewater systems to make them more efficient and provide a better quality product and service while keeping operational costs down. To project future needs and take the necessary steps in order to minimize the impact on the system and community while maximizing the return on our investments

PERFORMANCE MEASURES FOR THE RESACA MAINTENANCE DEPARTMENT

Department Function:

The Resaca Maintenance department is responsible for maintaining the City's Resaca system.

Department Goals/Objectives:

The Resaca Maintenance Department's objective is to cost-effectively dredge and maintain the City of Brownsville's Resaca System and BPUB's reservoirs in order to increase raw water storage and storm water capacity.

INPUT MEASURES

Employees (FTE's)
Total Dredging Expenses
Total O&M Expenses

OUTPUT MEASURES

Material Dredged (cu-yd)

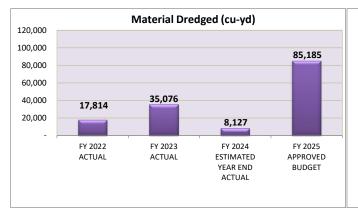

OUTCOME MEASURES

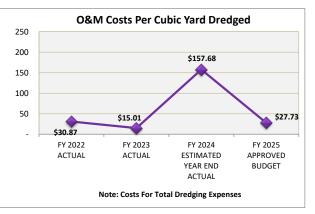

Compliance With Environmental Standards Completion of Oper. Reports Within 10 Days (%) Raw Water Storage Capacity Gained (acre-ft)

EFFICIENCY MEASURES

O&M Costs Per Cubic Yard Dredged

PERFORMANCE MEASURES FOR THE RAW WATER SUPPLY DEPARTMENT

Department Function:

The Raw Water Supply Department is responsible for forecasting water demands and maintenance of reservoir and resaca infrastructure.

Department Goals/Objectives:

The Raw Water Department's objective is to maintain sufficient raw water storage levels in the reservoirs and resacas to minimize the cost of purchasing water rights and surface water; and to maintain raw water equipment in a cost-efficient manner and return equipment to operating condition in a cost-effective manner.

INPUT MEASURES

Employees (FTE's)
Total O&M Expenses
Certificate M865 Water Rights (acre feet)

OUTPUT MEASURES

River Water Diversions to Reservoirs (acre feet) Raw Water Diversions to Resacas (acre feet) Certificate M865 Diversions (acre feet)

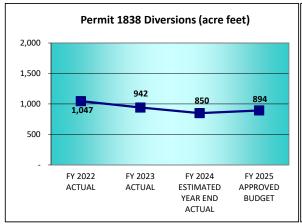

OUTCOME MEASURES

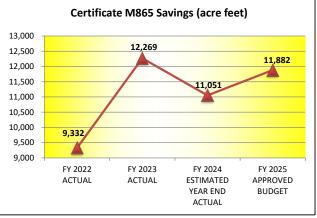

Permit 1838 Diversions (acre feet)

EFFICIENCY MEASURES

Certificate M865 Savings (acre feet)

PERFORMANCE MEASURES FOR THE WATER/WASTEWATER OPERATIONS & CONSTRUCTION DEPARTMENT

Department Function:

The Water/Wastewater Operations & Construction Department is responsible for the operations, construction, and maintenance of the Brownsville PUB water and wastewater utility system, which includes maintenance and repairs of water mains, water service lines, water meters, water main valves and hydrants, wastewater force mains, gravity mains, new water and wastewater line extensions, special projects, water audits, manage daily department activities, generate reports, and provide support to other departments.

Department Goals/Objectives:

The Water/Wastewater Department objective is to effectively provide and maintain high quality service for Brownsville PUB internal and external customers. To complete all functions of the department by enhancing reliability, responsiveness, and total commitment in providing a safe working environment to our employees and to the safe delivery of quality services to our customers.

PERFORMANCE MEASURES FOR THE WATER/WASTEWATER SLUDGE MANAGEMENT DEPARTMENT

Department Function:

The W/WW Sludge Management Department is responsible for the transportation and final disposal of sludge from the Water Treatment Plants, Wastewater Treatment Plants and Resaca Maintenance (sediment). Additionally, provides assistance to various BPUB departments with special assinged construction projects. Ensures day to day operations are in compliance with state and ferderal agency rules and regulations.

Department Goals/Objectives:

To cost-effectively provide superior customer service to internal and external customers. By planning and coordinating goals and objectives in accordance with PBUB's Strategic Plan. By responding to special assigned construction projects with expediency while maintaining the sludge transport and disposal services required.

Lift Stations Mananger

Telephone Ext: 6520 Dept. No. 3230

PERFORMANCE MEASURES FOR THE WASTEWATER LIFT STATIONS DEPARTMENT

Department Function:

The Lift Stations Department operates and maintains BPUB's Lift Stations in order to provide wastewater service to BPUB customers.

Department Goals/Objectives:

The Lift Stations Department's objective is to provide best in class wastewater service to BPUB customers while at the same time comply with all applicable local, state, and federal regulations. Its objective is also to maintain high levels of safety measures in all of its daily operations.

INPUT MEASURES

O&M expenditures Power expenditures Kilo-watt-hour usage Labor-hours*

OUTPUT MEASURES

Million gallons of pumped wastewater

OUTCOME MEASURES

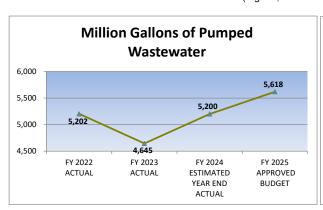

Number of customers served

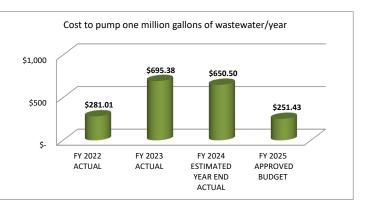

EFFICIENCY MEASURES

Kilo-watt-hours to pump ww from one customer/year Labor-hours to pump ww every 1000 customer/year Cost to pump wastewater from one customer/year Cost to pump one million gallons of wastewater/year No. of emergency repairs every 1000 customers/year

PERFORMANCE MEASURES FOR THE WATER & WASTEWATER ENGINEERING DEPARTMENT

Department Function:

The department provides Engineering and Technical services to BPUB and the community related to water and wastewater utility construction and operation, lift stations, raw water supply, water and wastewater treatment plants in order to complete various projects. The department also facilitates grants, compiles information related to the Semi-Annual Report for the Impact Fee Program, Water audits and protects the public drinking water system through the prevention of cross connections; assists the project development department with new water and wastewater connections; approves subdivision plats and commercial site plans in cooperation with the City; performs and oversees planning, design, inspection, and construction of water and wastewater infrastructure projects and BPUB Facilities Improvements.

Department Goals/Objectives:

1) To assist accurate cost estimates to customers in order to obtain new water and/or sewer service connections in a timely manner. 2) To assist in reviews for the City in order to approve subdivisions and commercial site plans in compliance with BPUB Service Policies. 3) To provide internal data to outside consultants/contractors in order to complete planning, design, and construction projects with accuracy. 4) To perform construction inspection for contractors in order to accept and approve water and wastewater infrastructure. 5) To produce engineering reports, plans, specifications, and cost estimates for water and sewer facilities. 6) To help obtain grants to fund infrastructure projects. 7) To ensure the safety of the public water supply by preventing cross connections through public education and compliance enforcement. 8) To produce accurate construction cost estimates for water & wastewater engineering projects.

PERFORMANCE MEASURES FOR THE W/WW PROJECT DEVELOPMENT DEPARTMENT

Department Function:

Department facilitates new water and wastewater connections; approves subdivision plats and commercial site plans in cooperation with the City; performs and oversees planning, reviews design, provides inspection for construction of water and wastewater infrastructure projects and BPUB Facilities Improvements. The department provides reviewal services to raw water, water treatment plants, wastewater treatment plants, lift stations, and construction and operations in order to complete various projects. The department supports developers in navigating the complexities of new developments, ensuring that all water and wastewater requirements are met with accuracy and compliance. Through the department's expertise, they strive to enhance community infrastructure and promote sustainable growth. The department also facilitates grants, compiles information related to the Semi-Annual Report for the Impact Fee Program, and protects the public drinking water system through the prevention of cross connections.

Department Goals/Objectives:

1) To produce accurate cost estimates to customers in order to obtain new water and/or sewer service connections in a timely manner. 2) To produce reviews for the City in order to approve subdivisions and commercial site plans in compliance with BPUB Service Policies. 3) To provide internal data to outside consultants/contractors in order to complete planning, design, and construction projects with accuracy. 4) To perform construction inspection for contractors in order to accept and approve water and wastewater infrastructure. 5) To produce engineering reports, plans, specifications, and cost estimates for water and sewer facilities. 6) To help obtain grants to fund infrastructure projects. 7) To ensure the safety of the public water supply by preventing cross connections through public education and compliance enforcement.

Department Responsibility: Mark V. Dombroski

Title:

Assistant GM & COO

Telephone Ext: 6726

Dept. No:

4105

PERFORMANCE MEASURES FOR THE **OPERATIONS DEPARTMENT**

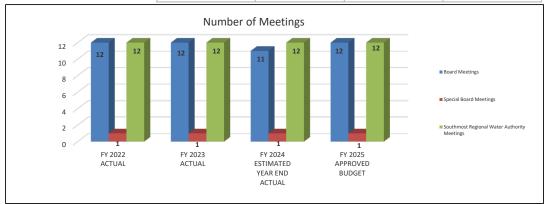

Department Function:

The Assistant General Manager & Chief Operating Officer (AGM & COO) is the executive officer of the Brownsville Public Utilities Board, which serves as the Assistant General Manager and has responsibility for the operational functions, strategic initiatives, and policies of the Brownsville Public Utilities Board. It is the AGM & COO's responsibility to support the General Manager & CEO to execute the plans and decisions of the Board, thereby directing and coordinating the activities of the utility. The AGM & COO ensures that all policies and resolutions passed by the Board are enforced and duly administered. In addition, the AGM & COO informs the General Manager & CEO and the Board of legislative matters, capital improvements, budget items, policies, and services offered to customers. The Director of Water & Wastewater Operations. Director of Special Projects and Water Waste Water Engineering-Planning, Director of Environmental Services, Director of Electric Transmission and Distribution, Director of Power Supply and Energy Risk Manager directly report to the AGM & COO.

Department Goals/Objectives:

The department's objective is to develop, direct, and guide management to ensure the adequacy and reliability of the utility's electric, water, and wastewater systems. Effectively direct Strategic Planning efforts in order to coordinate and prioritize goals and actions plans. Ensures the utility adgeres to local, state, and federal regulations and policies.

Title: Energy Risk Manager

Telephone Ext: 6378
Dept. No: 4110

PERFORMANCE MEASURES FOR THE ENERGY RISK MANAGEMENT DEPARTMENT

Department Function:

Energy Risk Management Department (ERM) independently monitors and reports the execution of energy risk management activities results inclusive of energy transactions, new generation resources risk exposure and evaluation of new strategies to the Risk Oversight Committee (ROC). Also, ERM reviews, processes, and directs new opportunities for long-term power and incremental blocks of energy strategies needed. Perform calculations of risk exposure for the sources of risk identified in the ERM policy using ROC-approved risk measurement methods (if any are necessary). Temporarily adjust hedging and trading limits in order to reduce risk exposure of the organization in response to unusual adverse changes in market or operating conditions on an as-needed basis. Perform stress testing of the portfolio to determine the potential impacts on organizational financial measures that could be caused by large, unexpected price movements.

Department Goals/Objectives:

Goals include review of the forecast and current market conditions to mitigate any risk exposures. Reports that include power and gas price volatility and future curve projections to the Risk Oversight Comiittee. The Brownsville PUB Board has requested for Brownsville PUB staff to procure/negotiate required energy to meet the native load demands and projections.

Title: Maintenance & Reliability Engineering Manager

Telephone Ext: 6728

Dept. No: 4115

PERFORMANCE MEASURES FOR THE ASSET MANAGEMENT & CIP DELIVERY DEPARTMENT

Department Function:

The Asset Management Department's primary function is to develop a comprehensive preventative maintenance program and provide engineering support to different water/wastewater/electrical opperations groups companywide to assit them in reducing losses caused by equipment malfunctions, this helps BPUB achieve optimum equipment availability at an extended equipment life for maximum utilization of resources. The department identifies electromechanical assets, proritizes them, strategizes maintenance, and implements engineering reliability solutions.

Department Goals/Objectives:

The Asset Management Department's goal is to help BPUB maximize the value and reliability of its electromechanical assets through the implementation of equipment preventative maintenance programs in line with industry best practices. The objective is to help BPUB address its growing infrastructure and business demands by providing a reliable infrastructure, which translates into competitive rates and exceptional customer service.

Title: NERC Compliance Manager & CCO

Telephone Ext: 6314
Dept. No: 4210

PERFORMANCE MEASURES FOR THE NERC COMPLIANCE DEPARTMENT

Department Function:

The NERC Compliance Department is primarily responsible for overseeing and managing the Brownsville Public Utilities Board NERC Compliance Program. The department is also responsible for ensuring that the different applicable company departments and its employees are in compliance with regulatory requirements and BPUB internal policies and procedures pertaining to this program.

Department Goals/Objectives:

The NERC Compliance Department's goals and objectives are to ensure that BPUB complies with all applicable FERC, NERC and ERCOT protocols and regulations and to continually and proactively review its operations and activities to comply with applicable standards and requirements.

Department Responsibility: Cassandra Rosales
Title: Fuel & Purcahsed Energy Mgr.

Telephone Ext: 6312 Dept. No: 4220

PERFORMANCE MEASURES FOR THE **FUEL & PURCHASED ENERGY SUPPLY DEPARTMENT**

Department Function:

The department is responsible for the energy accounting including power production costs, energy sales, gas hedging, calculations for the fuel and energy purchase charge and analyzing, reconciling and settlement of TCOS and fuel & energy supply invoices for the Silas Ray and Hidalgo power plants, the Sendero Wind Farm and AEP Power Purchase Agreements. Other functions include requests for proposals, requests for qualifications, departmental budgeting, and analyzing operational data, such as system load demand and generation capacity to meet BPUB requirements. The department also maintains Fuel and Energy contracts for the reliability of the electrical system.

Department Goals/Objectives:

The departments' goal is to ensure that adequate fuel and energy supplies are available on a short and long term basis and to maintain cost efficient energy and fuel purchases for the BPUB load demand and generation fleet.

PERFORMANCE MEASURES FOR THE W/WW OPERATIONS DEPARTMENT

Department Function:

The W/WW Operations Divison is responsible for defining, implementing, managing, and communicating the effective execution of operational strategies, processes, and programs for the Wastewater Treatment Plants, Water Treatment Plants, SRWA, the W/WW Distribution and Maintenance department, which in total is composed of seven departments that address the Water & Wastewater transmission and distribution systems.

