Subject: Addendum #1

REFERENCE: P013-26 ArcGIS ESRI Utility Network Migration

This Addendum forms part of the contract and clarifies, corrects or modifies original RFP document.

Question 1: Would BPUB consider it acceptable for proposers to fully scope and price Proposal Cost Sheet Items 1–4 (Project Kickoff, Workshop Coordination, Utility Network Organizational Audit and Roadmap, and Utility Network Data Assessment) as a defined initial phase, and then, following completion of the Utility Network Organizational Audit and Roadmap, provide a detailed implementation approach for Proposal Cost Sheet Items 5–7 (Data Migration, Training and Documentation, and Deployment and Go-Live Support)? Specifically, would BPUB be amenable to proposers submitting a high-level methodology and assumptions for Items 5–7 at the time of proposal submission, with refined scope, schedule, and pricing for those items to be developed based on the findings and recommendations of the Organizational Audit, Roadmap, and Data Assessment, rather than requiring full fixed pricing for Items 5–7 upfront?

Answer 1: If the proposer is hesitant to provide fixed pricing for items 5-7, BPUB would rather have the proposer submit a low-end and high-end estimate.

The signature of the company agent, for the acknowledgement of this addendum, shall be required. **Complete information below and return via e-mail to: dsolitaire@brownsville-pub.com.**

I hereby acknowledge receipt of this addendum.
