Subject: Addendum #1

REFERENCE: B058-25 RE-BID OF OCELOT SUBSTATION PERIMETER SECURITY FENCE

This Addendum forms part of the contract and clarifies, corrects or modifies original bid document.

Question 1: Does Brownsville Public Utilities Board (BPUB) have the site address for the Ocelot substation project?

Answer 1: The address for the Ocelot Substation project is 500 W. Morrison Road, Brownsville, TX.

Question 2: Does Form 1295 need to be turned in with bid and if so, does it need to be notarized?

Answer 2: Form 1295 will be submitted at the time the signed contract is submitted to BPUB and form is not required to be notarized.

Question 3: Is the site going to be cleared and ready for all fence installation, property survey stakes up indicating fence lines and gate locations? I see where it states BPUB is responsible for existing fence removal, but not clear on other site work that needs to be done? I assume now when we go in to install fence we will be working with finished grades and all we will be responsible for is installing the fence to the existing grades?

Answer 3: The fence contractor will be installing the new fence on top of new grading and no other site work should be done. The substation grading will be done by others.

Question 4: Is BPUB providing a geotechnical report prior to bidding the project?

Answer 4: Attached separately is the geotechnical engineering study.

The signature of the company agent, for the acknowledgement of this addendum, shall be required. **Complete information below and return via e-mail to: nespinoza@brownsville-pub.com.**

I hereby acknowledge receipt of this addendum.

Company: _____

Agent Name: _____

Agent Signature: _____

Address: _____