Department Goals/Objectives:

The department's objectives are to provide our customers, both internally and externally, with economical, reliable, and quality service to effectively direct Strategic Planning efforts in order to coordinate and prioritize goals and objectives for Electrical, Water and Wastewater Services. Recognize constraints and limitations of State and Industry guidelines in addition to other applicable rules and regulations and keeping the company in compliance with said rules and regulations. Conduct periodic staff meetings and workshops in order to keep staff up to date with industry rules, regualtions and standards.

The perfromace measures of this division are measured through the performance indicators associated with the departments within the division. The departments of that make up this division are as follows:

3120 - Water Plant 1

3130 - Water Plant II

3145 - Plant Maintenance

3150 - W/WW Operations & Construction

3155 - W/WW Maintenance & Operations

3160 - Potable Water Transportaion Service

3190 - Southmost Regional Water Authority (92.4% BPUB Ownership)

3210 - South Wastewater Treatment Plant

3220 - Robindale Wastewater Treatment Plant

3225 - W/WW Sludge Management

3230 - Wastewater Lift Stations

1435 - Cross Connection Control

PERFORMANCE MEASURES FOR THE FINANCE DEPARTMENT

Department Function:

The Finance Department coordinates development and implementation of Operations and Capital budgets, manages short term and long term debt issues, prepares continuing disclosure documents, coordinates monthly and annual financial reporting and external audit, prepares revenue forecasts, rate analysis, and proforma financial summaries, business process assessments, manages daily division activity and provides oversight to other division departments.

Department Goals/Objectives:

The Finance Department's goal is to achieve best in class financial performance through implementation of sound financial practices, enhancing revenue streams that support current and future needs, achieving cost savings by encouraging resourcefulness, proactively meeting and surpassing rating criteria and avoiding financial liabilities by managing risks. The department's objectives are to provide technical accounting oversight to Brownsville PUB departments to ensure that generally accepted accounting procedures and Brownsville PUB policies and procedures are consistently applied, to perform timely reconciliation of accounts, to maintain the integrity of the Brownsville PUB's accounting records, and to satisfy all reporting requirements.

Title: Purchasing & Materials Mgr.

Telephone Ext: 6366

Dept. No: 5130

PERFORMANCE MEASURES FOR THE PURCHASING DEPARTMENT

Department Function:

The primary function of the Purchasing Department is to meet the product and service needs of the Brownsville PUB by complying with all Federal, State, and Local laws including Board policies; provide fair competition among bidders; and to continuously seek to identify and implement strategies and techniques that will enhance the level of service and integrity provided by the Purchasing Department.

Department Goals/Objectives:

Purchasing Department goals are to purchase at the best price the proper goods or services to suit Brownsville PUB's needs; have goods or services readily available where and when needed; protect against any misappropriation of business assets purchased; insure responsible bidders are given fair opportunities; and see that the best value is received for the public dollar.

Title: Billing Manager

Telephone Ext: 6381 Dept. No: 5140

PERFORMANCE MEASURES FOR THE REVENUE RECOVERY DEPARTMENT

Department Function:

The Revenue Recovery Department is responsible for investigating all possible tampering incidents in a timely and efficient manner. Department personnel are responsible for replacing damaged meters and installing locking devices. In addition, this department is responsible for the calculation and backbilling of unbilled utility services due to tampering.

Department Goals/Objectives:

The Revenue Recovery Department's goal is to increase fees for unrecovered revenue and service, including City fees, from unauthorized or unbilled electric, water, and sewer services. Another departmental goal is to communicate improved awareness and understanding of tampering with customers, employees, and the community through departmental training and community presentations. The objectives are to continue to review, modify, and implement meter tampering procedures and to become more proactive in identifying meter tampering.

Title:

Customer Service Manager

Telephone Ext: Dept. No: 6242 6110

PERFORMANCE MEASURES FOR THE CUSTOMER SERVICE DEPARTMENT

Department Function:

The Customer Service and New Connections staff responds to customer requests for installation of new water meters and Move ins, Move outs, Pay Arrangements, Reconnections, High Bill Complaints, Questions on Bills, Letters of Reference, Open Records research and Service outage calls during regular business hours. In addition to responding to customer requests, the Customer Solutions Representatives (CSRs) scan documents related to the customer transaction, send emails, send faxes, mail letters, review reports for quality assurance, record service outage calls in the City Works application and return calls. CSRs attend quarterly safety meetings, bi-weekly departmental meetings and mandatory training sessions which reflect our dedication to continuous improvement. Customer Service staff provides support to Call Center, Cashier and New Connections Departments when needed and cross-trained staff is available.

Department Goals/Objectives:

The department's goal is to provide solutions to customer utility needs, while we accurately document the transaction. We support the organization's mission, by delivering excellent service while being innovative and responsive.

PERFORMANCE MEASURES FOR THE COLLECTIONS DEPARTMENT

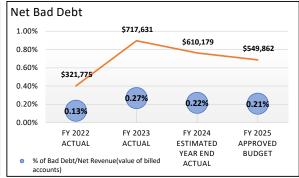

Department Function:

The Collections Department is responsible for providing consistent, reliable and accurate collection strategies. Through a highly qualified workforce, advanced information technology and pro-active cooperation with various departments within the organization the Collections Department strives to collect receivables on time and decrease the amount of bad debt. Functions include: processing of returned checks, disconnects for non-payment, bad debt collections, etc.

PERFORMANCE MEASURES

CALL CENTER DEPARTMENT

Department Function:

The Call Center staff responds to customer requests for 1) Move in, 2) Move out, 3) Payment Arrangements, 4) Reconnections, 5) High Bill Complaints, 6) Questions on Bills, 7) Letters of Reference, 8) Open Records research and 9) Trouble calls during regular business hours. In addition to responding to customer requests, the CSR 1) scans documents related to the customer transaction. 2) sends emails, 3) sends faxes, 4) mails letters, 5) reviews reports for quality assurance, 6) records trouble calls in the City Works application and 7) returns calls. CSRs attend quarterly safety meetings, bi-weekly departmental meetings and mandatory training sessions which reflect our dedication to continuous improvement. Call Center staff provides support to Customer Service and Cashier Departments when needed and cross trained staff is available.

Department Goals/Objectives:

The department's goal is to provide solutions to customer utility needs, while we accurately document the transaction. By delivering excellent service while being innovative and responsive, we support the organization's mission.

Meter Services Mgr.

Telephone Ext: Dept. No: 6146 6130

PERFORMANCE MEASURES FOR THE METER SERVICES DEPARTMENT

Department Function:

The Meter Services Department provides quick and accurate services (connects, disconnects, and transfers) for our customers. They provide re-reading (meters) services with abnormal consumption and as requested by customers. They're also responsible for cutting off at the pole, reporting possible tampering, checking for voltage loads, plugging sewer lines on delinquent accounts and delivering notice of disconnection to customers.

Department Goals/Objectives:

The departmental goal includes scheduling and completing service orders for electric, water, and wastewater services to the Brownsville PUB's customers in a safe and efficient manner. The department also strives to increase the cashflow for our organization by responding to non-payment cases.

SURES

PERFORMANCE MEASURES FOR THE CIS SUPPORT DEPARTMENT

Department Function:

This department is responsible for implementation and testing of new features and improving upon the existing features of the Utility Manager System (UMS). In addition, this department is responsible for implementation and testing rate changes on the UMS application. Staff addresses issues from users and creates reports that will allow the user to review their work faster and complete their tasks accurately. Staff also coordinates and monitors daily and nightly billing processes which include revenues from penalties and billing.

Department Goals/Objectives:

The CIS Support Department's objective is to establish new tools that will allow the Customer & Information Services Department to care for the needs of our customers efficiently. To meet the demands of customers with new tools such as the customer self-service portal and e-mail systems. To provide audit tools to the departments that will maximize our revenue and allow them to complete their tasks accurately.

PERFORMANCE MEASURES FOR THE REAL ESTATE DEPARTMENT

Department Function:

The Real Estate Department provides professional right-of-way acquisition services for Brownsville PUB in conjunction with the city of Brownsville. The BPUB Right of Way staff follows Local, State, and Federal Guidelines of Land Acquisition Grant Projects. BPUB delivers right-of-way acquisition for natural gas pipelines, electric transmission/distribution lines, water lines, wastewater lines, resacas, and utility infrastructure projects.

Department Goals/Objectives:

The Real Estate Department secures Fee Simple Real Estate Properties, Water Rights Purchases, Land Donations, Land Leases, Right-of-Entry Permits, Utility Easements Acquisitions, Program Management, Route Evaluation and Selection, Title Search, Title Curative Support, Appraisal Activities, Crossing Permits, Negotiations, Property Management, Market Values Studies, Residential and Business Relocation, Statutory and Non-Statutory Acquisition, Condemnation Support, Expert Witness Testimony, Utility Coordination, and Relocation.

PERFORMANCE MEASURES FOR THE GEOGRAPHIC INFORMATION SYSTEMS DEPARTMENT

Department Function:

The Geographic Information Systems (GIS) Department plays an integral role in defining Brownsville PUB internal operational mapping needs. GIS is diligently evaluating the content, accuracy, and adequacy of existing and newly acquired data sets; identifying data needs in relation to work functions requirements; defining potential GIS applications for each department; assessing training requirements for GIS end users; reviewing areas for potential process improvements; and data sharing.

Department Goals/Objectives:

The Geographic Information System (GIS) Department is primarily responsible for the content and quality of spatial data and its related attributes in the BPUB service area. The BPUB electronic mapping system consist of the three utilities electric, water, and wastewater infrastructure and parcel data. The GIS personnel develop and maintain datasets for the benefit of BPUB internal and external customers. This data leverage allows BPUB to provide better customer service.

Department Responsibility: Jose Cuellar

Title: Fleet Services Manager

Telephone Ext: 6362 Dept. No: 7150

PERFORMANCE MEASURES FOR THE FLEET MANAGEMENT DEPARTMENT

Department Function:

The Fleet Department is responsible for "keeping the fleet operating". The primary objective is to make repairs with the shortest "Turn Around" time while working effectively so that we may achieve a safe operating fleet at an optimum cost/hour. Personnel is available for "stand-by" support 24 hours/day, 365 days/year. Additionally, the department is responsible for providing BPUB with cost effective fleet equipment that will allow for departments to complete daily work operations safely and efficiently.

Department Goals/Objectives:

To provide superior customer service to internal and external customers by responding immediately to concerns related to vehicles and equipment utilized by Brownsville PUB personnel.

PERFORMANCE MEASURES FOR THE SCADA & ELECTRICAL SUPPORT SERVICES DEPARTMENT

Department Function:

SCADA & Electrical Support Services Department is responsible for planning, organizing, installing, implementing, preventive and corrective maintenance, and repair of all equipment associated with the Water/Wastewater/Lift Station Supervisory Control and Data Acquisition (SCADA) systems and the Electric SCADA systems. This includes all communication devices, telemetry, fiber optic systems, Remote Terminal Units, cyber secturity appliances, routers, network switches, computer servers and workstations, and computer network monitoring tools. This equipment is located in different parts of the utility including the Energy Control Center, Backup Control Center, Water Plants, Wastewater Plants, Lift Stations, water distribution pressure points, water elevated storage tanks, SRWA water wells, and river pumps. The Department is also involved in meeting the compliance requirements for the Texas Commission on Environmental Quality, Environmental Protection Agency, and North American Electric Reliability

Department Goals/Objectives:

The objective of the department is to ensure the reliable operation of the Electrical SCADA system and the Water/Wastewater/Lift Station SCADA system.

FY 2025 CAPITAL BUDGET BY SYSTEM \$76,099,290

| Electric | \$ 31,272,435 | 41.09% |
|------------|------------------|---------|
| Water | 20,422,309 | 26.84% |
| Wastewater | 24,404,546 | 32.07% |
| TOTAL | \$ 76,099,290 | 100.00% |

Note:

General, Administrative and Customer Service projects are allocated to electric 100%.

The process of establishing the Brownsville Public Utilities Board's (BPUB) Capital Budget involves evaluating all submitted projects, assigning them to a particular category, and then ultimately allocating resources toward top-ranked priorities. The current ranking system categorizes all Capital Improvement Projects (CIP) into four (4) categories:

| Project Consideration Category Reference | | | | | | |
|---|--|--|--|--|--|--|
| Category General Criteria | | | | | | |
| Must Do | These projects are required for the normal course of business and to provide day-to-day customer service or system operations, correct a health or safety condition, or mandated by local, state, or federal agencies. | | | | | |
| Load/Capacity Relief | These projects are identified for improved switching capability, backup reliability for critical systems, or for specific system reinforcements needed for load relief. | | | | | |
| Reliability | These projects are solely based on an increased reliability benefit. | | | | | |
| General | These projects are considered general spending. | | | | | |

In general, non-recurring capital projects do not significantly affect Brownsville PUB's current and future Operating & Maintenance (O&M) budgets. However, specific projects for new facilities such as the FM 511 Service Yard and the Annex building did require additions to the annual operating budget for new personnel, maintenance, groundskeeping, security, insurance and other expenses. In situations such as these, new departments are created for these facilities to capture these expenses in the O&M budget. For other non-recurring capital projects, adjustments are made within the affected department's O&M budget as needed for changes in expenses such as chemicals, service agreements and other routine expenses.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 3

Airport Substation, Transformer No. 1 Upgrade, 69 KV to 138 KV

Organization: 2120 Substations & Relaying Funding Source: Improvement and

Commercial Paper

Project Related to: Replacements/Upgrades/Rehabilitation Project Considered: Reliability

Project Occurrence: One-time Originator: Arnulfo Mejia

Category: Carryover Utility Function: Electric Transmission

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-------------|-------------|---------|---------|---------|-------------|
| \$1,500,000 | \$1,500,000 | \$ - | \$ - | \$ - | \$3,000,000 |

Description: The 69KV substation is more than 40 years old and has noticeable signs of deterioration. Equipment to operate this substation is now obsolete and difficult to find replacement parts. Servicing the switchgear and oil-circuit breaker also poses a safety risk for employees in the event of a breaker failure since switchgear is a walk-in unit. The project includes the installation of one each 138 KV 12.5kV power transformer, three each 145 KV circuit breakers, and one each 145 KV circuit switcher. In addition, the existing site grade needs to be raised to prevent flooding inside the Substation's yard. Note: \$3,023 is the FY 2024 carryover amount.

Impact of Project:

Project Cost Savings & Revenues: O&M savings will occur due to less frequent maintenance since the equipment will be new.

Operating Costs: Periodic maintenance of the substation will continue, with access to less costly spare parts.

PROJECT REFERENCE 4

Install a Second Power Transformer at the Water Port Substation

Organization: 2120 Substations & Relaying Funding Source: Improvement and

Commercial Paper

Project Related to: Growth
Project Considered: Reliability
Project Occurrence: One-time
Originator: Arnulfo Mejia

Category: Carryover Utility Function: Electric Transmission

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-------------|-----------|---------|---------|---------|-------------|
| \$1,500,000 | \$610,000 | \$ - | \$ - | \$ - | \$2,110,000 |

Description: The Water Port Substation has only one 15/20/25/28 MVA, 138/12.5KV power transformer, which is at 65% capacity. Design, engineer, purchase and install one 15/20/25/28 MVA, 138/12.5 kV power transformer, one 138 kV breaker, one circuit switcher, two 12.5 kV outdoor vacuum circuit breakers and protection relays to increase reliability.

