

Date: February 3, 2026
To: All Vendors
Subject: Addendum #1

REFERENCE: P024-26 ANNUAL SUPPLY OF LIQUID ALUMINUM-BASED WATER TREATMENT COAGULANT

This Addendum forms part of the contract and clarifies, corrects or modifies original proposal document.

Question 1: The above bid is requesting jar and bench testing. Who are we to contact to make arrangements?

Answer 1: The BPUB contact is Daniel Tamez at (956) 346-3774.

Question 2: Are we required to test our product if we are your current supplier?

Answer 2: The current supplier is not required to test existing product, unless a new product is being proposed.

Question 3: Since product testing is a requirement, may we have a one (1) week extension for the due date? Is February 18th a possible date for extension?

Answer 3: BPUB declines to provide an extension on this proposal.

Question 4: We need to run recent jar tests, which we don't have. However, we do have studies and reports on the FBS 3327 T product from 2011-2013. Would these be helpful?

Answer 4: Yes, the studies and reports on FBS 3327 T product from 2011-2013 would be helpful.

Question 5: What are the current average flow rates for BPUB Water Plants 1 and 2?

Answer 5: The current average flow rates are 8 million gallons per day, per plant.

Question 6: Are there any special requirements besides the W8 and W9 forms for a foreign company?

Answer 6: Please refer to proposal checklist on page 18 and fill out all the required forms attached.