Impact of Project:

Project Cost Savings & Revenues: N/A

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 5

Replace Legacy Overcurrent and Transformer Differential Protection Relays

Organization: 2120 Substations & Relaying Funding Source: Improvement and

Commercial Paper

Project Related to: Replacements/Upgrades/Rehabilitation Project Considered: Must Do

Project Occurrence: One-time Originator: Arnulfo Mejia

Category: Carryover Utility Function: Electric Transmission

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|----------|----------|----------|---------|---------|-----------|
| \$60,000 | \$40,000 | \$40,000 | \$ - | \$ - | \$140,000 |

Description: Current legacy overcurrent and transformer differential protection relays are no longer supported with software or hardware upgrades. The old electrical mechanical type relays are obsolete and do not have technical support for them. Recent software that has come available is not compatible with relays that are currently in service. The project will replace 24 total legacy overcurrent, transformer differential, and bus differential protection relays with new SEL microprocessor relays.

Impact of Project:

Project Cost Savings & Revenues: O&M savings will occur due to less frequent maintenance.

Operating Costs: O&M expense will continue with periodic testing of equipment.

PROJECT REFERENCE 6

Substations Satellite-Synchronized Clock Upgrade

Organization: 2120 Substations & Relaying Funding Source: Improvement and

Commercial Paper

Project Related to: Replacements/Upgrades/Rehabilitation Project Considered: Must Do

Project Occurrence: One-time Originator: Arnulfo Mejia

Category: New Utility Function: Electric Transmission

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|----------|----------|----------|---------|---------|-----------|
| \$50,000 | \$30,000 | \$20,000 | \$ - | \$ - | \$100,000 |

Description: The existing satellite-synchronized clocks at BPUB's substations have exposed time synchronization issues due to power limitations. Engineer, design, purchase and install 14 each substations satellite-synchronized clocks to allow the substation relays to accurately report transmission and distribution operations. Note: \$44,558 is the FY 2024 carryover amount.

Impact of Project:

Project Cost Savings & Revenues: O&M savings will occur due to less frequent maintenance.

Operating Costs: O&M expense will continue with periodic testing of equipment.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 7

Loma Alta Auto Transformer Radiators Replacement

Organization: 2120 Substations & Relaying Funding Source: Improvement and

Commercial Paper

Project Related to: Replacements/Upgrades/Rehabilitation Project Considered: Reliability

Project Occurrence: One-time Originator: Arnulfo Mejia

Category: New Utility Function: Electric Transmission

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|----------|----------|---------|---------|---------|----------|
| \$65,000 | \$15,000 | \$ - | \$ - | \$ - | \$80,000 |

Description: The radiators within the auto transformer, originally placed in service in 1980, have deteriorated due to natural wear and tear and are currently rusting and leaking oil. Procure and replace ten each radiators for the Loma Alta Substation auto transformer.

Impact of Project:

Project Cost Savings & Revenues: Savings will result in preventing costs to clean a potential oil spill. Operating Costs: O&M expense will continue with periodic maintenance.

PROJECT REFERENCE 8

SEL Data Management and Automation (DMA) Blueframe Implementation

Organization: 2120 Substations & Relaying Funding Source: Improvement and

Commercial Paper

Project Related to: Replacements/Upgrades/Rehabilitation Project Considered: Reliability

Project Occurrence: One-time Originator: Arnulfo Mejia

Category: New Utility Function: Electric Transmission

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|----------|---------|---------|---------|-----------|
| \$260,000 | \$45,000 | \$ - | \$ - | \$ - | \$305,000 |

Description: The software collects data of relay events for analysis after an event/fault occurs. The current version from Schweitzer Engineering Laboratories (SEL) is obsolete. The purchase and implementation of the software's current version to the DMA Blueframe software will collect event data, allow for multiple users to analyze the data and automate and archive the data collected.

Impact of Project:

Project Cost Savings & Revenues: N/A.

Operating Costs: O&M expense will increase due to expected annual maintenance and periodic software updates. O&M expenses will decrease due to the decreased amount of time and vehicle costs for manually downloading the needed relay events data from the substations' sites.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 9

Relay and Protection Upgrade Program

Organization: 2120 Substations & Relaying Funding Source: Improvement and

Commercial Paper

Project Related to: Replacements/Upgrades/Rehabilitation Project Considered: Must Do

Project Occurrence: One-time Originator: Arnulfo Mejia

Category: New Utility Function: Electric Transmission

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|----------|-----------|-----------|---------|---------|-----------|
| \$80,000 | \$280,000 | \$375,000 | \$ - | \$ - | \$735,000 |

Description: Older substations have legacy mechanical or first generation solid state relays models that are no longer supported by the manufacturer. Most of the aforementioned relaying systems cannot acquire data, event reports, history and fault-related information. Engineer and construct new relay panels with program relay settings and commissioning/acceptance testing. The replacements will facilitate data acquisition, testing and troubleshooting.

Impact of Project:

Project Cost Savings & Revenues: O&M savings will occur due to less frequent maintenance. Operating Costs: O&M expense will decrease due to the reduced need for manual analysis and travel to the various sites.

PROJECT REFERENCE 10

Battery Banks Replacement at Waterport, Filter Plant, Price Road and Palo Alto Substations

Organization: 2120 Substations & Relaying Funding Source: Improvement and

Commercial Paper

Project Related to: Replacements/Upgrades/Rehabilitation Project Considered: Reliability

Project Occurrence: One-time

Originator: Arnulfo Mejia

Category: New Utility Function: Electric Transmission

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|----------|---------|---------|---------|-----------|
| \$165,000 | \$50,000 | \$ - | \$ - | \$ - | \$215,000 |

Description: Some of the individual cells are beginning to deteriorate. In the event of an outage, these cells may discharge faster than anticipated, compromising the entire battery bank's capacity. Some of the battery's posts are loose and can cause heating and failure. In some cells, the voltage gets lower than average, causing the need to set the battery bank at equalize to stabilize the bank's voltage. Replace the battery banks and battery chargers at the Waterport, Filter Plant, Price Road and Palo Alto Substations.

Impact of Project:

Project Cost Savings & Revenues: O&M savings due to fewer hours and materials needed to maintain the equipment.

Operating Costs: O&M expense will continue with periodic testing and maintenance.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 11

Substation Equipment Upgrades

Organization: 2120 Substations & Relaying Funding Source: Improvement and

Commercial Paper

Project Related to: Replacements/Upgrades/Rehabilitation Project Considered: Must Do

Project Occurrence: One-time Originator: Arnulfo Mejia
Category: New Utility Function: Electric Transmission

Estimated Project Costs by Fiscal Year

| | J . | / | | | |
|-----------|-----------|-----------|---------|---------|-----------|
| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
| \$200,000 | \$360,000 | \$105,000 | \$ - | \$ - | \$665,000 |

Description: Various capitalized substation equipment currently in service is nearing the end of useful life. Engineer, plan and install substation equipment, including circuit switchers, power transformers, switchgear, circuit breakers, and ancillary equipment to replace existing substation equipment.

Impact of Project:

Project Cost Savings & Revenues: N/A.

Operating Costs: O&M savings will occur due to less frequent maintenance.

PROJECT REFERENCE 12

Install a Second Power Transformer at Palo Alto Substation

Organization: 2120 Substations & Relaying Funding Source: Improvement and

Commercial Paper

Project Related to: Replacements/Upgrades/Rehabilitation Project Considered: Must Do

Project Occurrence: One-time Originator: Arnulfo Mejia

Category: New Utility Function: Electric Transmission

Estimated Project Costs by Fiscal Year

| | | , - 12 - 111 111 | | | |
|-----------|-------------|------------------|---------|---------|-------------|
| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
| \$350,000 | \$2,010,000 | \$1,500,000 | \$ - | \$ - | \$3,860,000 |

Description: The load for Palo Alto Substation's 15/20/25/28 MVA, 138 kV power transformer is at 90% capacity. In order to increase reliability and support new load/customer, install a second 15/20/25/28 MVA along with a 138/12.5 kV power transformer, 161 KV circuit switcher, 12.5 KV switchgear, 4.8 MVA capacitor bank, and protection relays. Upgrade the 138 KV bus and breakers to 3000 amps to support future load.

Impact of Project:

Project Cost Savings & Revenues: Potential revenues may occur due to the increased capacity to support new feeders for potential new customers.

Operating Costs: O&M costs will continue with periodic maintenance and testing of the newly installed equipment.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 13

Loma Alta 12.47 kV Switchgear Replacement

Organization: 2120 Substations & Relaying Funding Source: Improvement and

Commercial Paper

Project Related to: Replacements/Upgrades/Rehabilitation Project Considered: Must Do

Project Occurrence: One-time Originator: Arnulfo Mejia

Category: New Utility Function: Electric Transmission

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|-----------|---------|---------|---------|-----------|
| \$367,500 | \$367,500 | \$ - | \$ - | \$ - | \$735,000 |

Description: The Loma Alta Substation is more than 40 years old. The existing 12.47 kV switchgear has reached the end of its useful life. Equipment failures have increased gradually to the point that some load has been transferred to adjacent substations to keep customers energized. The switchgear's failures have caused BPUB to lose redundancy of the electric service to certain Port of Brownsville customers. Engineer, design, purchase, and construct/install the replacement of the 12.47 kV switchgear.

Impact of Project:

Project Cost Savings & Revenues: O&M savings will occur due to less frequent maintenance.

Operating Costs: O&M expense will continue with periodic testing of equipment.

PROJECT REFERENCE 16

Electric System Utility Work Contract

Organization: 2130 Electric Transmission & Distribution Funding Source: Improvement and

Construction & Maintenance Commercial Paper

Project Related to: Growth
Project Considered: Reliability
Project Occurrence: One-time
Originator: Eliazar C Perez, P.E.

Category: New Utility Function: Electric Distribution

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-------------|-------------|---------|---------|---------|-------------|
| \$2,000,000 | \$1,000,000 | \$ - | \$ - | \$ - | \$3,000,000 |

Description: This item provides funding for the qualified contractor(s) to perform various types of electric utility work to meet the needs of the growing electric system. The contractor(s) will provide labor and equipment composing of at least one crew to provide non-site-specific construction, repair and maintenance in rural and non-rural areas of BPUB's electrical system. BPUB will supply all non-consumable and non-expendable materials for each work assignment. This project will ensure timely electrical installations without sacrificing electrical maintenance programs that sustain and improve reliability.

Impact of Project:

Project Cost Savings & Revenues: New construction utility work will generate revenues from new residential, commercial and industrial customers.

Operating Costs: Proactive maintenance work will lower future maintenance costs for equipment.

| \$750,000 | \$ - | \$ - | \$ - | \$ - | \$750,000 |

Description: This project provides make-ready work throughout the City of Brownsville reasonably determined by BPUB to accommodate telecommunication companies' requests of attachments to the electric utility poles. Install or modify equipment located out in the field, including but not limited to, rearrangement, relocation and/or transfer of existing BPUB attachments, inspections, permitting work, pole strengthening or pole replacement and construction.

Impact of Project:

Project Cost Savings & Revenues: A fee will be charged to the requestor for each application, depending on the scope of work required for the make-ready work requested on the application. Operating Costs: N/A.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 27

Reconductor Alternate Feeder from Waterport Substation to Forza Steel with 477 MCM AAC

Organization: 2410 Electric Engineering Project Related to: Replacements/Upgrades/Rehabilitation

Project Occurrence: One-time

Category: New

Funding Source: Improvement Project Considered: Must Do Originator: Luis G. Martinez, P.E. Utility Function: Electric Distribution

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|---------|---------|---------|---------|-----------|
| \$100,000 | \$ - | \$ - | \$ - | \$ - | \$100,000 |

Description: This project will extend/upgrade the distribution feeder to 477 MCM AAC to meet the growing needs of the affected service area. In addition to service significant developments in this area, the proposed reconductored feeder is vital to temporarily transfer load from existing circuits near peak capacity or during maintenance of the Loma Alta Substation.

Impact of Project:

Project Cost Savings & Revenues: N/A.

Operating Costs: N/A.

PROJECT REFERENCE 28

Extend Feeder from Titan Substation to Stagecoach Road

Organization: 2410 Electric Engineering

Project Related to: Replacements/Upgrades/Rehabilitation

Project Occurrence: One-time

Category: New

Funding Source: Improvement

Project Considered: Load/Capacity Relief

Originator: Luis G. Martinez, P.E. Utility Function: Electric Distribution

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|---------|---------|---------|---------|-----------|
| \$450,000 | \$ - | \$ - | \$ - | \$ - | \$450,000 |

Description: Existing circuits in this area are reaching peak capacity. Install new infrastructure to extend the distribution feeder from Titan Substation towards Stagecoach Road through Dennet Road. In addition to serving future development in this area, the new infrastructure is vital to permanently transferring load from existing circuits nearing peak capacity.

Impact of Project:

Project Cost Savings & Revenues: New customers will provide additional revenue.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 29

Port of Brownsville - Commercial Subdivision

Organization: 2410 Electric Engineering Funding Source: Improvement

Project Related to: Replacements/Upgrades/Rehabilitation Project Considered: Load/Capacity Relief

Project Occurrence: One-time Originator: Luis G. Martinez, P.E. Category: New Utility Function: Electric Distribution

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|---------|---------|---------|---------|-----------|
| \$800,000 | \$ - | \$ - | \$ - | \$ - | \$800,000 |

Description: Install new infrastructure by extending the distribution feeder (approximately 10,800 feet) to meet the growing needs of the service area in the Port of Brownsville.

Impact of Project:

Project Cost Savings & Revenues: New commercial customers will provide additional revenue.

Operating Costs: N/A.

PROJECT REFERENCE 32

Recloser Controls on Substation Feeders

Organization: 2420 Electrical System Planning
Project Related to: Growth
Project Occurrence: One-time

Funding Source: Improvement
Project Considered: Reliability
Originator: Javier Martinez Jr, P.E.

Category: New Utility Function: Electric Distribution

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|---------|---------|---------|---------|-----------|
| \$125,000 | \$ - | \$ - | \$ - | \$ - | \$125,000 |

Description: Install recloser controls through several different substation feeders to improve system reliability to BPUB's customers and provide autonomous control to system operators during potential load transfers.

Impact of Project:

Project Cost Savings & Revenues: O&M costs will be reduced for both troubleshooting and outage

restoration purposes. Operating Costs: N/A.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 33

56MVA Northwest Distribution Ocelot Substation

Organization: 2420 Electrical System Planning Funding Source: Improvement and

Commercial Paper

Project Related to: Growth Project Considered: Load/Capacity Relief

Project Occurrence: One-time Originator: Javier Martinez Jr, P.E. Category: New Utility Function: Electric Transmission

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|-------------|-------------|---------|---------|-------------|
| \$350,000 | \$1,650,000 | \$3,500,000 | \$ - | \$ - | \$5,500,000 |

Description: In order to meet the projected growth for the northwest area of the City of Brownsville, this project will entail the planning, engineering and construction necessary to install a new 56 MVA distribution substation. The new distribution substation will include but is not limited to the purchase and installation of 2 each 138/12.5 kV, 28 MVA power transformers, 2 each 138 kV circuit breakers, 2 each SF-6 gas circuit switchers, a relay switchboard panel, 125V DC backup system, an outdoor 12.5kV metalclad switchgear, and control building.

Impact of Project:

Project Cost Savings & Revenues: N/A

Operating Costs: N/A.

PROJECT REFERENCE 34

Reactive Support Projects

Organization: 2420 Electrical System Planning Funding Source: Improvement and

Commercial Paper

Project Related to: Growth
Project Considered: Reliability
Project Occurrence: One-time
Originator: Javier Martinez Jr, P.E.

Category: New Utility Function: Electric Distribution

Estimated Project Costs by Fiscal Year

| FY 202 | 25 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|---------|----|-----------|-----------|-----------|-----------|-----------|
| \$125,0 | 00 | \$125,000 | \$125,000 | \$125,000 | \$125,000 | \$625,000 |

Description: In order to improve low voltage and address system power factor issues throughout the City of Brownsville, this project will entail the planning, engineering and installation of reactive support devices.

Impact of Project:

Project Cost Savings & Revenues: N/A

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 35

Loma Alta Substation Rebuild

Organization: 2420 Electrical System Planning Funding Source: Improvement and

Commercial Paper

Project Related to: Growth
Project Considered: Reliability
Project Occurrence: One-time
Originator: Javier Martinez Jr, P.E.

Category: New Utility Function: Electric Distribution

Estimated Project Costs by Fiscal Year

| | ./ | / | | | |
|-----------|-----------|-------------|---------|---------|-------------|
| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
| \$150,000 | \$480,000 | \$5,000,000 | \$ - | \$ - | \$5,630,000 |

Description: The aging Loma Alta Substation has only one feeder available, which may fail at any moment. In order to continue providing service to existing customers, the Loma Alta Substation will be reconstructed. One phase will demolish half of the existing substation, reconstruct with new equipment, and move the affected customers to the new side of the substation. The next phase will demolish the other half of the substation, reconstruct and build a 50 MVAR capacitor bank.

Impact of Project:

Project Cost Savings & Revenues: N/A

Operating Costs: N/A.

PROJECT REFERENCE 36

Feeder Extension Projects

Organization: 2420 Electrical System Planning Funding Source: Improvement and

Commercial Paper

Project Related to: Growth Project Considered: General

Project Occurrence: One-time Originator: Javier Martinez Jr, P.E. Category: New Utility Function: Electric Distribution

Estimated Project Costs by Fiscal Year

| | <i>-</i> J | , | | | |
|-----------|------------|-----------|-----------|-----------|-------------|
| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
| \$250,000 | \$500,000 | \$500,000 | \$500,000 | \$500,000 | \$2,250,000 |

Description: In order serve Prisma Heights Subdivision and future development, this project will install new infrastructure by extending distribution feeders from Palo Alto, Titan and South Plant Substations.

Impact of Project:

Project Cost Savings & Revenues: New residential customers will provide revenue from electric utility

usage.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 37

Reliability Improvement Projects

Organization: 2420 Electrical System Planning Funding Source: Improvement and

Commercial Paper

Project Related to: Growth Project Considered: Load/Capacity Relief

Project Occurrence: One-time Originator: Javier Martinez Jr, P.E. Category: New Utility Function: Electric Distribution

Estimated Project Costs by Fiscal Year

| | ./ | | | | |
|-----------|-----------|-----------|-----------|-----------|-------------|
| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
| \$250,000 | \$500,000 | \$500,000 | \$500,000 | \$500,000 | \$2,250,000 |

Description: These projects will permanently transfer existing load from existing circuits nearing peak capacity to new / upgraded distribution feeders throughout the City of Brownsville. The project will include a conductor upgrade system study to determine other areas that are impacted. The project will also include the installation of insulated overhead wire at different locations where tree trimming is not practical, easily accessible or where trimming may possibly destroy the tree. The insulation will help avoid vegetation coming in contact with distribution power lines; thus, reducing the likelihood of service interruptions and extended outage times.

Impact of Project:

Project Cost Savings & Revenues: Revenue will not be lost during outage times. Operating Costs: Reduced costs from troubleshooting and outage restorations.

THE REMAINDER OF THIS PAGE INTENTIONALLY LEFT BLANK.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 38

New Goliath 56MVA Distribution Substation - design

Organization: 2420 Electrical System Planning Funding Source: Improvement and

Commercial Paper

Project Related to: Growth Project Considered: Load/Capacity Relief

Project Occurrence: One-time Originator: Javier Martinez Jr, P.E. Category: New Utility Function: Electric Distribution

Estimated Project Costs by Fiscal Year

| | 9,000 00000 | , | | | |
|-----------|-------------|---------|---------|---------|-----------|
| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
| \$200,000 | \$250,000 | \$ - | \$ - | \$ - | \$450,000 |

Description: In order serve increased demand for services from current customers and future development, this project will design and engineer a new 56MVA distribution substation. The proposed Goliath distribution substation will include, but is not limited to, the installation of two each 138/12.5kV, 28 MVA power transformers, two each 138kV circuit breakers, two each SF6 gas circuit switchers, a relay switchboard panel, 125V DC backup system, an outdoor 12.5kV metalclad switchgear, and control building.

Impact of Project:

Project Cost Savings & Revenues: New residential and commercial customers will provide revenue from electric

utility usage.

Operating Costs: N/A.

PROJECT REFERENCE 41

Advanced Metering Infrastructure (AMI) – electric

Organization: 7130 Enterprise Solutions
Project Related to: Replacement/Upgrades/Rehabilitation
Funding Source: Improvement
Project Considered: General

Project Occurrence: One-time

Originator: Eddy Hernandez

Category: Resubmission Utility Function: Electric Administration

Estimated Project Costs by Fiscal Year

| EX. 2025 | TX 2026 | EX. 2027 | TX 2020 | EX. 2020 | TOTAL |
|-------------|-------------|-----------|---------|----------|-------------|
| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
| \$3,564,121 | \$5,151,226 | \$569,129 | \$ - | \$ - | \$9,284,476 |

Description: BPUB will optimize meter reading, customer service, operational efficiency and electric use-efficiency efforts through the procurement and installation of AMI technology. The scope of work includes materials, supervision, installation, and retrofitting/replacing approximately 57,000 meters. Purchase and install new communications networks to transmit the large volume of interval load data from the meter to the utility systems. Purchase and install the meter data management system (MDMS) to store and process the interval load data; and to integrate the meter data with key information and control systems, including head-end systems (Customer Information System, Geographic Information System, etc.). Note: \$358,227 is the FY 2024 carryover amount.

Impact of Project:

Project Cost Savings & Revenues: The costs of labor and transportation will be greatly reduced.

ELECTRIC, WATER AND WASTEWATER FY 2025 - FY 2029

PROJECT REFERENCE 44

CR15 APPA Subaward

Organization: 7190 SCADA Funding Source: Improvement Project Related to: Replacements/Upgrades/Rehabilitation Project Considered: Reliability

Project Occurrence: One-time Originator: Elias Quintero Jr. Utility Function: Electric Distribution Category: New

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|---------|---------|---------|---------|-----------|
| \$234,157 | \$ - | \$ - | \$ - | \$ - | \$234,157 |

Description: The Department of Energy, through the American Public Power Association, provides a grant to facilitate the rapid adoption and deployment of Industrial Control Systems (ICS) cybersecurity technologies for municipal utilities.

Impact of Project:

Project Cost Savings & Revenues: N/A.

Operating Costs: O&M expense will continue with software maintenance.

PROJECT REFERENCE 45

OSI SCADA Upgrade

Organization: 7190 SCADA Funding Source: Improvement and

Commercial Paper

Project Related to: Replacements/Upgrades/Rehabilitation

Project Considered: Reliability Project Occurrence: One-time Originator: Elias Quintero Jr.

Utility Function: Electric Distribution Category: New

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|-----------|---------|---------|---------|-------------|
| \$600,000 | \$500,000 | \$ - | \$ - | \$ - | \$1,100,000 |

Description: The Electric SCADA OSI System, purchased and installed in 2018, requires a major upgrade that includes both hardware and software improvements. In addition to the base SCADA system software upgrade, improvements will include an upgrade to the existing Historian application software, an upgrade to the OMS module that will remove a cybersecurity vulnerability, the addition of the Compass module that will allow the OMS to be shared with mobile operations, and the AVL module that will facilitate deployment of response units to outages. This upgrade will allow the system to be fitted with the latest compatible OS systems and improved OT network cybersecurity equipment.

Impact of Project:

Project Cost Savings & Revenues: N/A.

Operating Costs: O&M expense will continue with software maintenance.

ELECTRIC, WATER AND WASTEWATER FY 2025 - FY 2029

PROJECT REFERENCE 46

Substation and Control Centers Video Camera Upgrade

Organization: 7190 SCADA Funding Source: Improvement and

Commercial Paper

Project Considered: Reliability Project Related to: Replacements/Upgrades/Rehabilitation

Originator: Elias Quintero Jr. Project Occurrence: One-time

Category: New Utility Function: Electric Distribution

Estimated Project Costs by Fiscal Year

| | 9,000 | , | | | |
|-----------|-----------|---------|---------|---------|-----------|
| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
| \$200,000 | \$180,000 | \$ - | \$ - | \$ - | \$380,000 |

Description: Existing Cisco Video Media Software has reached end-of-sale date and end of life, with no available support and patching. All video cameras are also outdated and are in constant need of repairs. This project will include the purchase, installation and implementation of replacement video media servers, video media software, and video cameras located at all substations, control centers, and the Power Plant. The new system will comply with one of the requirements in the NERC CIP Standard on Physical Perimeter Security and will include integration of all camera feeds to a central location.

Impact of Project:

Project Cost Savings & Revenues: O&M savings will occur due to less frequent maintenance.

Operating Costs: O&M expense will continue with periodic maintenance by the Safety and Security Operations

Department.

PROJECT REFERENCE 47

Fiber Improvement Project

Funding Source: Improvement and Organization: 7190 SCADA

Commercial Paper

Project Related to: Growth Project Considered: Reliability

Project Occurrence: One-time Originator: Elias Quintero Jr.

Category: New Utility Function: Electric Distribution

Estimated Project Costs by Fiscal Year

| | ., | | | | |

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
| \$50,000 | \$150,000 | \$ - | \$ - | \$ - | \$200,000 |

Description: The City of Brownsville commenced the BTX Fiber Project, which will provide high-speed, fiber internet service to every home and business within the city. This project involves the installation of 100 miles of middle mile fiber-optic cable and 500 miles of last mile fiber connecting the middle-mile fiber to individual homes and businesses. The Fiber Improvement Project includes the purchase and installation of equipment and materials required to access, splice and terminate all fibers coming into BPUB's facilities.

Impact of Project:

Project Cost Savings & Revenues: N/A.

Operating Costs: O&M expense will include preventative and corrective maintenance of all termination panels and fibers.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 51

Silas Ray Continuous Emission Monitoring System (CEMS) NOx Analyzers

Organization: 1420 Environmental Compliance Funding Source: Improvement Project Related to: Project Considered: Reliability

Replacements/Upgrades/Rehabilitation

Project Occurrence: One-time Originator: Ramiro Capistran Jr.
Category: New Utility Function: Electric Generation

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|----------|---------|---------|---------|---------|----------|
| \$98,028 | \$ - | \$ - | \$ - | \$ - | \$98,028 |

Description: The existing NOx analyzers play a crucial role in measuring nitrogen oxides emissions from the Silas Ray Power Plant for compliance assurance. The current models are obsolete and require replacement. Purchase and install 4 each NOx analyzers to replace the existing units.

Impact of Project:

Project Cost Savings & Revenues: N/A.

Operating Costs: N/A.

PROJECT REFERENCE 52

Silas Ray Continuous Emission Monitoring Dataloggers

Organization: 1420 Environmental Compliance Funding Source: Improvement Project Related to: Project Considered: Reliability

Replacements/Upgrades/Rehabilitation

Project Occurrence: One-time Originator: Ramiro Capistran Jr.
Category: New Utility Function: Electric Generation

|----------|---------|---------|---------|---------|----------|
| \$60,030 | \$ - | \$ - | \$ - | \$ - | \$60,030 |

Description: The existing dataloggers play a crucial role in measuring emissions from the Silas Ray Power Plant for compliance assurance. The current models are obsolete and require replacement. Purchase and install 3 each dataloggers to replace the existing units.

Impact of Project:

Project Cost Savings & Revenues: N/A.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 55

Unit 10 Chiller Cooling Tower Replacement

Organization: 2220 Power Production Funding Source: Improvement and

Commercial Paper

Project Related to: Replacement/Upgrades/Rehabilitation Project

Project Occurrence: One-time

Category: Carryover

Project Considered: Must Do Originator: Rolando Lozano, P.E. Utility Function: Electric Generation

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|-------------|---------|---------|---------|-------------|
| \$300,000 | \$1,660,666 | \$ - | \$ - | \$ - | \$1,960,666 |

Description: The current tower infrastructure has degradation of internal and external metal structures due to solar exposure and a corrosive environment. The replacement of the cooling tower designed for the specific application will reduce maintenance costs and liability and improve performance.

Impact of Project:

Project Cost Savings & Revenues: Cost reduction of approximately \$30,000 per year is estimated for reduced repair costs and improved performance.

Operating Costs: Routine maintenance and upkeep is expected.

PROJECT REFERENCE 56

Unit 6 Improvements, HRSG Economizer Panel Replacement and Generator Gas Analyzer Replacement

Organization: 2220 Power Production
Project Related to: Replacement/Upgrades/Rehabilitation

Project Occurrence: One-time

Category: Carryover

Funding Source: Improvement Project Considered: Reliability Originator: Rolando Lozano, P.E. Utility Function: Electric Generation

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|---------|---------|---------|---------|-----------|
| \$544,359 | \$ - | \$ - | \$ - | \$ - | \$544,359 |

Description: Replace the Heat Recovery System Generator (HRSG) economizer section, which has reached the end of its useful life, by purchasing and installing three each split lower header economizer panels and a generator gas analyzer system. Note: \$391,608 is the FY 2024 carryover amount.

Impact of Project:

Project Cost Savings & Revenues: Cost reduction of approximately \$100,000 - \$200,000 per year is estimated for reduced repair costs.

Operating Costs: Routine maintenance and upkeep is expected.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 57

Hidalgo Capital Improvements

Organization: 2220 Power Production Funding Source: Improvement and

Commercial Paper

Project Related to: Replacement/Upgrades/Rehabilitation Project Considered: Load/Capacity Relief

Project Occurrence: Recurring
Category: Routine

Originator: Rolando Lozano, P.E.
Utility Function: Electric Generation

Estimated Project Costs by Fiscal Year

Impact of Project:

Project Cost Savings & Revenues: N/A.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 70

BPUB Billboard Construction

Organization: 1135 Communications & Public Relations Funding Source: Improvement

Project Related to: Growth Project Considered: General

Project Occurrence: One-time Originator: Constanza Miner, EDFP
Category: New Utility Function: General Administration

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-------------|---------|---------|---------|---------|-------------|
| \$1,000,000 | \$ - | \$ - | \$ - | \$ - | \$1,000,000 |

Description: BPUB currently leases advertising on two digital billboards, one located on the Frontage Road near Sunrise Mall and the other on intersection of Boca Chica Blvd and Paredes Line Road. The advertising on the billboards is shared with other companies. By constructing two each billboards on BPUB-owned sites, messaging on the billboard can be changed when necessary.

Impact of Project:

Project Cost Savings & Revenues: Reduce/eliminate the current advertising contract with the vendor.

BPUB currently pays \$6,000 per month for this contract.

Operating Costs: The new infrastructure will require routine preventative maintenance.

PROJECT REFERENCE 73

Implementation of an Enterprise Content Management (ECM) System

Organization: 1165 Records Management Funding Source: Improvement Project Related to: Replacement/Upgrades/Rehabilitation Project Considered: Must Do

Project Occurrence: One-time Originator: Nancy Arriaga

Category: New Utility Function: General Administration

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|---------|---------|---------|---------|-----------|
| \$137,607 | \$ - | \$ - | \$ - | \$ - | \$137,607 |

Description: The implementation of the ECM System consists of conducting a needs assessment, developing system specifications, projecting cost benefit analysis, developing request for proposals, evaluating and selecting vendor, and installation and implementation of the system.

Impact of Project:

Project Cost Savings & Revenues: BPUB will not have to spend funds every six months to add 20 terabytes of storage capacity and will not have to store paper records since the retention period will be incorporated into the ECMS.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 76

HVAC Replacement Project

Organization: 1422 Analytical Lab Funding Source: Improvement and

Commercial Paper

Project Related to: Replacements/Upgrades/Rehabilitation Project Considered: General

Project Occurrence: One-time Originator: Gabriel Coronado Jr

Category: New Utility Function: General Administration

Estimated Project Costs by Fiscal Year

| | <i>-</i> J | , | | | |

Description: The Analytical Lab Building has been in service for more than 20 years. Due to internal humidity issues, wall and ceiling repairs are required throughout portions of the building. This project will replace stained building sheet rock, laboratory cabinets, roof, and other areas identified through the engineering design.

Impact of Project:

Project Cost Savings & Revenues: N/A.

Operating Costs: Continual building maintenance is expected after project completion.

Virtual Assistant

Organization: 6110 Customer Service

Project Related to: Growth

Project Occurrence: One-time Category: New

Funding Source: Improvement Project Considered: General

Originator: Eduardo Campirano, Jr. Utility Function: Customer Service

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|----------|---------|---------|---------|---------|----------|
| \$71,000 | \$ - | \$ - | \$ - | \$ - | \$71,000 |

Description: The proposed virtual assistant/chat bot will answer customer inquiries, direct customers to the appropriate website location and have the ability to process customer payments. A virtual assistant is a dynamic artificial intelligence platform that automates conversational experiences for customers and employees. With the utilization of a virtual agent, BPUB will enhance the customer experience, reduce resolution times, enhance customer trust, reduce call volume and will be available 24/7/265 in multiple languages.

Impact of Project:

Project Cost Savings & Revenues: Reduction in call volume will reduce the need for additional staff and

overtime.

Operating Costs: Software maintenance costs will incur annually.

PROJECT REFERENCE 99

Cayenta The Customer Engagement Portal

Organization: 6135 CIS Support

Project Related to: Replacements/Upgrades/Rehabilitation

Project Occurrence: One-time

Category: Carryover

Funding Source: Improvement Project Considered: Must Do Originator: Norma A. Gomez Utility Function: Customer Service

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|---------|---------|---------|---------|-----------|
| \$262,697 | \$ - | \$ - | \$ - | \$ - | \$262,697 |

Description: The existing Customer Self Service Portal is outdated and not compatible with the recently updated Outage Management System (OMS). Cayenta, the vendor providing the Customer Information System, will no longer support the existing portal. Purchase and implement Cayenta's Customer Engagement Portal, which includes the Customer Engagement Portal, Engager Mobile App, basic Customer Preference Management functionality, and integration to the OMS. Note: \$250,360 is the FY 2024 carryover amount.

Impact of Project:

Project Cost Savings & Revenues: Reduce labor costs incurred to answer customer requests for outage, bill and

historical information. Operating Costs: N/A.

Project Occurrence: One-time Originator: Jose Armando Garza Category: New Utility Function: Water Treatment

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|----------|---------|---------|---------|---------|----------|
| \$90,000 | \$ - | \$ - | \$ - | \$ - | \$90,000 |

Description: This project will consist of replacing the variable frequency drives for raw water pumps No. 1, 2, and 3. Current age of the existing VFDs are over 10 years old. There have been frequent pump faults due to the VFDs; and staff has been trying to preserve the life of them by installing new parts.

Impact of Project:

Project Cost Savings & Revenues: This project will generate savings in the form of reduced costs from

external technicians and the reliability of new parts with warranty.

Operating Costs: N/A.

PROJECT REFERENCE 133

Pump and Motor Replacement of Reservoir Raw Water Pump Number 1

Organization: 3130 Water Plant II Funding Source: Improvement Project Related to: Replacements/Upgrades/Rehabilitation Project Considered: Reliability

Project Occurrence: One-time Originator: Jose Armando Garza Category: New Utility Function: Water Treatment

Project Occurrence: One-time Originator: Rene Mariscal

Category: New Utility Function: Water Administration

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|----------|---------|---------|---------|---------|----------|
| \$90,935 | \$ - | \$ - | \$ - | \$ - | \$90,935 |

Description: Purchase a new mobile office trailer to support the administrative needs of the dredging crew personnel.

Impact of Project:

Project Cost Savings & Revenues: Increased operations efficiency due to proposed location.

Operating Costs: Operation and maintenance costs for the new building.

PROJECT REFERENCE 139

Resaca Restoration Dewatering System 2024

Organization: 3135 Resaca Maintenance Funding Source: Resaca Fee CIP
Project Related to: Growth Project Considered: Reliability
Project Occurrence: One-time Originator: Rene Mariscal

Category: New Utility Function: Water Administration

Estimated Project Costs by Fiscal Year

| | <u> </u> | | | | |
|-----------|-------------|---------|---------|---------|-------------|
| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
| \$800,000 | \$3,200,000 | \$ - | \$ - | \$ - | \$4,000,000 |

Description: The dewatering system separates and removes trash, debris, sand and water from dredged material. Excess water is removed during the dredging process. The remaining slurry is treated with polymer to separate the sediment and water. Dewatering improves the stability of the remaining sediment material and prepares for transport and drying purposes. The excess water is returned to the resaca. The current dewatering system has been in operation since 2013 and has reached the end of its useful life, incurring increased maintenance, repair and operational costs.

Impact of Project:

Project Cost Savings & Revenues: Increased operations efficiency due to the use of the new system. Operating Costs: Reduce operation and maintenance costs and down time.

PROJECT REFERENCE 170

City Streets Contract – E. 14th Street – District 1

Organization: 3310 Water & Wastewater Engineering Project Related to: Replacements/Upgrades/Rehabilitation

Project Occurrence: One-time

Category: New

Funding Source: Improvement Project Considered: Must Do Originator: Marie C. Leal

Utility Function: Water Transmission &

Distribution

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|---------|---------|---------|---------|-----------|
| \$200,000 | \$ - | \$ - | \$ - | \$ - | \$200,000 |

Description: Replace the existing waterline along E. 14th Street from Southmost Road to International Blvd with PVC pipe, valves and service laterals in coordination with the City Street Reconstruction Project.

Impact of Project:

Project Cost Savings & Revenues: Replacement of degraded infrastructure is expected to reduce system

breakdowns and maintenance costs.

Operating Costs: Normal maintenance expected for the waterlines.

PROJECT REFERENCE 171

New Raw Water River Intake Facility - Engineering

Organization: 3310 Water & Wastewater Engineering

Project Related to: Replacement/Upgrades/Rehabilitation Project Occurrence: One-time

Category: Resubmission

Funding Source: Impact Fees Project Considered: Must Do Originator: Marie C. Leal Utility Function: Water Supply

Estimated Project Costs by Fiscal Year

| | <u> </u> | / | | | |
|-----------|-------------|---------|---------|---------|-------------|
| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
| \$600,915 | \$1,959,085 | \$ - | \$ - | \$ - | \$2,560,000 |

Description: Existing river intake pumps station (pump No. 1 and No. 2), which are used to convey flow from the Rio Grande River to Water Treatment Plant No. 1 and No. 2, are over 80 years old and are in need of replacement. Design, engineer and manage the construction of a new raw water pump station to replace this facility. Note: \$600,915 is the FY 2024 carryover amount.

Impact of Project:

Project Cost Savings & Revenues: Minimal down time and minimal expenditures on parts and

maintenance.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 172

New Raw Water River Intake Facility - Construction

Organization: 3310 Water & Wastewater Engineering Funding Source: Improvement and Commercial

Pape

Project Related to: Replacement/Upgrades/Rehabilitation

Project Occurrence: One-time Category: Resubmission

Project Considered: Must Do Originator: Marie C. Leal Utility Function: Water Supply

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|---------|---------|---------|--------------|--------------|--------------|
| \$ - | \$ - | \$ - | \$10,600,000 | \$10,600,000 | \$21,200,000 |

Description: Existing river intake pumps station (pump No. 1 and No. 2), which are used to convey flow from the Rio Grande River to Water Treatment Plant No. 1 and No. 2, are over 80 years old and are in need of replacement. Construct a new raw water pump station to replace this facility.

Impact of Project:

Project Cost Savings & Revenues: Minimal down time and minimal expenditures on parts and

naintenance.

Operating Costs: N/A

PROJECT REFERENCE 173

Waterline Upgrade near WTP No. 1 (on 13th Street)

Organization: 3310 Water & Wastewater Engineering Funding Source: Impact Fees

Project Related to: Growth Project Considered: Load/Capacity Relief

Project Occurrence: One-time Originator: Marie C. Leal

Category: New Utility Function: Water Transmission &

Distribution

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|----------|-----------|---------|---------|---------|-----------|
| \$59,835 | \$350,000 | \$ - | \$ - | \$ - | \$409,835 |

Description: Design and engineer the upgrade of approximately 1,600 linear feet of 12-inch diameter waterline to 30-inch diameter waterline along W. 13th Street from Water Treatment Plant No. 1 to West Saint Charles Street to provide optimum water pressures and services to customers and increase water distribution capacity during future peak flow demand.

Impact of Project:

Project Cost Savings & Revenues: Since deteriorated AC lines typically require more

maintenance/repair, there will be less maintenance costs after replacement.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 174

FM 511 24-inch Waterline Loop (SRWA to Old Port Isabel Rd) - engineering

Organization: 3310 Water & Wastewater Engineering Funding Source: Impact Fees

|-----------|---------|---------|---------|---------|-----------|
| \$598,819 | \$ - | \$ - | \$ - | \$ - | \$598,819 |

Description: This project is a segment of a 24-inch transmission waterline proposed from the SRWA Water Plant to the Port of Brownsville. The project will provide new service capabilities along FM 511 from Paredes Line Road to Dr. Hugh Emerson Road. The project increases the distribution capacity from the SRWA Water Treatment Plant to the northeast side of town in order to serve future water demand. Note: \$549,485 is the FY 2024 carryover amount.

Impact of Project:

Project Cost Savings & Revenues: N/A.

Operating Costs: N/A

PROJECT REFERENCE 175

Owens Road Bridge Utility Adjustment (Phase II) – Engineering and Construction

Organization: 3310 Water & Wastewater Engineering
Project Related to: Replacements/Upgrades/Rehabilitation

PROJECT REFERENCE 197

Advanced Metering Infrastructure (AMI) - Water

Organization: 7130 Enterprise Solutions

Project Related to: Replacements/Upgrades/Rehabilitation

Project Occurrence: One-time

Funding Source: Improvement

Project Considered: General

Originator: Eddy Hernandez

Category: Carryover Utility Function: Water Administration

Estimated Project Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-------------|-------------|-----------|---------|---------|-------------|
| \$2,252,001 | \$6,519,347 | \$527,759 | \$ - | \$ - | \$9,299,107 |

Description: BPUB will optimize meter reading service operational efficiency and water use-efficiency efforts through the procurement and installation of AMI technology. The scope of work for the project includes: materials, supervision, installation, retrofitting and replacing 55,369 water meters, on-going maintenance and customer support service for an AMI system, a customer facing portal and integration to Cayenta billing software. Note: \$267,899 is the FY 2024 carryover amount.

Impact of Project:

Project Cost Savings & Revenues: Less frequent on-cycle meter reads and disconnect/reconnects will reduce labor and vehicle related costs (vehicle, fuel, insurance, maintenance).

Impact of Project:

Project Cost Savings & Revenues: Work effort adds additional connections to the system.

Operating Costs: N/A

PROJECT REFERENCE 225

Chlorine Contact Chamber Sluice Gate Replacement Project – engineering and construction

Organization: 3210 South Wastewater Treatment Plant
Project Related to: Replacements/Upgrades/Rehabilitation
Project Considered: Reliability

Project Occurrence: One-time Originator: Louis Bennett Jr

Category: Carryover Utility Function: Wastewater Treatment

Estimated Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|---------|---------|---------|---------|-----------|
| \$272,218 | \$ - | \$ - | \$ - | \$ - | \$272,218 |

Description: Replace four sluice gates at the Chlorine Contact Chamber Station area. Existing gates were installed behind the wall; and the head pressure is pushing against the sluice gates, making it difficult to open and close. Sluice gate shafts are warped, and gates remain leaking when closed. Design, engineer and install new sluice gates with new valve actuators and back-up batteries. Note: \$272,218 is the FY 2024 carryover amount.

Impact of Project:

Project Cost Savings & Revenues: New replacement sluice gates and actuators will improve chlorine contact changer station efficiency, allowing the treatment plant process to respond with better treatment capabilities, resulting in lower cost for treatment per million gallons processed.

Operating Costs: Annual preventative maintenance and lubrication, as recommended by the manufacturer

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 226

Three (3) New 25 Yard Bio-Solids Metal Roll-off Bins

Organization: 3210 South Wastewater Treatment Plant Project Related to: Replacements/Upgrades/Rehabilitation

Project Occurrence: One-time

Category: New

Funding Source: Improvement Project Considered: Reliability Originator: Louis Bennett Jr

Utility Function: Wastewater Treatment

Estimated Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|----------|---------|---------|---------|---------|----------|
| \$35,755 | \$ - | \$ - | \$ - | \$ - | \$35,755 |

Description: The existing roll-off bins transport dewatered bio-solids from the treatment plant to the Dedicated Land Disposal site. The metal bins are exposed to the harsh environment and corrosive material, which promotes rust issues that are the main cause of repairs. The bins have constantly undergone multiple repairs regarding partial metal restoration, wheel replacement, walls and floors lining reinforcement and painting. Purchase to replace 3 existing units.

Impact of Project:

Project Cost Savings & Revenues: Repair costs will be minimized during the first 2 or 3 years of use. Operating Costs: Costs for routine for maintenance will continue for the life of the equipment.

PROJECT REFERENCE 227

SWWTP Headworks Rehabilitation

Organization: 3210 South Wastewater Treatment Plant Funding Source: Improvement and Commercial

Pan

Project Related to: Replacements/Upgrades/Rehabilitation Project Considered: Reliability

Project Occurrence: One-time Originator: Louis Bennett Jr

Description: The existing Headworks Screening System and Compactor is outdated and has exceeded its life expectancy, impacting the removal capabilities of inorganic materials, sand, silt, etc. Design, engineer, procure and install the upgrade of the headworks screening system to a more efficient removal system.

Impact of Project:

Project Cost Savings & Revenues: The new system will improve efficiency allowing the treatment plant process to respond with better treatment capabilities, resulting in a lower cost for treatment per million gallons processed. Operating Costs: Annual preventative maintenance and lubrication, as recommended by the manufacturer.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 232

Robindale WWTP indirect potable reuse project Phase I BOR Grant

Organization: 3220 Robindale Wastewater Treatment Plant
Project Related to: Replacements/Upgrades/Rehabilitation
Project Occurrence: One-time

Funding Source: Grants
Project Considered: General
Originator: Marie C. Leal

Category: New Utility Function: Wastewater Treatment

Estimated Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-----------|---------|---------|---------|---------|-----------|
| \$196,506 | \$ - | \$ - | \$ - | \$ - | \$196,506 |

Description: The Robindale WWTP produces an average of 8 million gallons per day of effluent outflows. The discharge flows via an existing ditch to the Port of Brownsville's ship channel and ultimately to the Gulf of Mexico. Indirect potable reuse uses an environmental buffer, such as a resaca or lake, before the water is treated at a water treatment plant. The intent for the proposed indirect potable reuse system is to treat wastewater effluent to a quality suitable for potable water. This project's objective is to reroute the effluent flows from the Robindale Plant to Resaca De La Guerra and Water Treatment Plant No. 2. This project funds the engineering services and application of a grant from the U.S. Bureau of Reclamation Drought Response Program.

Impact of Project:

Project Cost Savings & Revenues: N/A

Operating Costs: N/A.

PROJECT REFERENCE 235

Lift Station No. 9 Pump Rehabilitation

Organization: 3230 Wastewater Lift Stations
Project Related to: Replacements/Upgrades/Rehabilitation
Project Occurrence: One-time

Funding Source: Improvement
Project Considered: Must Do
Originator: Hector Herrera Jr

Project Considered: Reliability

Project Occurrence: One-time

Originator: Marie C. Leal

Category: New Utility Function: Wastewater Collection

Estimated Project Costs by Fiscal Year

| EV 2025 | FV 2026 | FV 2027 | EV 2020 | EV 2020 | TOTAL |
|-----------|---------|---------|---------|---------|-----------|
| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
| \$243,187 | \$ - | \$ - | \$ - | \$ - | \$243,187 |

Description: The project involves replacement of gravity sanitary sewer collection system with PVC pipe, fiberglass manholes and service laterals in coordination with City Street Reconstruction Projects. Note: \$13,934 is the FY 2024 carryover amount.

Impact of Project:

Project Cost Savings & Revenues: Replacement of degraded infrastructure will reduce system

breakdowns occurrences and O&M costs.

|-----------|---------|---------|---------|---------|-----------|
| \$203,280 | \$ - | \$ - | \$ - | \$ - | \$203,280 |

Description: Replace the existing gravity sewer collection along Coffee Road from FM 802 to Old Port Isabel Road with PVC pipe, fiberglass manholes and service laterals in coordination with the City Street Reconstruction Project.

Impact of Project:

Project Cost Savings & Revenues: Replacement of degraded infrastructure is expected to reduce system breakdowns and maintenance costs.

ELECTRIC, WATER AND WASTEWATER FY 2025 – FY 2029

PROJECT REFERENCE 284

North Regional Force Main - Phase I

Organization: 3230 Wastewater Lift Stations Funding Source: Impact Fees

Project Related to: Growth Project Considered: Load/Capacity Relief

Project Occurrence: One-time Originator: Marie C. Leal

Category: New Utility Function: Wastewater Pumping

Estimated Costs by Fiscal Year

| FY 2025 | FY 2026 | FY 2027 | FY 2028 | FY 2029 | TOTAL |
|-------------|-------------|---------|---------|---------|-------------|
| \$2,235,294 | \$3,000,000 | \$ - | \$ - | \$ - | \$5,235,294 |

Description: Wastewater flow from BPUB's northwest service areas is currently bottlenecked through a series of force mains and lift stations along major arterials that serve other areas and were not designed/sized to serve the northwest. These force mains and lift stations are overloaded and cannot accommodate any more flow from additional growth. This project includes construction of four regional lift stations and a major trunk force main across the north side of BPUB's service area connecting the system directly to the Robindale Wastewater Treatment Plant. Note: \$211,817 is the FY 2024 carryover amount.

Impact of Project:

Project Cost Savings & Revenues: N/A.

Operating Costs: N/A.

APPENDICES

Appendices Section

This part of the Brownsville PUB Annual Budget Report presents detailed information as a context for understanding what the information in the required statistical and supplementary information says about the Brownsville PUB.

| Contents | Page |
|---|-------------|
| BPUB Description and Utility Service Territory Maps These schedules include supplemental data that describe the organization, the community, and service territory. | 407 |
| Financial Trends | |
| These schedules contain trend information to help the reader understand how the Brownsville Public Utilities Board's financial performance and well-being has changed over time. | 408 |
| Revenue Capacity | |
| These schedules contain information to help the reader access the Brownsville PUB's local revenue source. | 412 |
| Debt Capacity | |
| These schedules present information to help the reader assess the Brownsville PUB's debt burden and its ability to issue additional debt in the future. | 417 |
| Demographic and Economic Information | |
| This schedule offers demographic and economic indicators to help the reader understand the environment in which the Brownsville PUB's financial activities take place. | 419 |
| Operating Information | |
| These schedules contain service and infrastructure data to help the reader understand how the information in the Brownsville PUB's financial report relates to the service Brownsville PUB provides and activities it performs. | 428 |
| Glossary | 433 |
| This schedule includes any terminology (including abbreviations and acronyms) that are not readily understandable. | |

DESCRIPTION

Profile

The Brownsville PUB was formed in 1960 to provide electrical, water, and wastewater services to its customers in the Brownsville area. Pursuant to the City's Charter, management, operation, and control of the City's combined water, wastewater, and electric utilities system is delegated to the Brownsville PUB. The Brownsville PUB is comprised of seven members, six of whom are appointed by the City Commission for four-year terms and the seventh member being the City's Mayor serving ex-officio.

The Electric System provides retail electric service through its electric facilities to consumers inside and outside the city limits. The existing customer service area of the electric facilities encompasses approximately 133 square miles of Cameron County, including substantially the entire City (estimated by the Brownsville PUB as over 96%). The electric system serves a growing base of approximately 54,008 customers and serves a peak load of 301 MW. Current resources, mainly owned by the Brownsville PUB, are sufficient to cover peak demand.

The Board meets its power supply obligations through a combination of resources: (i) the operation of the Silas Ray Power Production Facilities owned and operated by the Board (composed of one conventional steam turbine unit and a re-powered steam turbine in Combined Cycle with a combustion turbine and a GE LM6000 gas turbine generator for an estimated gas fired capability of 115 MW), (ii) the operation of the Calpine/Hidalgo combined cycle Power Plant in which the Board has an ownership interest entitling it to 105 MW of capacity, (iii) a Power Purchase Agreement with Constellation Energy Generation, LLC, formerly Exelon Corporation, entitling the Board to purchase 78 MW of renewable energy, (iv) a Power Purchase Agreement with AEP Energy Partners, Inc. entitling the Board to an estimated 65 MW of energy and (v) economy energy purchases through an economy power interchange arrangement.

The Board currently has a gas transportation agreement with Texas Gas Service ("TGS"), a division of ONE Gas, Inc., a gas supply agreement with Tenaska Marketing Ventures ("TMV") for service to its Silas Ray generation units and a gas supply agreement with Calpine Energy Services, LP for service to its Calpine/Hidalgo Plant.

Electric service is also provided in the unincorporated areas surrounding the City by American Electric Power (AEP, formally Central Power and Light Company) and Magic Valley Electric Cooperative, Inc. (MVEC). Each such entity also has a small number of customers inside the Brownsville city limits.

The Brownsville PUB has authority to provide electric service to customers within and outside the boundaries of the City in areas to which it is certified for electric service by the PUCT. The Brownsville PUB is singly certified in a substantial portion of its service area within the boundaries of the City and, within the area, it alone is presently authorized to provide electric service. The Brownsville PUB is also singly certified to serve the developed portion of the Port of Brownsville. While the Brownsville PUB's multiple-certified service area will not be open to new competitors unless the Brownsville PUB and the City Commission "opt in" to retail competition, the electric system competes within that area against the other utilities that have been certified in the past to provide service in that area.

In areas where the Brownsville PUB is dually or multiple-certified with other electric utilities, the Brownsville PUB, AEP and MVEC compete for electric customers. In these areas the customer chooses the utility system from which it will receive electric service. Of the approximately 133 square miles

which comprise the Brownsville PUB's electric service area, competition exists within approximately 11.5 square miles. The Brownsville PUB may serve areas newly annexed by the City only if it is singly, dually, or multiple-certified by the PUCT to serve the area.

The Water System draws raw water from the Rio Grande River and consists of a river rock weir, a river pump station, two reservoirs providing 187 million gallons total capacity, and a raw water transport system. Surface water treatment is achieved by two water treatment plants providing 40 million gallons per day (MGD) of total capacity (20 MGD treatment capacity each). Two clear wells provide 6.85 million gallons storage capacity, and four elevated storage tanks provide 7 million gallons of elevated storage capacity. Water is pumped by four high-service pumping stations into the distribution system which consists of 715 miles of transmission and distribution mains. The Brownsville PUB mainly sells to residential and commercial customers, but also sells treated water on a wholesale basis to three other water distribution companies that amount to approximately 8.0% of sales. The Brownsville PUB partnered with the SRWA and built a 7.5 million gallon reverse osmosis water treatment plant of which the Brownsville PUB has 92.91% ownership. The SRWA plant completed an expansion in 2015 to provide microfiltration pretreatment and an increased total production capacity of 10 MGD. This SRWA plant includes a 7.5 million gallon storage tank.

The Brownsville PUB has an annual allocation of municipal priority water rights from the Texas Commission on Environmental Quality (TCEQ) in the amount of 31,522.46 acre-feet of water, which is dependent upon inflow to the Falcon and Amistad Reservoirs. In addition, the Brownsville PUB holds Permit No. 1838 entitling it the right to 40,000 acre-feet of surplus water.

The Brownsville PUB is subject to regulation of water quality by the TCEQ. The Brownsville PUB presently has a "Superior" water system as determined in accordance with current TCEQ regulations. The Brownsville PUB's water utility service area is subject to the certification jurisdiction of the TCEQ. The Brownsville PUB has been certified singly to provide water service within the boundaries of the City. A large portion of the area, three and one-half miles surrounding the boundaries (the "extraterritorial jurisdiction") of the City, is dually certified. There is a small water utility system (El Jardin Water Supply Corporation) whose customers are situated adjacent to or within the System. All of its treated water is supplied by the Brownsville PUB's water system.

The Wastewater System, consisting of collection and treatment facilities, includes gravity wastewater collection lines, 177 pumping/lift stations and two treatment plants. Wastewater is transported by lift stations and associated force mains to one of two wastewater treatment plants - the Robindale Plant or the South Plant. The Robindale Plant was designed to treat 5 MGD in 1980 and expanded to a capacity of 10 MGD in 1995. The Robindale renovation and expansion project completed in June 24, 2014 increased the treatment capacity to 14.5 MGD. The Robindale Plant provides secondary waste treatment utilizing a Modified Ludzack-Ettinger (MLE) process (anoxic and aerobic with an internal nitrate cycle) of activated sludge, turbo blowers (with magnetic bearings) with auto dissolved oxygen control, secondary settling, ultra-violet light system (for disinfection), effluent cascade aeration system, sludge thickening, aerobic digestion, mechanical sludge dewatering (via 2-meter belt filter press), a SCADA (Supervisory Control and Data Acquisition) system, and land disposal of sludge (City of Brownsville Solid Waste Landfill). The South Plant was originally designed as a trickling filter plant with a treatment capacity of 5 MGD. In 1971, it was expanded to a capacity of 7.8 MGD and was further modified in 1978 to include complete-mix. In 2000, the plant was expanded to 12.8 MGD. The treatment process was changed to complete mix activated sludge and the anaerobic digesters were converted to use the aerobic process. Sludge is thickened, dewatered by a belt filter press, and disposed of at the City of Brownsville Solid Waste Landfill.

The wastewater system is subject to regulation by the EPA and the TCEQ with regards to operations of the facilities and the water quality of the wastewater plants' effluent.

The Brownsville PUB has the authority to provide wastewater service both inside and outside the city limits. The Brownsville Navigation District owns and operates its own wastewater treatment facilities. There is no competition between Brownsville PUB's wastewater system and the Brownsville Navigation District since the Brownsville Navigation District operates in defined areas in which the System has no wastewater lines.

Economic Conditions and Outlook

The City of Brownsville, Texas (City) is the county seat of Cameron County. It is the southernmost city in Texas and the largest city in the Lower Rio Grande Valley. In Texas, Brownsville is second only to San Antonio in historical significance. Its location is attractive due to its close proximity to major tourism attractions, such as South Padre Island, Mexico, and the Gladys Porter Zoo.

The City is located about 25 miles inland from the Gulf of Mexico, on the north bank of the Rio Grande River. Brownsville lies across the river from Matamoros, Mexico. The two cities are joined by three international bridges, and serve as a trade center for much of the Lower Rio Grande Valley.

According to the U.S. Census Bureau, Brownsville's estimated population for 2023 was 190,158. The demographics of Brownsville's population can be summed up as young and fast growing. The median age is 30.7 years versus a national average of 39.2 years. Approximately 28.6% of all persons in the City are younger than 18 years of age.

The reporting entity of the Brownsville PUB consists of the primary government and a blended component unit, Southmost Regional Water Authority (SRWA). The SRWA establishes a separate budget. The SRWA is a conservation and reclamation district created pursuant to Article XVI, Section 59, of the Texas Constitution and the Act of June 12, 1981, 67th Leg., Ch. 511, 1981 Tex. Gen. Laws 2196. The SRWA provides treated water to various areas of Cameron County.

| | | | | | | | | | | |

The negative change in net position for FY21 is primarily attributable to the disposition and write-off of the Oklaunion Power Station.

The unusually high Purchased power and fuel costs in FY21 are attributable to the Winter Storm URI event in February 2021.

The negative change in net position for FY19 is attributable to the write off of pre-development costs for Tenaska of \$9.3 million and the accelerated depreciation of the Oklaunion Power Station of \$17.1 million.

Revenue Capacity

These schedules contain information to help the reader assess the Brownsville PUB's local revenue source.

¹Excludes Southmost Regional Water Authority and fuel supplement paid from restricted fuel adjustment subaccount.

²Operating Income for FY 2019 is restated and FY 2020 is lower than in revious years due to channge in the reporting of the fuel supplement.

³Operating Income in FY 2021 is exceptionally high due to Winter Storm Uri event in February 2021.

Demographic and Economic Information

This schedule offers demographic and economic indicators to help the reader understand the environment in which the Brownsville PUB's financial activities take place

GENERAL INFORMATION REGARDING THE CITY

The information contained herein is relative to the City and the System service area is intended solely to provide a general description of the community served by the System and to provide certain information concerning the City.

GENERAL

The City is the county seat of Cameron County, Texas. It is the southernmost city in Texas and the largest city in the lower Rio Grande Valley. The City is located about 23 miles inland from the Gulf of Mexico, on the north bank of the Rio Grande River directly across from Matamoros, Mexico, which it joins by three international bridges. The City serves as a trade center for much of the lower Rio Grande Valley.

The City has a semi-arid, subtropical climate. The lower Rio Grande Valley has rich, fertile delta soil, much of which is irrigated. Crops consist of vegetables, cotton, grain, sugar cane and citrus. The vegetation is typical of the tropics with palms, bougainvillea, poinciana and many other flowering trees and plants. Throughout the area are citrus orchards, which bloom in February and ripen in October. It has only snowed twice in the City in the last 100 years and seldom freezes. Weather characteristics of the City are 75 degrees mean average temperature (67 average in winter, 83 average in summer); 25.4 inch average rainfall; 10 mph average wind velocity; average elevation 57 feet above sea level; and 66 percent relative humidity.

POPULATION

The lower Rio Grande Valley consists of Cameron, Hidalgo, Starr and Willacy Counties with an area of approximately 4,200 square miles and a population of over 1,300,000 based on 2015 estimated census information. Winter residents increase the population substantially. The table below sets forth the population of the City, as reported in the Federal censuses covering the last six decades.

POPULATION STATISTICS

| YEAR | BROWNSVLLE (1) | CAMERON COUNTY (2) |
|------|----------------|--------------------|
| | | |
| 2021 | 187,831 | 423,029 |
| 2022 | 189,382 | 425,208 |
| | | ·-• ; · |
| 2023 | 190,158 | 426,710 |

⁽¹⁾ Estimate from US Census Bureau.

⁽²⁾ Population growth based on average historical rates.

INDUSTRIAL DEVELOPMENT

The major portion of the City's industrial jobs and related payroll has materialized since 1971. Industrial manufacturing is rapidly becoming the primary base of economic growth, causing additional residential and commercial development.

Industries which are represented in the City include offshore drilling platforms, chemicals, electronics, communications components, ship dismantling, shrimp processing, paper and plastic bags, fluorspar, engineering, industrial engines, tool-die service, plastic injection molding, industrial services, and the manufacturing of fiberglass swimming pool accessories, corrugated boxes, utility buildings, marble vanities, fiberglass boats, appliances, automotive products, drill bits, apparel, fire and safety equipment and shrimp boats. A sampling of corporations includes Carling Technologies, Inc., CK Technologies, CTS Corporation, Dipasa US Inc., Fisher Dynamics, General Motors Corp., Gobar Systems, Keppel AmFels, National Electric Coil Division, ORC Industries, Polibrid Coatings, SaintGobain Corporation, Tella Tool, and Trico Products Corporation.

The following companies either started up or expanded operations in Brownsville/Matamoros:

Airpax Corporation (N.A. Philips)

Antique Street Lamps, Inc.

Border Alliance, SA de CV (Subcontractor)

Butternut Electronics

FAMSA (Mitsubishi International Corp.)

THE BROWNSVILLE NAVIGATION DISTRICT AND THE PORT OF BROWNSVILLE

The Port of Brownsville, the only deepwater port located on the U.S. and Mexico border, provides a full range of services to ensure efficient and timely cargo delivery worldwide. With abundant land for development and seventeen miles of waterfront access, the Port of Brownsville offers easy access to non-congested international bridge crossings and rail connections to your ultimate destination.

FACILITIES

- Approximately 40,000 acres of land
- -1+ million sq. ft. covered storage
- -3+ million sq. ft. open storage
- 13 cargo docks
- 6 liquid cargo docks

M-10 HIGHWAY DESIGNATION

The Port is designated as part of the M-10 Marine Highway corridor. This allows the Port to provide an economical method of transporting cargo with service routes from the Port of Brownsville along the newly designated M-10 Marine Highway.

MEXICO IMPORT/EXPORT EXPERTS

The Port of Brownsville provides excellent services to facilitate the international movement of goods between the United States and Mexico. The Port has the facilities and the knowledge to handle international cargo efficiently.

LOCATION

The Port is located at the southernmost tip of Texas at the westernmost terminus of a 17 mile (27 kilometer) channel that flows into the Gulf of Mexico at the Brazos Santiago Pass. The City of Brownsville is two miles (3.3 kilometers) to the southwest and lies adjacent to the Rio Grande River, providing a convenient gateway via three international bridges to Mexico and beyond.

MAIN CHANNEL DEPTH

The Brownsville Ship Channel has an authorized depth of 42 feet. The Turning Basin, has a depth of 36 feet and a width of 1,200 feet.

LAND AVAILABLE FOR DEVELOPMENT

The Port owns approximately 40,000 acres (16,187 hectares) of land available for development. Developed and undeveloped sites are available in the Port's Turning Basin for cargo facilities, industrial sites, expansion, relocation, manufacturing, greenfield projects, and more.

PRIMARY CARGOES

Steel Products: slabs, coils, plates, beams, iron ore, steel pipe, billets, pig iron, wire rod, ingots, briquettes, chrome ore

Liquid Cargo: lubricants, diesel, gasoline, fuel oil #6, jet fuel, naphtha, wax, vacuum gas oils Breakbulk Cargo: limestone, asphalt, minerals

Other: grain, barite, bauxite, petroleum coke, aluminum, scrap metals, electrical poles, windmill components, etc.

OTHER PORT AREA SERVICES

Bunkering/Fuel; Construction and Refurbishing of Offshore Drilling Rigs, Domestic and International Container service; Bulk Terminaling for Miscellaneous Liquids; Ship Repairing and Dismantling/Recycling; Breakbulk/Heavy Lift/Project Cargo; Steel Fabrication, Boat Construction; Grain Handling and Storage; LPG Storage/Distribution; Crane Maintenance and Repair; Environmental & Waste Services; Marine Equipment/Supplies; and Towing & Tug Services.

MULTIMODAL ACCESS

The Port of Brownsville offers multiple modes of transportation which include ocean-going vessels, all major U.S. and Mexican truck lines, rail service, barge service via the U.S. Intracoastal and Inland Waterway System, short-sea shipping via the M-10 Marine Highway, pipeline access to U.S. and Mexican terminals, and air freight service at the Brownsville/South Padre Island International Airport.

OVERWEIGHT CORRIDOR

In order to facilitate the movement of cargo to and from Mexico, the Port of Brownsville, in conjunction with the Texas Department of Transportation, issues permits online to shippers allowing them to load their trucks to the legal weight limits of Mexico. The permits cover truck movements between the Veterans International Bridge and the Port of Brownsville via International Boulevard (SH 48). This provides the most efficient and cost-effective movement of cargo by trucks to destinations in Mexico.

FISHING HARBOR

Located on the north side of the Brownsville Ship Channel, about five miles (8.1 kilometers) east of the Turning Basin, is the Fishing Harbor, a unique asset at the Port. The Fishing Harbor consists of three 14-foot (4.2 meters) deep basins and over 10,000 linear feet (3,280 meters) of docks, which house up to 500 fishing boats, that call the Port of Brownsville home.

BROWNSVILLE & RIO GRANDE INTERNATIONAL RAILWAY (BRG)

The Brownsville & Rio Grande International Railway (BRG) provides efficient and reliable rail service to all businesses at the Port of Brownsville. Operations are 24 hours per day, 6 days per week. The BRG offers direct interchange with Union Pacific Railroad (UP), Burlington Northern Santa Fe (BNSF) and Kansas City Southern de Mexico (KCSM). KCSM serves as UP's intermediate switch to and from Mexico.

FOREIGN TRADE ZONE

On October 20, 1980, U. S. Customs created Foreign Trade Zone ("FTZ") Number 62 with the District as the Grantee and operator. There is a total of 2,680 acres available for FTZ status at the Port of Brownsville, the Brownsville/South Padre Island International Airport, the Harlingen Industrial Park, the Los Indios Industrial Park/FINSA Industrial Park, and the NAFTA Industrial Park. The District receives fees from tenants utilizing the District's zone status. There are currently six Foreign Trade Zone tenants operating within the FTZ with general purpose warehousing and liquid bulk storage available.

TOURISM

Tourism is one of the area's biggest industries. The City ranks among the top five cities in Texas for long and short term stays, with the Rio Grande Valley as the number one area in the State of Texas as a destination point for automobile tourist traffic entering Texas. The City area has twenty-nine hotels and motels with 1,740 rooms and two country clubs. Vacationers are attracted by subtropical climate, proximity to Mexico and access to South Padre Island. In addition to a rich historical past, the City has one of the finest zoos in the nation, the Gladys Porter Zoo, donated by the Sams Foundation. Also, the Laguna-Atascosa Wildlife Refuge, Confederate Air Force Flying Museum and the Port Isabel Lighthouse are open for tourists.

TRANSPORTATION

The City is the only location on the U.S./Mexico border offering all modes of transportation including highway, air, railroad and waterborne. The City is the terminus of U.S. Highways 77/83 and 281. Three international bridges, B&M (a privately-owned bridge), Gateway International, and Veteran's International, owned by Cameron County, connect the City with Matamoros, Mexico. Several bus companies, including Greyhound Bus Line, Valley Transit and El Expresso, and motor freight carriers also serve the area. Two international airports are within a 30-mile area; the Brownsville/South Padre Island International Airport, serviced by American Airlines and United Airlines, and the Valley International Airport, serviced by Southwest Airlines and United Airlines. Air cargo is provided by FedEx, DHL, United Cargo and Southwest Airlines Cargo.

Railroad needs are met by Union Pacific and Ferrocarriles Nacionales de Mexico.

Waterborne shipping is provided through the Port to domestic and foreign destinations by barge and deep water vessels.

EDUCATIONAL FACILITIES

The City is encompassed by the Brownsville Independent School District ("BISD"). The BISD is currently comprised of 7 high schools, 10 middle schools, 35 elementary schools and 3 alternative learning centers. In addition to the public schools, there are several private schools and charter schools ranging from kindergarten through high school available in the City.

SECONDARY EDUCATION

There are multiple institutions of higher education within a 60-mile radius of the City.

The University of Texas Rio Grande Valley has main campuses in Brownsville and Edinburg. UTRGV is a global innovator in higher education, bilingual education, health education, biomedical research, and emerging technology.

Texas Southmost College, located in Brownsville, was originally established in 1926. It currently offers the first two years toward a bachelor's degree, along with career and technical education leading to certificates and associate degrees, college preparatory studies to prepare students for college-level work, workforce training, and continuing education.

Texas State Technical Institute ("TSTC"), located in Harlingen (25 miles from the City), is a state-supported technical college system, with a mission of preparing its students to enter the workforce ready to meet the high-tech challenges of today's industry.

^{*} Includes Southmost Regional Water Authority Production.

A/P – Accounts Payable

A/R – Accounts Receivable

Account – A basis for distinguishing types of expenses or expenditures.

Accrual – The method of accounting that recognizes income when earned and expenses when incurred regardless of when cash is received or disbursed.

ACFR – Annual Comprehensive Financial Report

ACH – Automated Clearing House; name of the network used for electronic financial transactions.

AMI – Automated Metering Infrastructure

AMR – Automated Meter Reading

ARRA – American Recovery and Reinvestment Act of 2009 is a nationwide effort to create jobs, jumpstart growth and transform our economy to compete in the 21st century signed into effect February 17, 2009.

Asset – A property that has value.

AST – Above-ground storage tank

Balanced Budget – a budget in which forward expenditures for a set period are matched by expected revenues for the same period.

BANNER 9.3.6 – name of program used as the Financial Management Information System.

Bond – A written promise to pay a sum of money on a specific date at a specified interest rate. The interest payments and the repayments of the principal are detailed in a bond ordinance. The most common type of bonds is the general obligation (G.O.) and revenue bonds. These bonds are most frequently used for the construction costs of large capital projects, such as buildings and streets.

Bond Covenants – The issuer's pledge, in the financing documents, to do or to avoid performing certain practices and actions.

Bond Ratings – A measure of the quality and safety of a bond, based on the issuer's financial condition; more specifically, an evaluation from a rating service indicating the likelihood that a debt issuer will be able to meet scheduled interest and principal repayments. Typically, AAA is the highest (best), and D is the lowest (worst). The Brownsville PUB is maintaining an "A2", as rated by Moody's, an "A+" as rated by Standard & Poor's, and an "A+" as rated by Fitch Ratings.

BPUB – Brownsville Public Utilities Board; Brownsville PUB; the Public Utilities Board; PUB; the System; the Board.

BTU – British Thermal Units; in science and engineering, a unit measurement of heat or energy

Budget – A financial plan, generally for one fiscal year, presenting proposed expenditures and an estimate of the necessary sources of funds; the Budget Document, as prepared and presented, to the governing body.

Budget Document – The compilation of the spending plans for the various funds, along with supporting schedules, tables and charts, which, in total, comprises the annual revenue and expenditure plan.

Capital Asset – An asset with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of eighteen (18) months.

Capital Budget – The portion of the budget devoted to proposed additions to capital assets.

Capital Expenditure – Capital Expenditures are those investments in property, plant, and equipment that have a useful life that is greater than one year (depreciable assets).

Capital Project – the construction, reconstruction, acquisition, and structural maintenance of buildings or real property that adds value to the utility's system.

CBOD – Chemical Biological Oxygen Demand

CDBG – Community Development Block Grant Program (www.hud.gov/edbg).

CEMS – Continuous Emission Monitoring System

CFO – Chief Financial Officer; in charge of managing the finances of the company.

CIP – Capital Improvement Plan; strategy of planning and prioritizing capital projects based on projected availability of resources.

Clean Water State Revolving Fund (CWSRF) - a self-perpetuating loan assistance authority for water quality improvement projects in the United States. The fund is administered by the Environmental Protection Agency and state agencies. The CWSRF, which replaced the Clean Water Act Construction Grants program, provides loans for the construction of municipal wastewater facilities and implementation of nonpoint source pollution control and estuary protection projects. Congress established the fund in the Water Quality Act of 1987.

Contribution in Aid of Construction (CIAC) – Fees that offset construction costs and developer contributed plant. These can also be cash and non-cash contributions from developers for specific projects. A primary example is the development charge on new water and wastewater connections to Utilities' system. A development charge is assessed for connection to the water and wastewater systems to compensate existing customers for the costs of developing the current system and to help pay for the growth of the system caused by new customers.

COB Usage – City of Brownsville Usage; municipal utility services used by the City of Brownsville.

Commercial Paper (CP) - Commercial Paper Obligations means the "City of Brownsville, Texas Utilities System Commercial Paper Notes, Series A" which BPUB has authorized in a maximum aggregate principal amount of \$100,000,000.

COO – Chief Operating Officer; in charge of managing the operations of the company.

CPA – Certified Public Accountant; certification given to individual who has passed the Uniform Certified Public Accountant Examination and has met the required state education and experience requirements.

CPIM – Certificate Program in Management

CPR – Continuing Property Records System; information system used to record and keep track of the capital assets of the company.

Davis-Bacon Act - is a United States federal law which established the requirement for paying prevailing wages on public works projects. All federal government construction contracts, and most contracts for federally assisted construction over \$2,000, must include provisions for paying workers onsite no less than the locally prevailing wages and benefits paid on similar projects.

DD – Demand Deposits; ACH checks.

Debt Service – The principal repayment, interest expense, and issue costs associated with the retirement of outstanding debt.

Defeasance – Termination of the rights and interests of the trustee and bondholders under a trust agreement or indenture on final payment or provision for payment of all debt service and premiums and other costs, as specifically provided for in the trust instrument.

Department – A major administrative segment responsible for management of operating divisions, which provide services within a functional area.

Depreciation — Depreciation represents the use of capital asset over its useful life. Eventually all physical assets wear out or become obsolete. Depreciation recognizes this fact, but does not represent either an actual cash outflow or cash inflow.

Distribution – Usable portion of the delivery system coming from the substation or water plant/tank to the customer's meter.

Division – A basic organizational unit that is functionally unique and provides service under the administrative direction of a department.

Enterprise Fund – A fund established to account for operations 1) that are financed and operated in a manner similar to business enterprises, where the intent of the governing body is that the costs of providing goods and services to the general public on a continuing bases be financed or recovered primarily through user charges or 2) where the governing body has decided the periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, and accountability of other purposes.

EPA – Environmental Protection Agency; federal government agency charged with protecting and safeguarding human health and the natural environment (www.epa.gov).

ERCOT – Electric Reliability Council of Texas; Texas State Agency in charge of directing and ensuring the reliable and cost-effective operation of the electric grid and to enable fair and efficient market driven solutions to meet the customers' electric service needs (www.ercot.com).

ERM – Energy Risk Management

Expense – A use of financial resources to acquire goods or services consumed in a single year's current operations.

Federal Deposit Insurance Corporation (FDIC) – An independent agency created by Congress that maintains the stability and public confidence in the nation's financial system by insuring deposits, examining and supervising financial institutions, and managing receiverships (www.fdic.gov).

Feeder – That portion of the circuit that is protected by the breaker up to any protective device excluding branches.

FERC – Federal Energy Regulatory Commission

Fiscal Year (FY) – A consecutive 12-month period marking the beginning and ending dates for recording financial transactions. The Brownsville PUB's fiscal year begins October 1 and ends September 30 of the following calendar year. This is also referred to as the budget year.

FS – Financial Statements

FTE – Full Time Employee working 40 hours per week.

Fuel & Purchased Energy Charge (FPEC) – An electric cost adjustment is the mechanism that tracks and passes through to customers the actual cost of purchased fuel or purchased electricity. The Brownsville PUB meets on a monthly basis to make FPEC adjustments if actual costs vary from forecasted prices. Adjustments can be decreased or increased.

Fund Obligation – Repair and Contingency - Funds set aside for unforeseen circumstances.

FY – See "Fiscal Year".

GASB - The Governmental Accounting Standards Board; Governmental Board organized in 1984 as an operating entity of the Financial Accounting Foundation (FAF) to establish standards of financial accounting and reporting for state and local governmental entities (www.gasb.org).

GAAP - Generally Accepted Accounting Principles; the conventions, rules, and procedures necessary to define an accepted accounting practice at a particular time. The principles have been developed on the basis of experience, custom, usage, and to a significant extent, practical necessity.

GFOA – Government Finance Officers Association; organization that enhances and promotes the professional management of governments for the public benefit by identifying and developing financial policies and practices and promoting them through education, training and leadership (www.gfoa.org).

GIS – Geographic Information System; software system that manages the geographic information of the company.

GM & **CEO** – General Manager & Chief Executive Officer; in charge of managing the company and reports to the Board of Directors

Grant – A legal transaction giving money or property for a specific purpose.

Gross Revenues - total amounts the organization received from all sources during its annual accounting period, without subtracting any costs or expenses.

GWH – Gigawatt hours; one billion watts.

HHV - Higher Heating Value

HRSG – Heat recovery steam generator

Improvement Fund CIP Funding – deposit account used for meeting any capital improvements to the System.

Improvement Fund Replenishment – deposit of any funds remaining after all debt requirements have been made.

Improvement Reserve Fund - reserve account for future CIP projects. The goal is to establish reserves of \$15,000,000, as required by City Commission Ordinance No. 2005-1438.

Interest Expense – Interest expense is the cost of borrowing funds. It is shown as a financial expense item within the income statement.

Interest from Investments – See "Investment Income".

Investment Income –Interest and dividends from short-term and overnight investments. The Brownsville PUB invests certain cash assets in order to receive interest earnings until that cash is needed. All interest earned is recorded as investment income.

IVR – Interactive Voice Response

JEs – Journal Entries

JMUX – (Brand name) Electronic System used to control the fiber optic system.

Junior lien – See "lien obligations".

Kilovolt (kV) -1,000 volts.

Kilowatt (kW) -1,000 watts.

Kilowatt Hour (kWh) A unit of work or energy equal to that expended by one kilowatt to one hour.

Liabilities - a liability is a debt or obligation that a company must pay. Liabilities are recorded on a company's balance sheet and can include accounts payable, taxes, wages, accrued expenses, and deferred revenues.

Lien Obligations – Security protection claim for repayment of a debt. Legal priority rights are placed on the repayment of debt. If legal remedies for repayment occur, first emphasis for repayment is Priority Obligations, then Second Lien Obligations, then Junior Lien Obligations, and then Subordinate Lien Obligations. While bonds with second or third liens are generally rated significantly lower than those with first liens, the issuer may determine that the senior-lien credit is so strong that a well-structured junior-lien bond will be rated relatively close to senior bond.

Maintenance Pool Account – account used to fund unexpected/extraordinary repairs or services that incurred during the fiscal year.

Mega Volt Ampere (MVA) -1,000,000 volt amperes.

Megawatt (MW) -1,000,000 watts or 1,000 kilowatts.

Megawatt hour (MWh) -1,000 kilowatt hours.

MG – Million gallons

MGD – Million gallons per day

Mg/l – Million gallons per load

NELAP – National Environmental Laboratory Accreditation Program (www.nelacinstituting.org/newnelap.php).

NERC – North American Electric Reliability Corporation

Net Assets - Total assets minus total liabilities of an individual or company.

Net Earnings – Gross Revenues after deducting the O&M expenses, but not expenditures, under standard accounting practice, should be charged to capital expenditures.

Notional amount – A stated principal amount in an interest rate swap on which the swap is based.

O&M – Operations & Maintenance

Off-system Sales (wholesale sales) - Off-system or wholesale sales are electric sales outside of the system.

Oklaunion - a coal-fired steam electric generating unit jointly owned and operated by Public Service Company of Oklahoma, AEP Texas Central Company, Oklahoma Municipal Power Authority, and the Brownsville PUB entitling the Brownsville PUB to 124 MW of capacity.

Operating Reserve Funds – reserve amount to pay the O&M expenses of not less than two months of budgeted O&M expenses (\$12,500,000 minimum) for the current fiscal year.

Operating Revenues – Gross Revenues with respect to any period, after deducting the O&M expenses.

Operating Subaccount – Fuel Adjustment – account to fund increases in fuel costs without passing on these differences to the customer as part of the FPEC.

Operations and Maintenance Budget (O&M Budget) – Plan of current expenditures and proposed means of financing them. The annual operating budget is the primary means by which most of the financing, acquisition, spending, and service delivery activities of the utility are controlled.

Operations and Maintenance Expense (O&M Non-personnel) – Also known as operating costs, these are the expenses of the day-to-day operations assigned to the current operating period.

Operations and Maintenance Personnel (O&M Personnel) – Cost related to compensating employees, including salaries, wages, insurance, payroll taxes, and retirement contributions.

Other Fees – fees charged to customers for a specific use or purpose, such as reconnection fees, meter fees, etc.

Other Non-Operating Expenses – Miscellaneous expenses, debt discounts/expenses and other interest expenses.

Other Non-Operating Revenues – Revenues consisting of TCI – Pole Rental charges, miscellaneous income and billing discounts.

Other Revenues – Revenues consisting of other sales, forfeited discounts (penalties), connection and service charges and TCOS charges.

P.E. – Professional Engineer; registered or licensed engineer.

PAYGO – The principle or practice of financing expenditures with surplus funds that are currently available rather than borrowed.

Personnel Market Pay Study Adjustment – Adjustments to payroll rates as a result of analysis of the most current Market Pay Study.

Plant Fund - This fund group is used to account for the acquisition, construction, and maintenance of the Systems physical plant and to control the resulting assets.

Policy – A program of actions adopted by a person, group, or government, or the set of principles on which they are based.

Polychlorinated biphenyl (PCB) – Several compounds that are produced by replacing hydrogen atoms in biphenyl with chlorine, have various industrial applications, and are toxic environmental pollutants which tend to accumulate in animal tissues.

Power Factor - The power factor of an AC electric power system is defined as the ratio of the real power flowing to the load over the apparent power in the circuit, and is a dimensionless number between 0 and 1 (frequently expressed as a percentage, e.g. 0.5 pf = 50% pf).

Proprietary Fund – Fund used to account for operations that are financed and operated in a manner similar to private business enterprises where the intent is to recover the cost of operations through user charges.

PUB - See "BPUB".

Public Utility Commission of Texas (PUCT) – agency that regulates the rates and services of electric, water and wastewater utilities, as defined by state and Federal laws and regulations (www.puc.state.tx.us).

Purview – Scope or range.

QA – Quality assurance

QC – Quality control

Ratings – Alpha and/or numeric symbols used to give indications of relative credit quality. In the municipal market these designations are published by the investors' rating services. Internal ratings are also used by other market participants to indicate relative credit quality.

Resaca - Resacas were former channels of the Rio Grande River. Today, they serve as water storage pools as well as habitats for waterfowl, nutria, gar and even alligators; a body of water or water body.

Revenue Bonds – Securities for which debt service payments are generated from a specific revenue source.

Reverse Osmosis – A process by which a solvent such as water is purified of solutes by being forced through a semi-permeable membrane through which the solvent, but not the solutes, may pass.

Revenue Neutral – No gain or loss in revenues.

RTU – Remote Terminal Unit

SCADA – Supervisory Control and Data Acquisition System; a computer system used to control and monitor power generation; electric, gas, and water transmission and distribution; and wastewater collection.

Senior Lien – See "lien obligations".

Sources of Funds – The Sources of Funds identifies the origination of cash received by the Utilities to pay for the various activities of the organization. There are four major categories of cash sources: sales & services to customers, off-system sales, interest from investments, and other operating & non-operating revenues. The primary source of cash is from sales & services to customers paying for the utility services provided to them. The second largest source is from off-system sales. As needed, the Brownsville PUB generates cash through selling excess electricity outside the system. The remaining cash receipts include interest from investments and other operating & non-operating revenues.

Southmost Regional Water Authority (SRWA) – The largest such facility in Texas, the regional reverse osmosis plant uses state-of-the-art reverse osmosis (RO) technology to treat previously untapped and unusable brackish groundwater resources as an alternative water supply.

Strategic Management (Strategic Plan) – A type of management to determine mission, vision, values, goals, objectives, roles and responsibilities, timelines, etc.

Subordinate Lien – See "lien obligations".

Substations – Electric facility where electrical energy is taken from either the transmission or subtransmission system and transformed from a higher voltage down to a distribution voltage.

Summary Letter – The opening section of the budget, which provides the Brownsville PUB Board and public with a general summary of the most important aspects of the budget. The message explains principal budget issues against the background of financial experience in recent years, and presents the views and recommendations of the General Manager & CEO and Chief Financial Officer.

Supplemental O&M – O&M expenses separate from and in addition to the current O&M Budget. These consist of new positions, promotions and reclassifications, maintenance pool account, personnel market pay study adjustment, cost of living, and the new internal auditor positions.

Swap – A contract between two parties to swap a series of commitments over a defined period. The commitments which are exchanged are generally an obligation to make one or more payments or the right to receive one or more payments.

T&D – Transmission and Distribution

TBD – To Be Determined

TCEQ – Texas Commission for Environmental Quality is the environmental agency for the State of Texas (www.tceq.state.tx.us).

TCI – Tele-Communications Inc.; Time Warner Communications.

TCOS – Transmission Cost of Service; cost of transmission between utilities.

TDSP – Transmission & Distribution Service Provider

TPDES – Texas Pollutant Discharge Elimination System; refer to the following web address: http://www.tceq.state.tx.us/permitting/water quality/wastewater/pretreatment/tpdes definition.html.

TSS – Total Suspended Solids

TWDB – Texas Water Development Board; state agency providing leadership, planning, financial assistance, information, and education for the conservation and responsible development of water resources for the State of Texas (www.twdb.state.tx.us).

TXDOT – Texas Department of Transportation; state agency providing safe, effective, and efficient movement of goods within the State of Texas (www.dot.state.tx.us).

UPS – Uninterruptible Power Supply

Uses of Funds – The Uses of Funds identifies how the Brownsville PUB spends the cash it receives. There are nine major categories of cash uses: electric fuel & energy costs, SRWA (the Authority), personnel O&M expenses, non-personnel O&M expenses, other non-operating expenses, debt service fund, city cash transfer, operating & improvement reserves, and CIP funding. The largest use of cash is for operational expenses (labor, fuel, and other expenses) related to the day-to-day operation and maintenance of the Brownsville PUB. The amount of operating cash used to pay for capital projects is also identified. Debt service fund represent the principal and interest payments for the outstanding and planned bond issues. The remaining uses of cash include city cash transfer and operating & improvement reserves.

UST – Underground Storage Tank.

Utility Manager System (UMS) – Software that manages the customer accounts for electric, water and wastewater utilities. The UMS is the primary billing system for the Brownsville PUB.

Vacancy Savings – Personnel account used to allow for the effects of attrition through resignations of employees and non-hiring of currently vacant positions.

Watt – The rate of work represented by a current of one ampere under a pressure of one volt and taken as the standard in the United States.
